

Hello Beta Users,

With this update, **Version 2.0-914 (or greater)**, several significant changes are introduced that will make the SC-2 Recording System more flexible and easier to use. An updated user guide documenting the changes is accessible from this menu on the Support page. You can also download the document as a PDF.

The most significant change is that the system no longer supports automated track and album identification. The automated system is either remarkably accurate or surprisingly wrong and can fail completely with certain genres. This is due to a third-party track lookup service that sometimes returns false positive matches as your album is being recorded. We have tried to filter the errors and have been mostly successful with improvements – but we have now implemented a deterministic and easy to use system based on Discogs data lookup and are discontinuing the automatic method.

Going forward, when you start a recording on the SugarCube, a window will pop up in the browser view requesting the catalog number or the artist and/or album info (for example: “Miles Davis, Kind of Blue”). You can then select the album side or a different release of the same album. Once selected, the album information, album art, and track details will populate the interface and, while in record mode, the album art will appear on the LCD display of your SC-2.

The system now will let you save files to your desktop computer through the Chrome browser and if you have a NAS folder mounted on your computer you can also save directly to that folder using your browser tools.

These new approaches are simple, fast and easy to use. Also, please send us email with any questions or observations as we transition to this new software system.

Kind regards,
SugarCube Beta Team
support@sweetvinyl.com

The SugarCube SC-2 Recording User Guide start next page.

SugarCube SC-2 Beta 2.0 Recording Guide

Volume 1: Basic Instructions for Recording and Track Splitting
for SC-2 software release 2.0-918 or greater

NEW

Introduction

Section 1.0 – Initial setup

Section 2.0 – Recording

Section 3.0 – Editing Track Markers

Section 4.0 – Saving tracks

What's New?

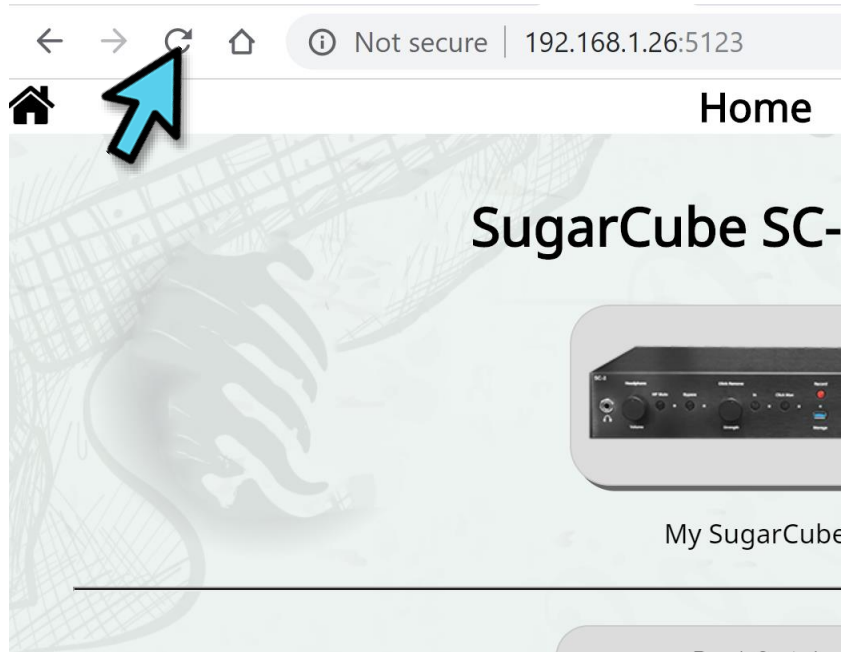

- Catalog number entry pop-up window at start of recording.
- Catalog number retrieves complete album information from the SugarCube server at start of recording.
- **Automated album ID has been turned off.**
- Album cover displays on LCD while recording in progress.
- Saving tracks directly to laptop *or* NAS.

What's Coming?

- We will provide a stand-alone app to install and run in Windows or MacOS, no need for a browser.
- Direct link to discogs.com for album information lookup.
- And, still more!

Before we start:

Any time your SugarCube gets an update (or, you think the program is acting funny), please do a full refresh of your browser window by:

Hold the shift key on the keyboard and clicking on the refresh icon in the browser (you won't lose any work.)

IMPORTANT: Please only use a **Chrome** browser during this beta period. Other browsers can disagree with Chrome on interpreting webpages and make the recording and track splitting functions behave incorrectly.

Thanks,

The SweetVinyl Beta Team

Introduction

- This document outlines the use of recording and track splitting functions of the SugarCube SC-2.
- Due to the complexity of editing audio, we highly recommend that you use Google Chrome on a tablet or laptop to access these menus (even if you don't use it for anything else.)
- Please proceed with the understanding that this is beta software and it is somewhat intricate. Beta also means that it is still incomplete and undoubtedly has some software bugs (one or two at least!)

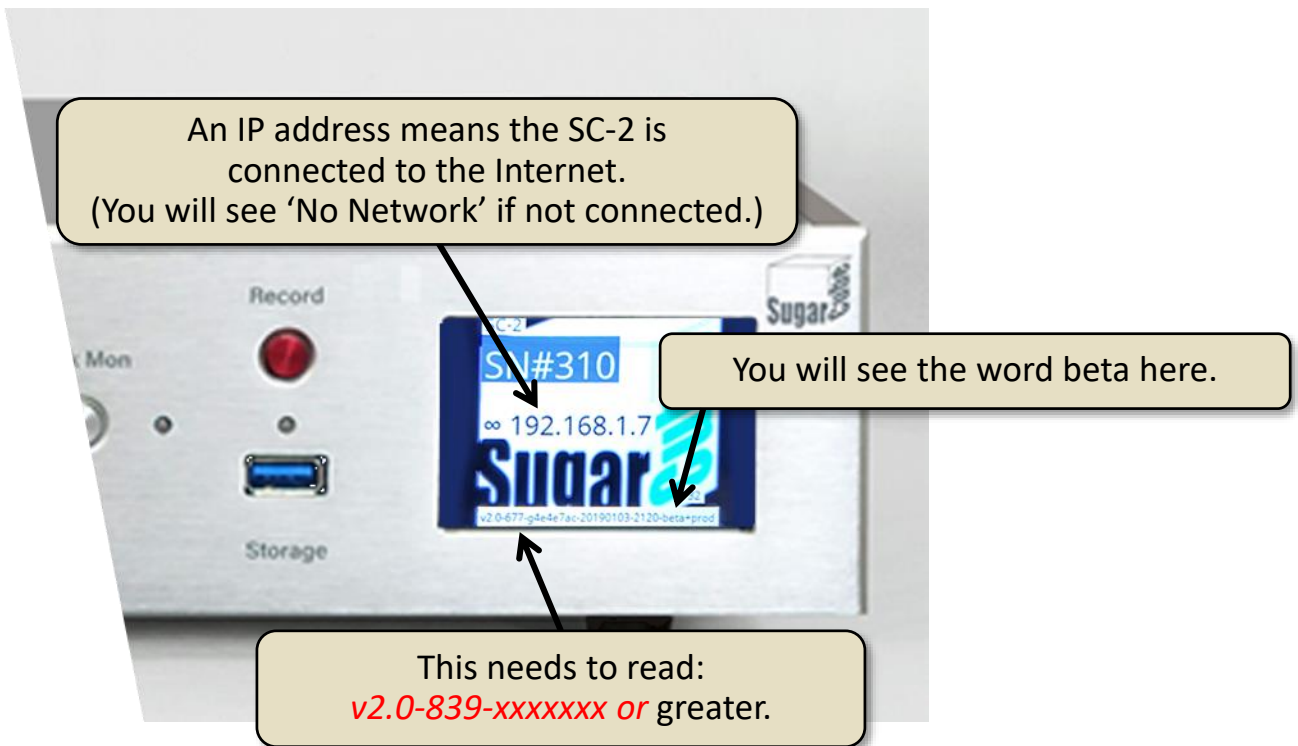

-
- Please note that as you use this software, every album that you record can be saved as individual tracks and as a whole album side, either raw or with clicks and pops removed.
 - You can easily import these album sides into a number of competent audio editing programs on the Mac and Windows PCs such as PureVinyl (Mac only), Vinyl Studio (Mac or PC), Audacity (Mac, PC, Linux), Sound Studio (Mac), Amadeus Pro (Mac), GoldWave (Win), among others.
 - However you choose to do final processing on your recordings, we know you will appreciate the sweet (and noise-free) output of your SC-2.
 - This document will be updated and recirculated as the beta program proceeds, and as we receive and incorporate your valuable feedback.
 - We welcome your feedback regarding your experience with this software. Please send bug reports, comments, and suggestions for improvement to:

beta@sweetvinyl.com

- Thank you for your participation in our beta program and we hope you enjoy the results—from the creators of the SugarCube!
-

1.01 – Initial Setup

- First, be sure your SugarCube SC-2 is connected to the internet and left powered ON for a few hours.
- The beta update is automatic and will occur sometime after two hours of no music passing through the SC-2.
- Once updated, your SC-2 will be running the latest beta version.
- You can check that your SugarCube has been updated by pressing and holding the *Bypass* button for 3 to 5 seconds until the display changes to look like the image below:

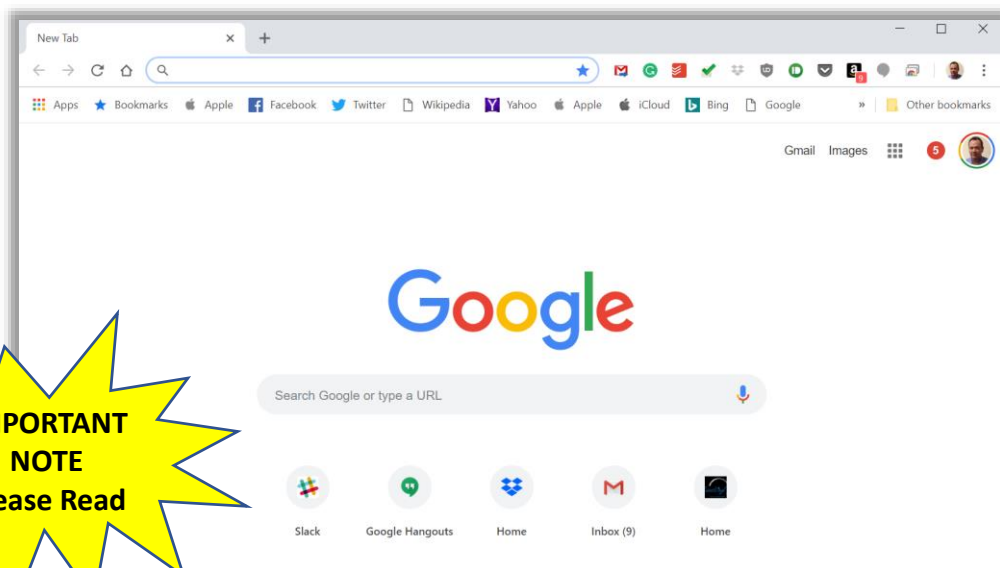

For this beta group, your SC-2 is on a special list and will update automatically. If you do not see the update as explained above, please contact us at beta@sweetvinyl.com, thanks.

1.02 – Initial Setup

- We recommend operating the SC-2 Recording / Track Splitting functions from a laptop, as a second choice, a tablet.
- Enter the IP address displayed followed by ':5123' to form a complete address such as: **192.168.1.7:5123** or **10.1.10.7:5123**
- If you need to find the IP address, press and hold the 'Bypass' button on the front panel for a few seconds.
- Please note that sometimes the IP address given by your router to the SugarCube will change so if you have difficulty connecting, please check the address again.

Please only use a Chrome browser during the beta period.

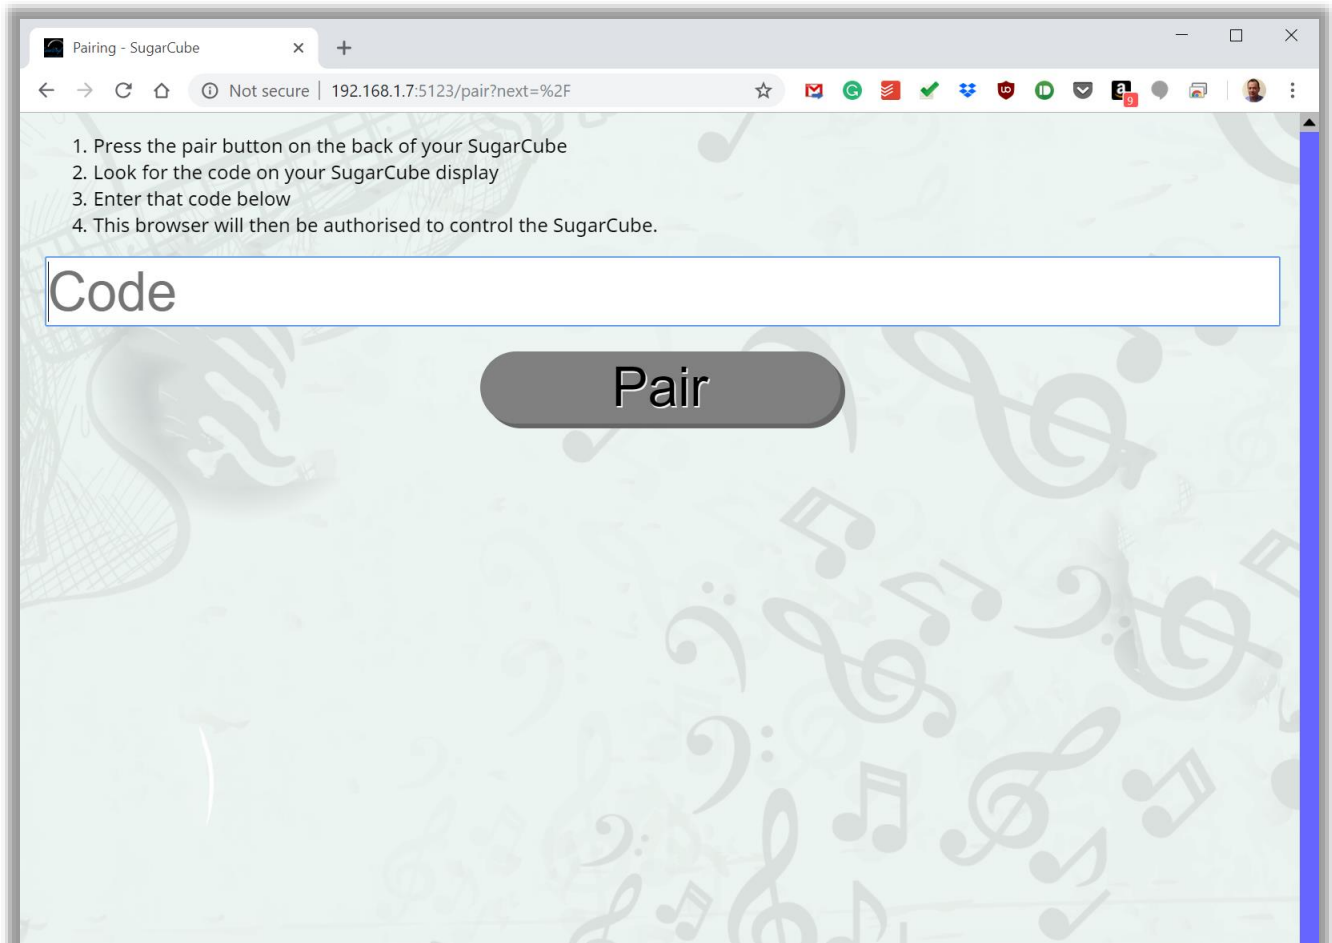

**IMPORTANT
NOTE
Please Read**

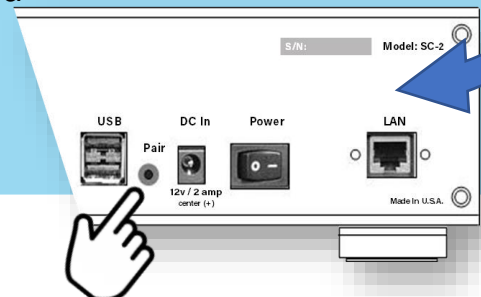

(1) While you edit an LP on the SugarCube, the **audio** for editing will come **from** your **browser** (i.e.—the speakers on your laptop or tablet) and will NOT play through your speakers while editing.

(2) This audio is NOT the audio the SugarCube saves when you output tracks, it is just a proxy so you can clearly hear the edit points (it still sounds good though.)

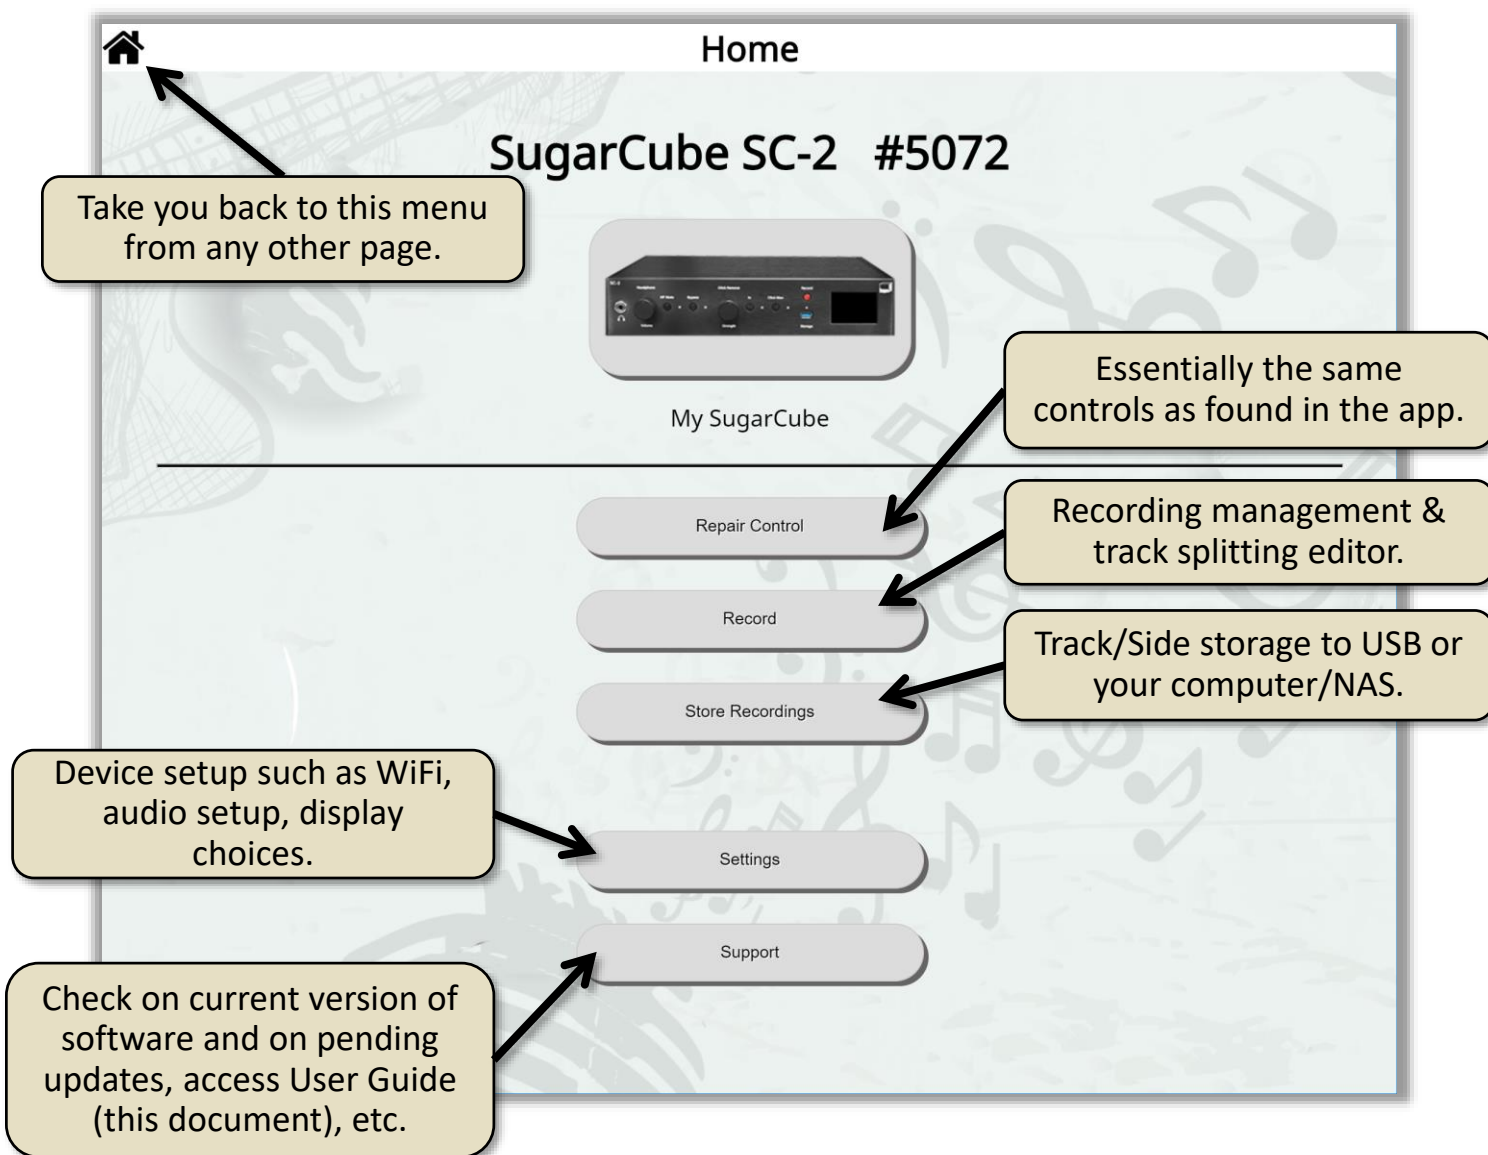

1.04 – SC-2 Pairing

- The SugarCube will need a pairing code to complete the connection.
- Press the '*Pair*' button on the back panel (press & release).
- Then, enter the four-digit code you see on the SC-2 LCD display.
- And, select '*Pair*' on the browser display.
- NOTE: pairing is a one-time use function and does not need to be repeated unless you are using a different laptop or tablet.
- Each pairing code is only good for one use.

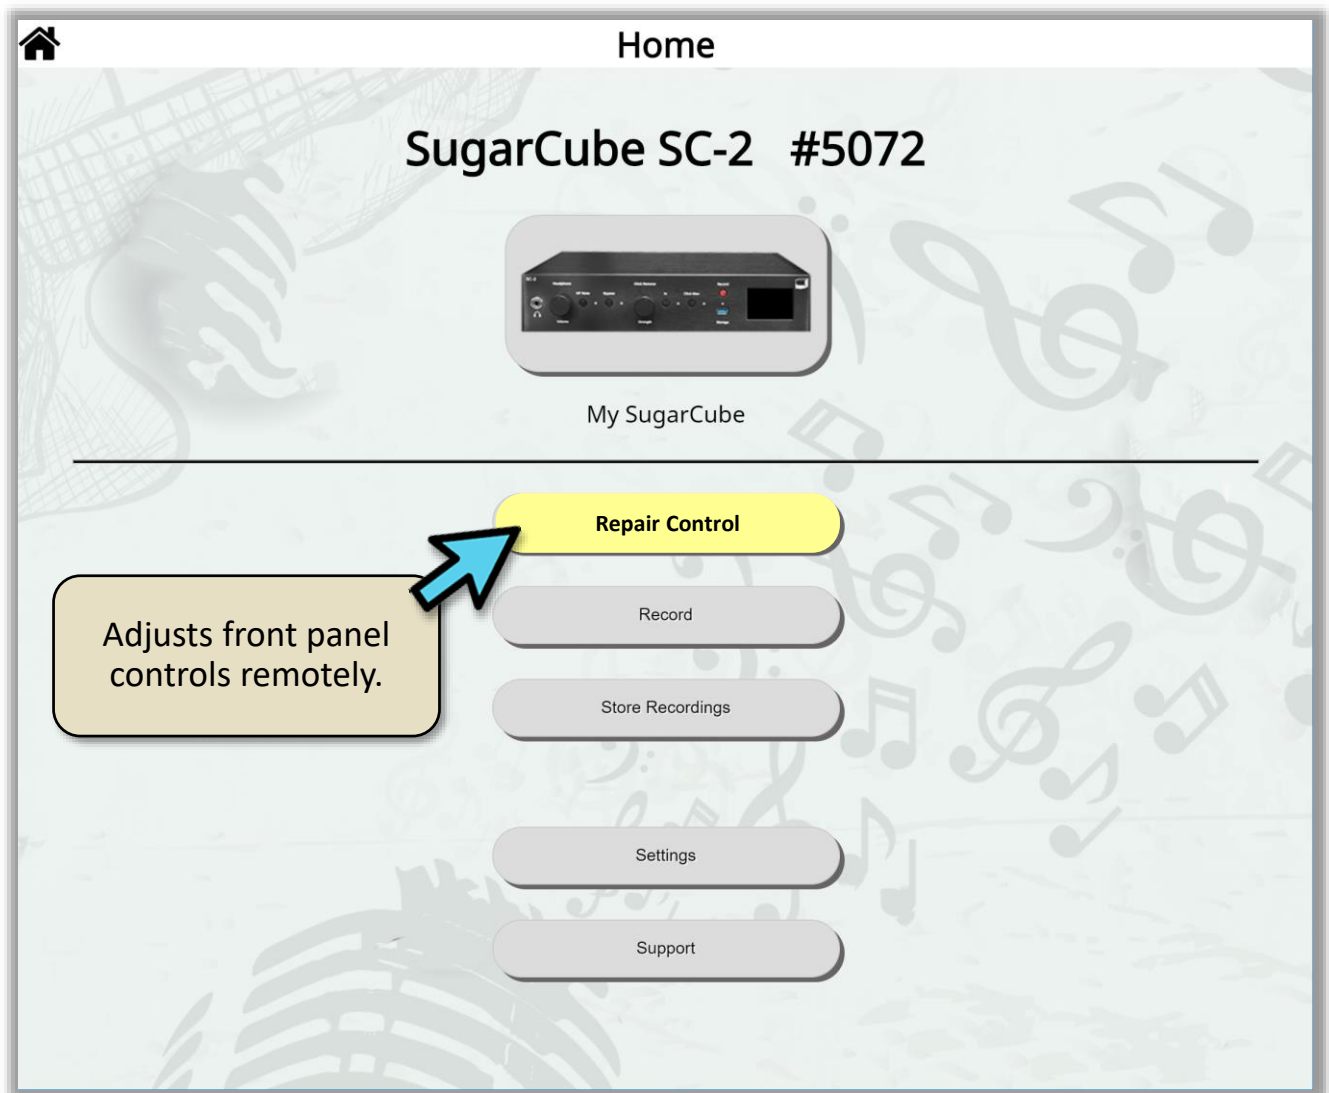

1.05 – SC-2 Main Menu

- The SC-2 beta 2.0 menu has new functions grouped differently on this browser interface.
- Note 'Record' is where you initiate new recording, as well as edit or add information to existing recordings on both the album and track level.
- You can trim the *In* and *Out* points of each track in 'Record' view.
- 'Store Recordings' is where you choose what to save, where to save it, and in what format.

1.06 – SC-2 Main Menu—Repair Control

1.07 – SC-2 Main Menu—Repair Control

'Click Mon' button.

1.08 – SC-2 Main Menu—Settings

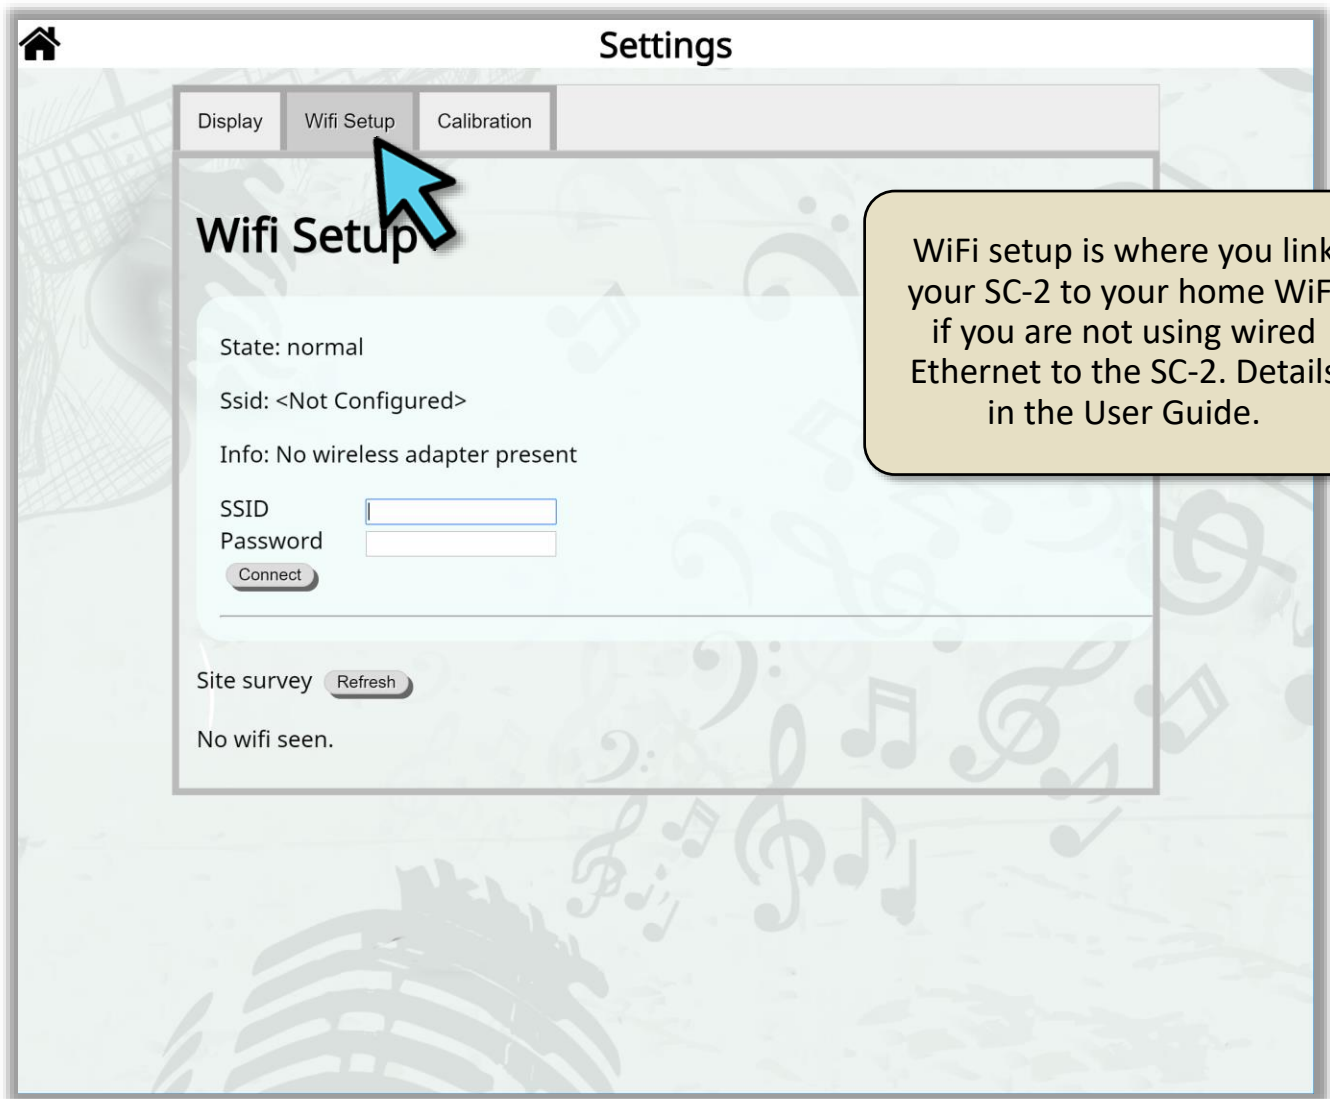

1.09 – Settings Menu—Display

- The selections determine what is displayed on the LCD screen on the front panel of the SC-2.

1.10 – Settings Menu—WiFi Setup

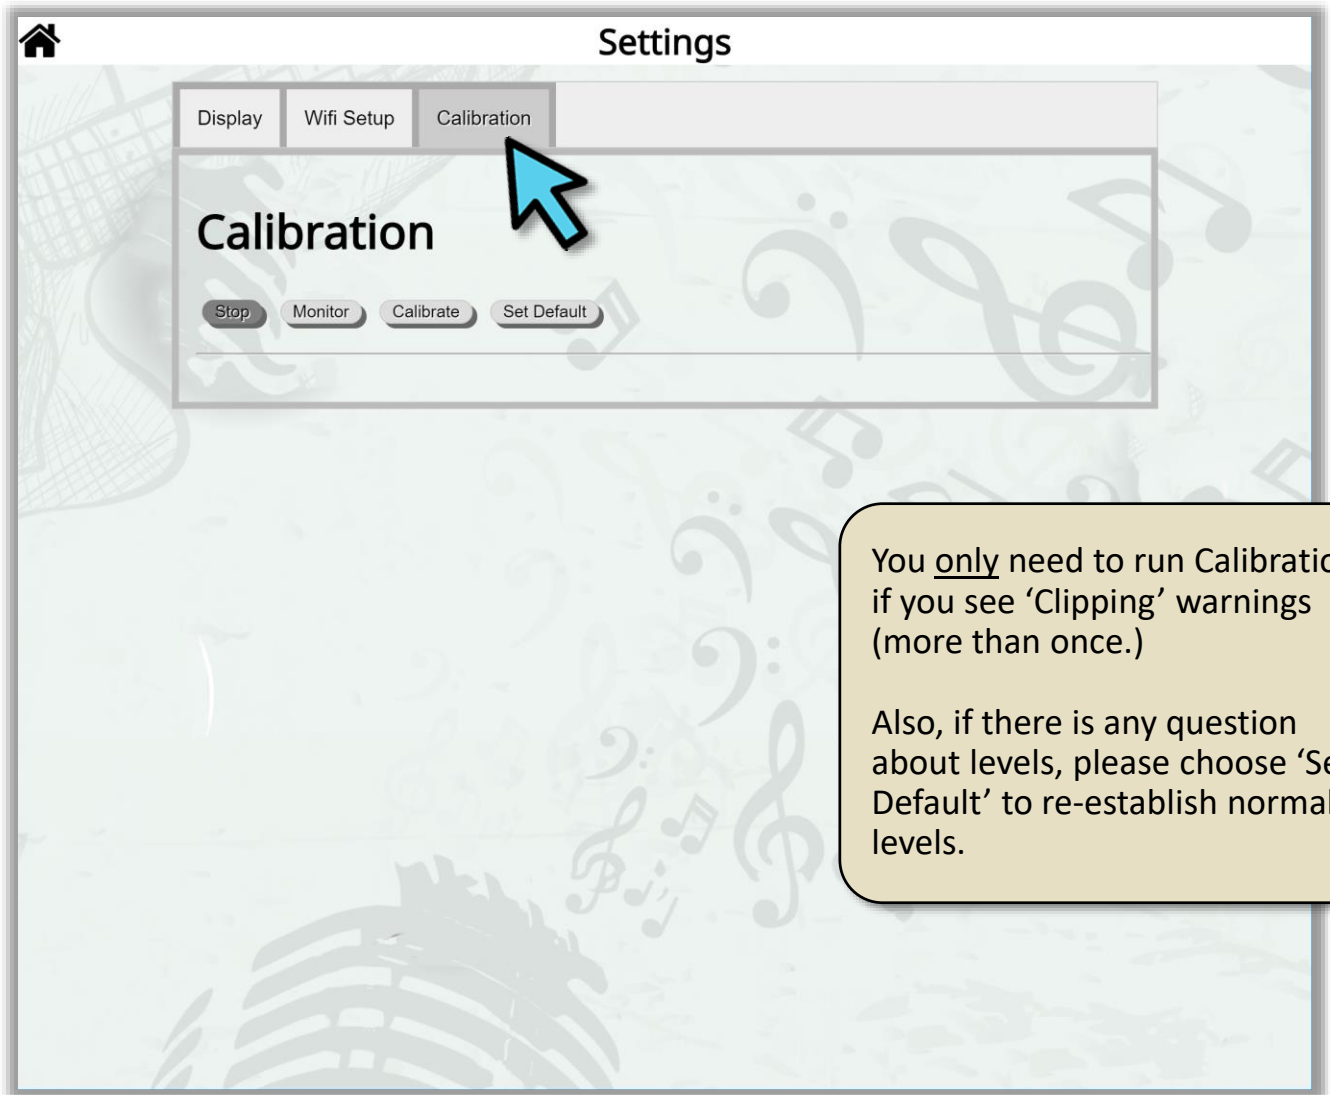

The screenshot shows the 'Settings' application with three tabs: 'Display', 'Wifi Setup', and 'Calibration'. The 'Wifi Setup' tab is active, showing the following information:

- State: normal
- Ssid: <Not Configured>
- Info: No wireless adapter present
- SSID:
- Password:
-
- Site survey
- No wifi seen.

A callout box on the right states: "WiFi setup is where you link your SC-2 to your home WiFi if you are not using wired Ethernet to the SC-2. Details in the User Guide."

- Details on 'WiFi' set-up can be found in the SC-2 User Guide.

1.11 – Setting Menu—Calibration

You only need to run Calibration if you see 'Clipping' warnings (more than once.)

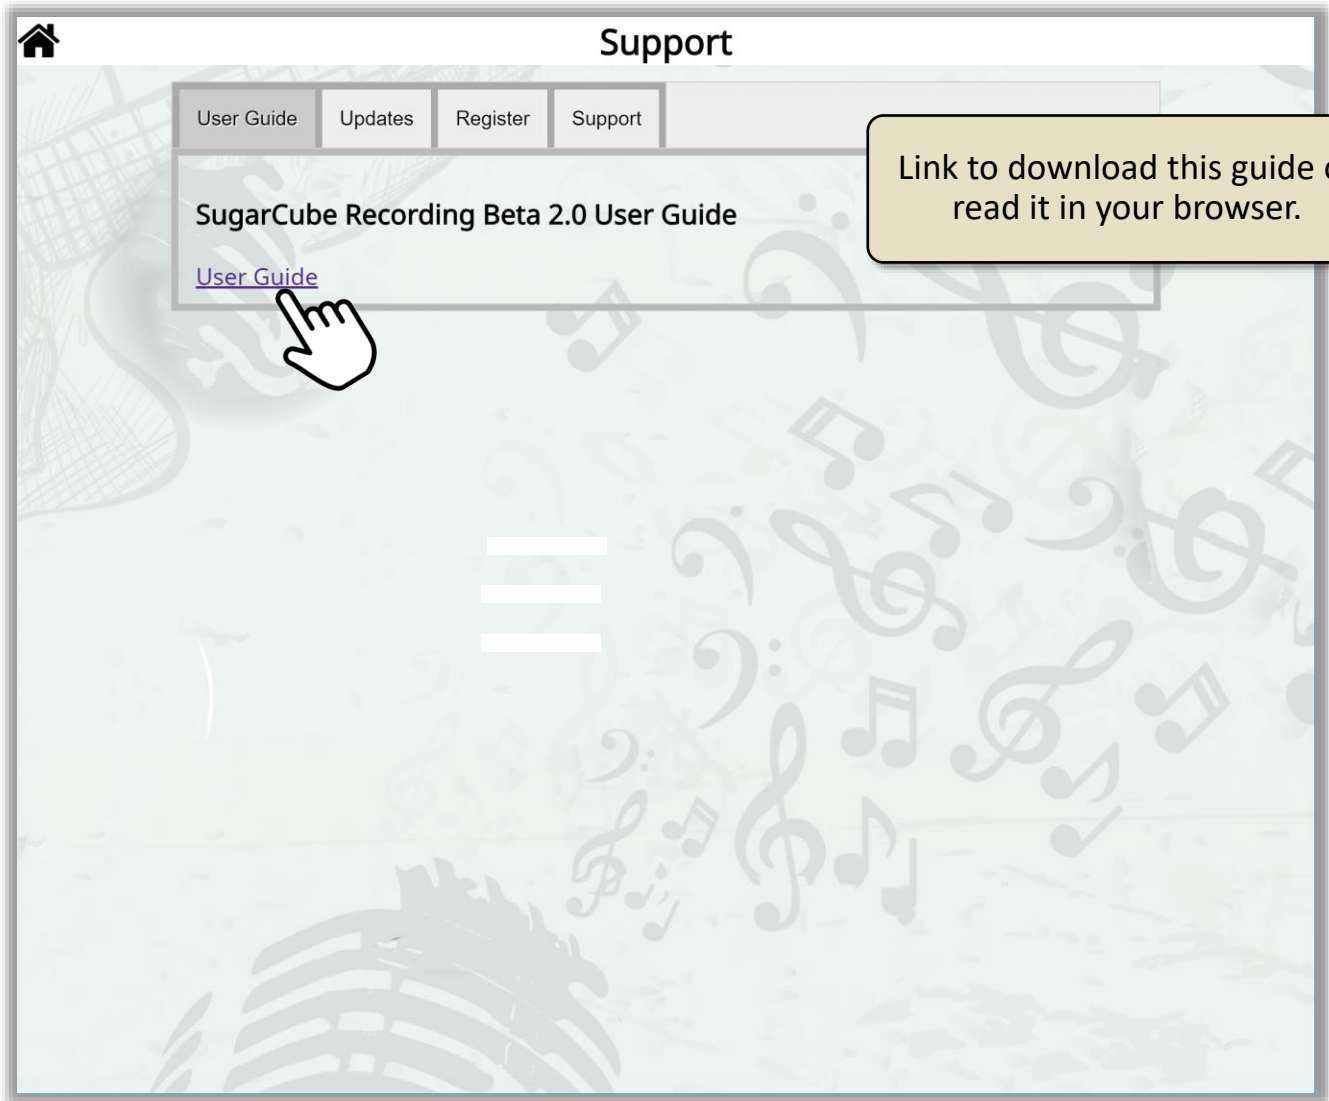

Also, if there is any question about levels, please choose 'Set Default' to re-establish normal levels.

- Details on calibration functions can be found in the SC-2 User Guide.

Check your current version of software or check if one is pending.

1.15 – Setting Menu—Registration

The screenshot shows a web interface for SugarCube. At the top left is a home icon. The main header is 'Support'. Below it is a navigation bar with tabs: 'User Guide', 'Updates', 'Register', and 'Support'. The 'Register' tab is active. The main content area is titled 'Register your SugarCube:' and contains a bulleted list of registration benefits. To the right of this list is a yellow callout box. Below the list is a section for 'Newsletters are in English.' followed by a 'Contact Information' form with fields for First Name, Last Name, Email, Country, Date Purchased, and Retailer. Below that is a 'Contact me about' section with three checkboxes. A 'Save' button is at the bottom right of the form area.

2.0 SC-2 – Record

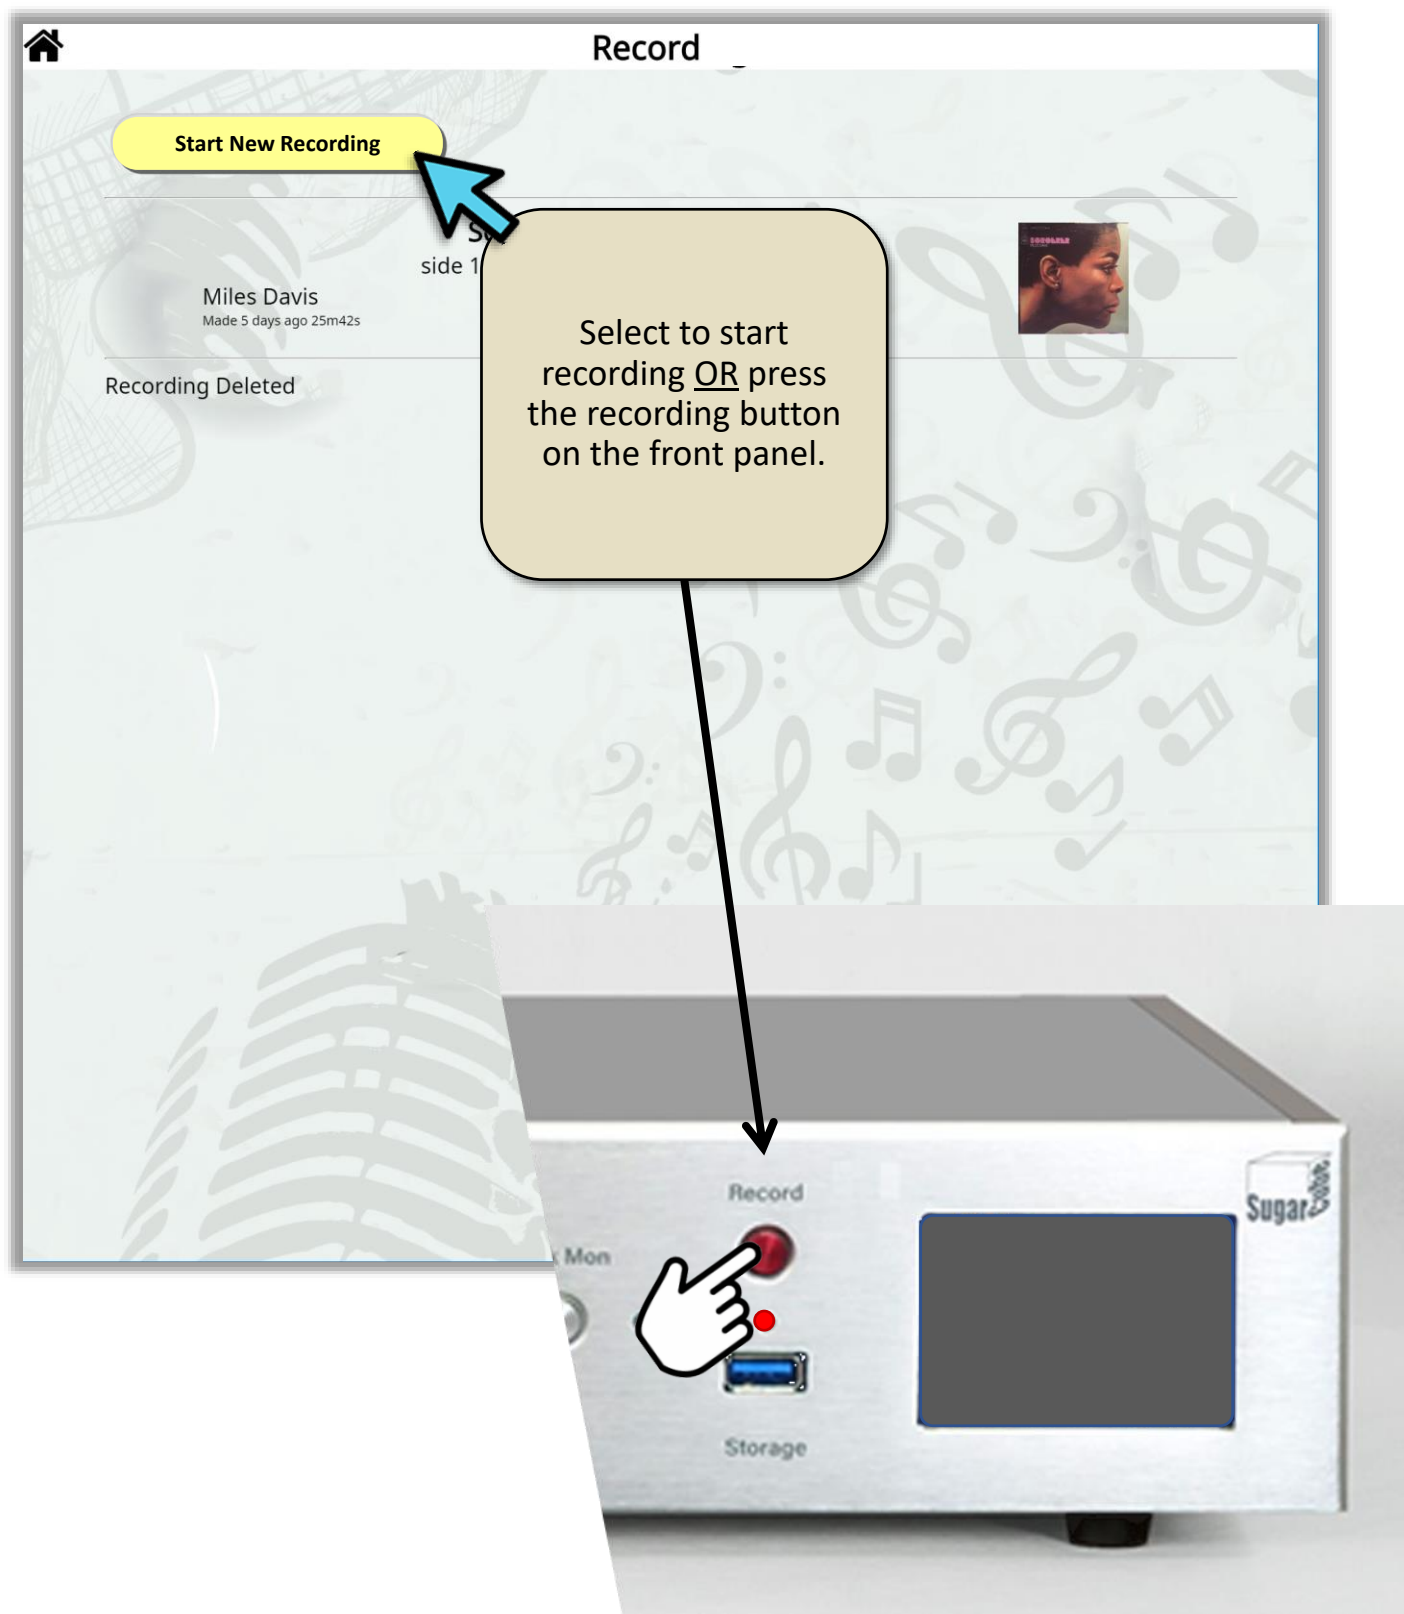

SugarCube SC-2 Beta 2.0 Recording Guide

2.01 – SC-2 Main Menu—Record

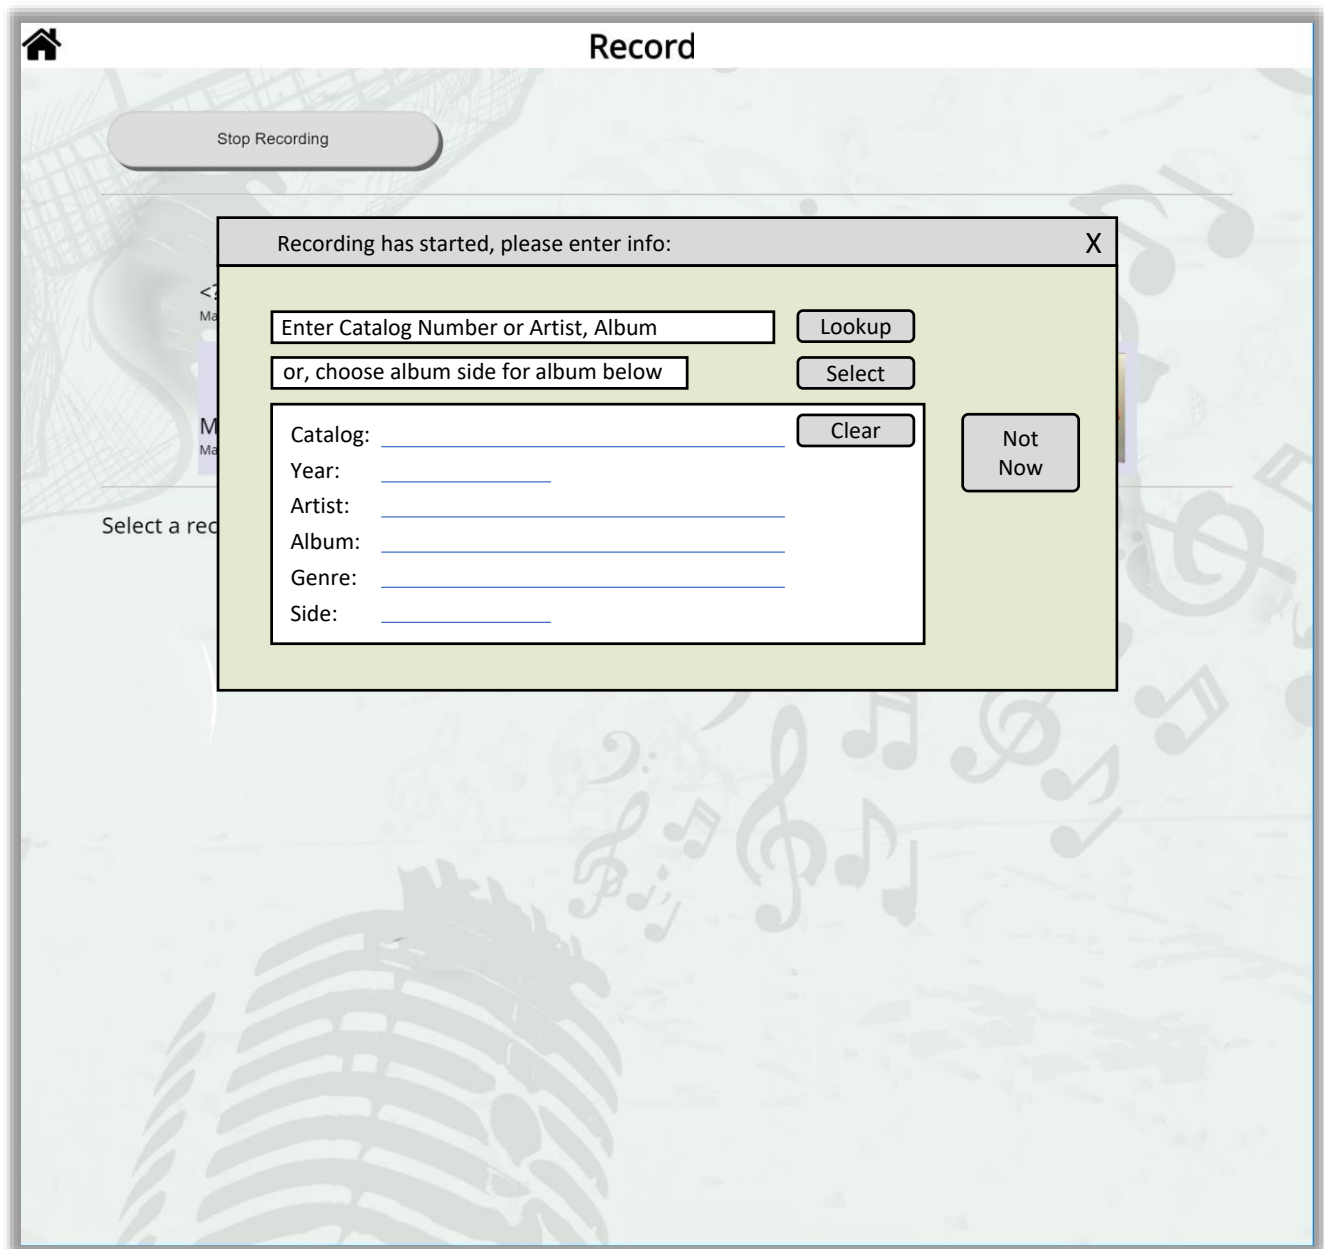

- The SC-2 beta menu has grouped functions differently.
- Note 'Record' is where you initial new recording as well as edit or add information on both the album and track level.
- You also can trim *In* and *Out* points of each track in this view.
- '*Store Recordings*' is where you choose what to save, where to save it, and in what format.

2.02 – SC-2 Record Function

2.03 – SC-2 Record Function

The screenshot shows the 'Record' window of the SugarCube SC-2 interface. At the top left is a home icon, and at the top center is the title 'Record'. Below the title is a 'Stop Recording' button. A modal dialog box is open in the center, titled 'Recording has started, please enter info:'. The dialog contains a text input field with the placeholder 'Enter Catalog Number or Artist, Album' and a 'Lookup' button. Below this is another text input field with the placeholder 'or, choose album side for album below' and a 'Select' button. To the right of these fields is a 'Clear' button. Below the input fields are five labeled text input fields: 'Catalog:', 'Year:', 'Artist:', 'Album:', 'Genre:', and 'Side:'. To the right of these fields is a 'Not Now' button. The background of the interface features a faint image of a microphone and musical notes.

- The SugarCube is now recording.
- A window pops up to get the catalog number of the album; you may instead enter the artist and/or album (example: “Miles Davis, Kind of Blue”)
- You can stop recording by clicking on the button above or by pressing the red button on the front panel of the SC-2.

2.05 – SC-2 Record Function

The screenshot shows the 'Record' window in the SugarCube application. At the top, there is a 'Stop Recording' button and the title 'Record'. Below this, a message states 'Recording has started, please enter info:'. The main form has a text input for 'APP 041' and a label 'or, choose album side for album below'. A 'Select' button is to the right. The form is divided into two sections. The top section is for 'Disco: Just A Little Lovin' (2008-01-29)' and has a 'Save' button. It lists tracks with their durations and side numbers: 'Just A Little Lovin', 5:20, A1; 'Anyone Who Had A Heart, 3:33, A2; 'You Don't Have To Say You Love Me, 4:11, A3; 'I Only Want To Be With You, 3:50, A4; 'The Look Of Love, 3:20, A5; 'Breakfast In Bed, 3:21, B1; 'Willie And Laura Mae Jones, 4:09, B2; 'I Don't Want To Hear It Anymore, 4:37, B3; 'Pretend, 3:07, B4; 'How Can I Be Sure, 3:34, B5. The bottom section is for 'Disco: Just A Little Lovin' (2012)' and also has a 'Save' button. It lists 'Side: 1', 'Catalog: APP 041', and 'By Shelby Lynne'. At the bottom of the window, it says 'Miles Davis', 'Recorded 15 days ago 24m31s', and 'Last save: 2019-08-17'. Three callout boxes with arrows provide instructions: the top box points to the 'Not Now' button and says 'You are free to do this step later, just click on 'Not Now'.'; the middle box points to the 'Save' button of the first section and says 'The first choice is usually the correct match. If so, click 'Save' to select this choice.'; the bottom box points to the scroll bar of the first section and says 'Additional releases can be found by scrolling down the list.'

2.08 – SC-2 Record Function

The screenshot shows the 'Record' window in the SugarCube Recording application. A modal dialog titled 'Recording has started, please enter info:' is open. It contains a text input field with the value '2', a 'Lookup' button, a 'Select' button, and a 'Clear' button. Below the input field, the following information is displayed:

Catalog:	APP 041
Year:	2018
Artist:	Shelby Lynn
Album:	Just a Little Lovin'

A 'Not Now' button is also present. A blue arrow points to the 'Select' button, and a black arrow points to the '2' in the input field. Below the modal, the background shows a list of recordings, including 'Kind Of Blue' by Miles Davis.

Again, the 'Lookup Album Info' window appears.

Since we are now recording side two, there is no need to reenter the catalog number, Just type a '2' in the album side field and click 'Select'.

The Pink Panther (Music From The Film Score)	Henry Mancini	side 1	LSP-2795	Last save: 2019-08-21	Delete Recording
Kind Of Blue	Miles Davis	side 2	CL 1355	Last save: 2019-08-17	Delete Recording

2.11 – Catalog Lookup

The screenshot shows the SugarCube Recording interface with a 'Record' tab selected. It displays a list of recordings. The first recording is 'Just A Little Lovin' by Shelby Lynne, side 2, catalog number B0009789-01. It is recorded 24 minutes ago and is currently updating the audio preview. The second recording is 'Just A Little Lovin' by Shelby Lynne, side 1, catalog number B0009789-01. It is recorded about 3 hours ago and is complete. Below this, a table lists the tracks for this recording:

Track	Title	Length
1	Just A Little Lovin'	4m30s
2	Anyone Who Had A Heart	4m30s
3	You Don't Have To Say You Love Me	4m20s
4	I Only Want To Be With You	3m51s

The third recording is 'The Pink Panther (Music From The Film Score)' by Henry Mancini, side 2, catalog number LSP-2795. It is recorded 3 days ago and was last saved on 2019-08-21. The fourth recording is 'The Pink Panther (Music From The Film Score)' by Henry Mancini, side 1, catalog number LSP-2795. It is recorded 3 days ago and was last saved on 2019-08-21. Each recording entry has a 'Delete Recording' button.

- This function is to correct or add to album information from the initial recording session where you entered the catalog number (or artist and/or album.)
- These steps are not required and are here for your convenience.

2.12 – Catalog Lookup After Recording Completes

The screenshot shows the SugarCube Recording interface in the 'Recor' tab. The 'Album Information' section is active, displaying a form for entering album details. A callout box points to the 'Lookup Album Info' field, which contains the text 'APP 041'. The callout box contains the text: 'Use this field to enter the catalog number from the LP jacket.'

2.14 – Catalog Lookup

- Once you click on 'Select', you will be prompted to okay the update of three elements: (1) the album information; (2) the album artwork; and (3) the track information.
- So, if the album information is already correct, you may choose to click 'Cancel' and it will not be updated but choosing 'Cancel' will NOT stop the confirmation process which will then move on to ask if you want to change the album artwork.
- If the album artwork is already correct you may choose to click 'Cancel' and the album artwork will not be updated. However, choosing 'Cancel' will NOT stop the confirmation process which will then move on to ask if you want to change the track information.
- After it asks to confirm or cancel 'Track Information,' it is done.

2.15 – Catalog Lookup

- If the album artwork is already correct you may choose to click 'Cancel' and the album artwork will not be updated. However, choosing 'Cancel' will NOT stop to process which will then move on to ask if you want to change the track information.
- The artwork is incorrect in this example, so do go ahead and click on 'OK'.

2.16 – Catalog Lookup

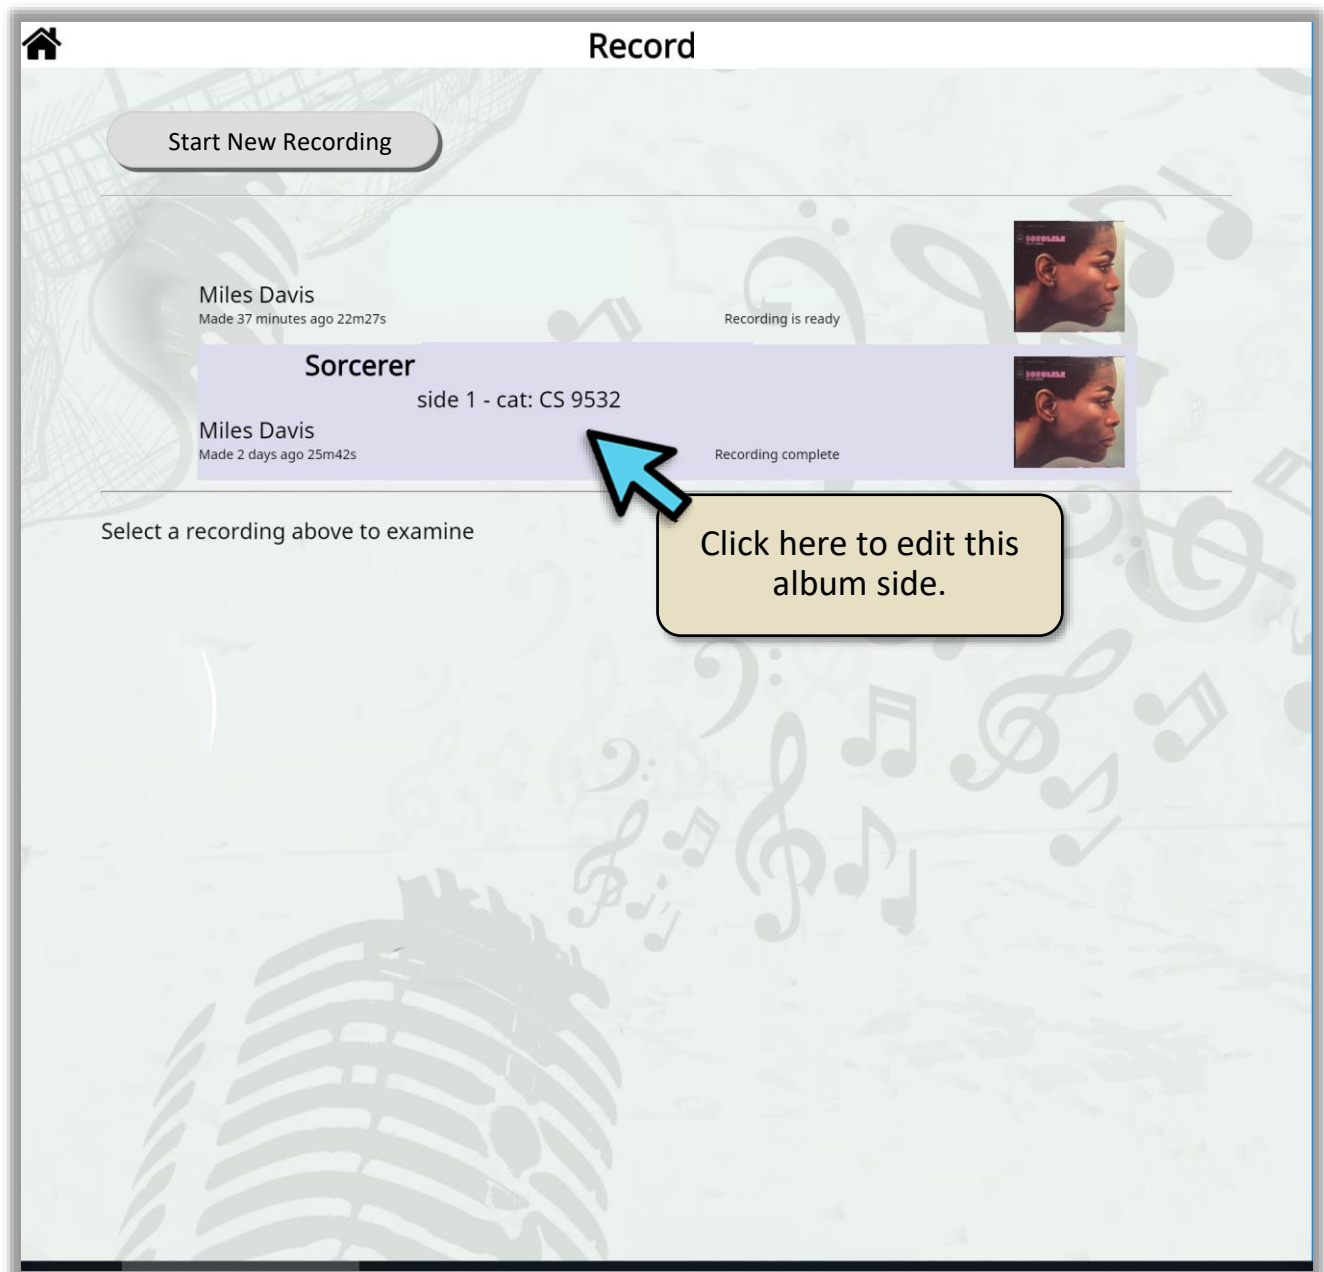

- If the track information is already correct you may choose to click 'Cancel' and it will not be updated.
- Otherwise, click 'OK' and that concludes the three confirmation steps.
- More often than not, the track information is what is most in need of updating, and so you will most often confirm this step.

3.0 SC-2 – Editing Tracks

3.07 – Editing Tracks

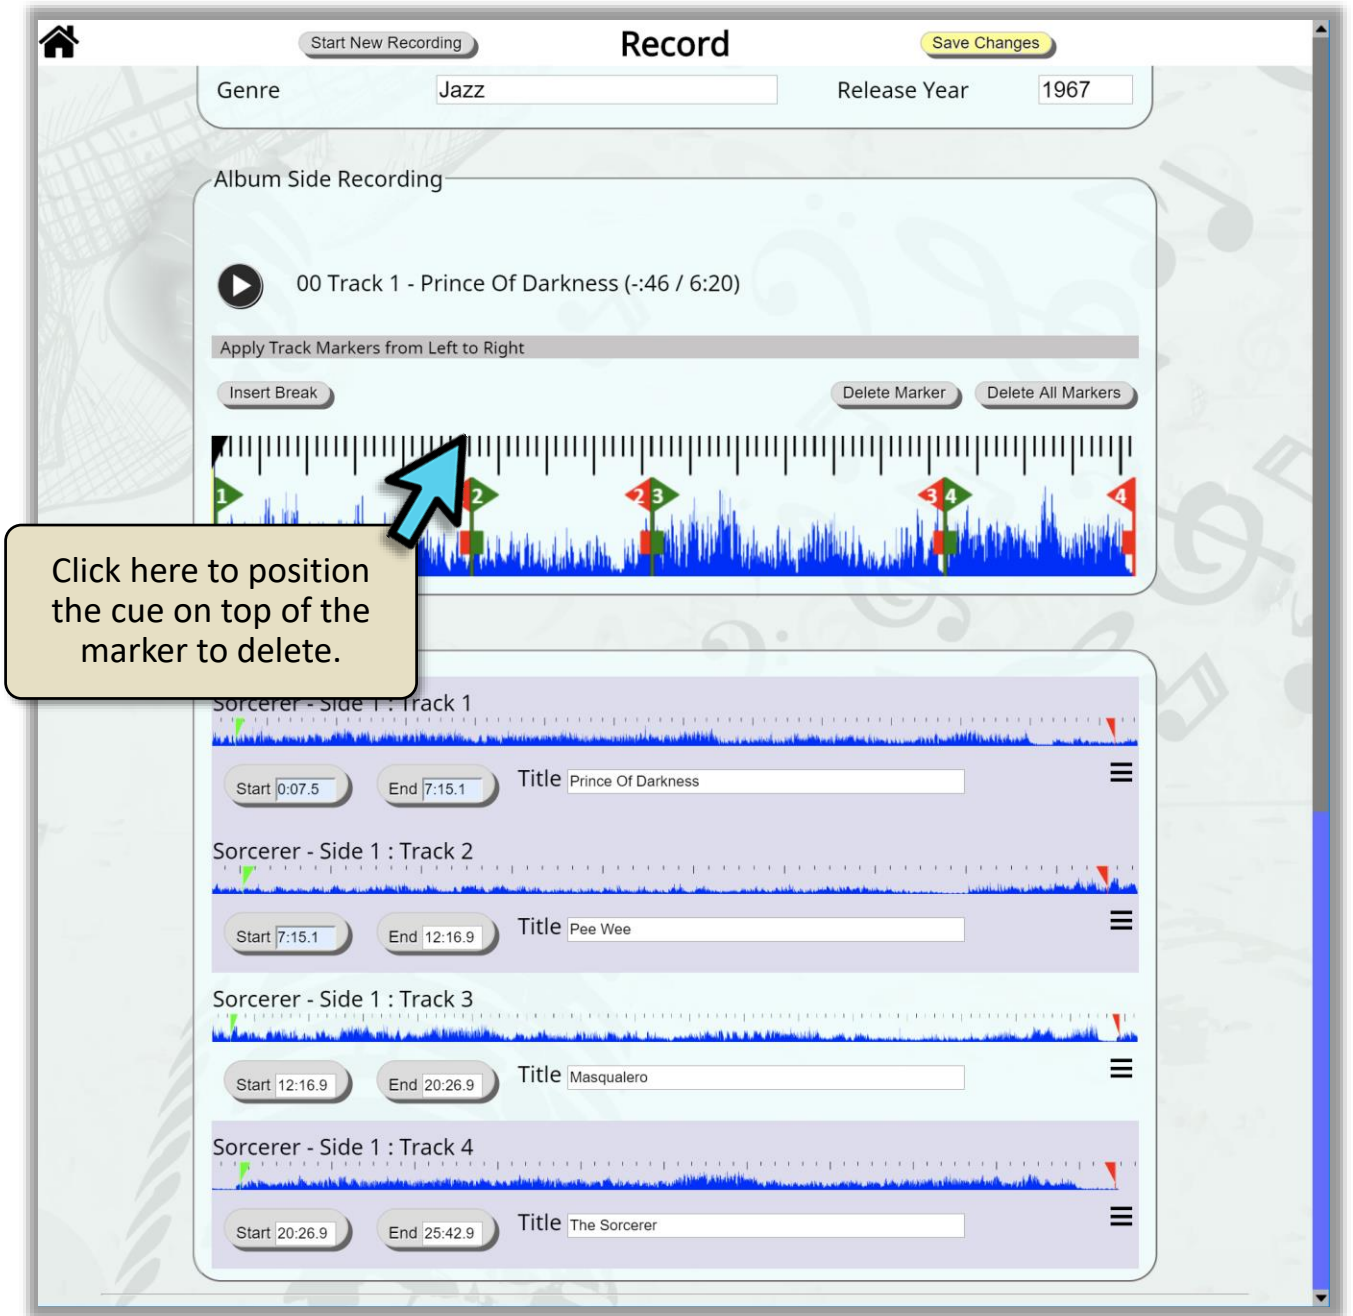

The screenshot shows the SugarCube Recording interface. At the top, there's a 'Record' button and a 'Save Changes' button. Below this, there's a 'Genre' dropdown set to 'Jazz' and a 'Release' dropdown set to '1967'. The main area is titled 'Album Side Recording' and shows a track list. The first track is '00 Track 1 - Prince Of Darkness (-:46 / 6:20)'. Below the track list, there's a waveform display with several markers (flags) placed along it. Annotations with arrows point to various parts of the interface:

- An arrow points to the 'Save Changes' button with the text: "If you have made any changes to text or times, you need to select 'Save Changes' to keep your work."
- An arrow points to the play button on the left of the first track with the text: "You can play the album side here."
- An arrow points to the markers on the waveform with the text: "You can grab up here to move each flag separately."
- An arrow points to the start/end time fields of the first track with the text: "OR, you can grab here to move the end/start together."

- Here you can add or delete tracks.
- You can move markers (flags) together or individually.
- Be sure to select 'Save Changes' after editing any text or adjusting any start or end times of the tracks.

3.08 – Editing Tracks

The screenshot displays the 'Record' interface in SugarCube. At the top, there are buttons for 'Start New Recording' and 'Save Changes'. Below these, the 'Genre' is set to 'Jazz' and the 'Release Year' is '1967'. The main section is titled 'Album Side Recording' and shows a track list. The first track is '00 Track 1 - Prince Of Darkness (-:46 / 6:20)'. Below the track list, there is a timeline with markers. A callout box points to a marker on the timeline, stating: 'Click here to position the cue on top of the marker to delete.' The track list includes:

- Sorcerer - Side 1 : Track 1 (Start: 0:07.5, End: 7:15.1, Title: Prince Of Darkness)
- Sorcerer - Side 1 : Track 2 (Start: 7:15.1, End: 12:16.9, Title: Pee Wee)
- Sorcerer - Side 1 : Track 3 (Start: 12:16.9, End: 20:26.9, Title: Masqualero)
- Sorcerer - Side 1 : Track 4 (Start: 20:26.9, End: 25:42.9, Title: The Sorcerer)

- Here you can add or delete tracks.
- You can move markers (flags) together or individually.
- Be sure to select 'Save Changes' after editing any text or adjusting any start or end times of the tracks.

- Select (click on) the word 'Start' and an edit window will open (next page).
- It is usually best to begin with 'Start'.
- Note: you can also just directly edit the numbers in the white field of 'Start' or 'End' but that is usually not a good idea since you will want to hear the results of your change.

3.10 – Editing Tracks

The screenshot displays the SugarCube Recording interface. At the top, there are buttons for 'Start New Recording', 'Record', and 'Save Changes'. Below this is the 'Album Side Recording' section, which includes a play button, '00 Trac', and 'Limbo'. A progress bar shows 'Apply Track Markers from Left to Right'. Below the progress bar are buttons for 'Insert Break', 'Delete Marker', and 'Delete All Markers'. The main area shows a list of tracks with their start and end times. The first track is 'Sorcerer - Side 1 : Track 1' with a start time of 0:07.5 and an end time of 7:15.1. The second track is 'Sorcerer - Side 1 : Track 2' with a start time of 7:15.1 and an end time of 12:16.3. The third track is 'Sorcerer - Side 1 : Track 3' with a start time of 12:16.9 and an end time of 20:26.9. The fourth track is 'Sorcerer - Side 1 : Track 4'. The interface also shows a 'Current Position: 02' and a '1:00' time marker. The bottom section contains playback controls: a double left arrow (Rewind 60 Seconds), a play button (Play Continuously), a power button (Play Loop 10 seconds from start (or to end when editing end.)), a double right arrow (Fast Forward 60 Seconds), a 'Next Marker' button, 'Zoom-' and 'Zoom+' buttons (Zoom audio track display in & out.), and a 'Close' button (Close Track Window). Callouts point to various features: 'Marker time in seconds (can be directly edited.)' points to the time values; 'Full track audio envelope.' points to the blue waveform; 'Hamburger Menu' points to the three-line icon; 'Cue Marker' points to a green triangle; 'Start of Track Marker' points to a green square; 'Zoom audio track display in & out.' points to the zoom buttons; and 'Close Track Window' points to the close button.

Jump from Start to End to go track by track.

3.11 – Editing Tracks

The screenshot displays the SugarCube Recording interface during a recording session. At the top, there are buttons for "Start New Recording", "Record", and "Save Changes". Below these, the "Genre" is set to "Jazz" and the "Release Year" is "1967". The "Album Side Recording" is "Vonetta".

The main track list shows "00 Track 1 - Prince Of Darkness (-:46 / 6:20)". Below the track list, there are buttons for "Apply Track Markers from Left to Right", "Insert Break", "Delete Marker", and "Delete All Markers".

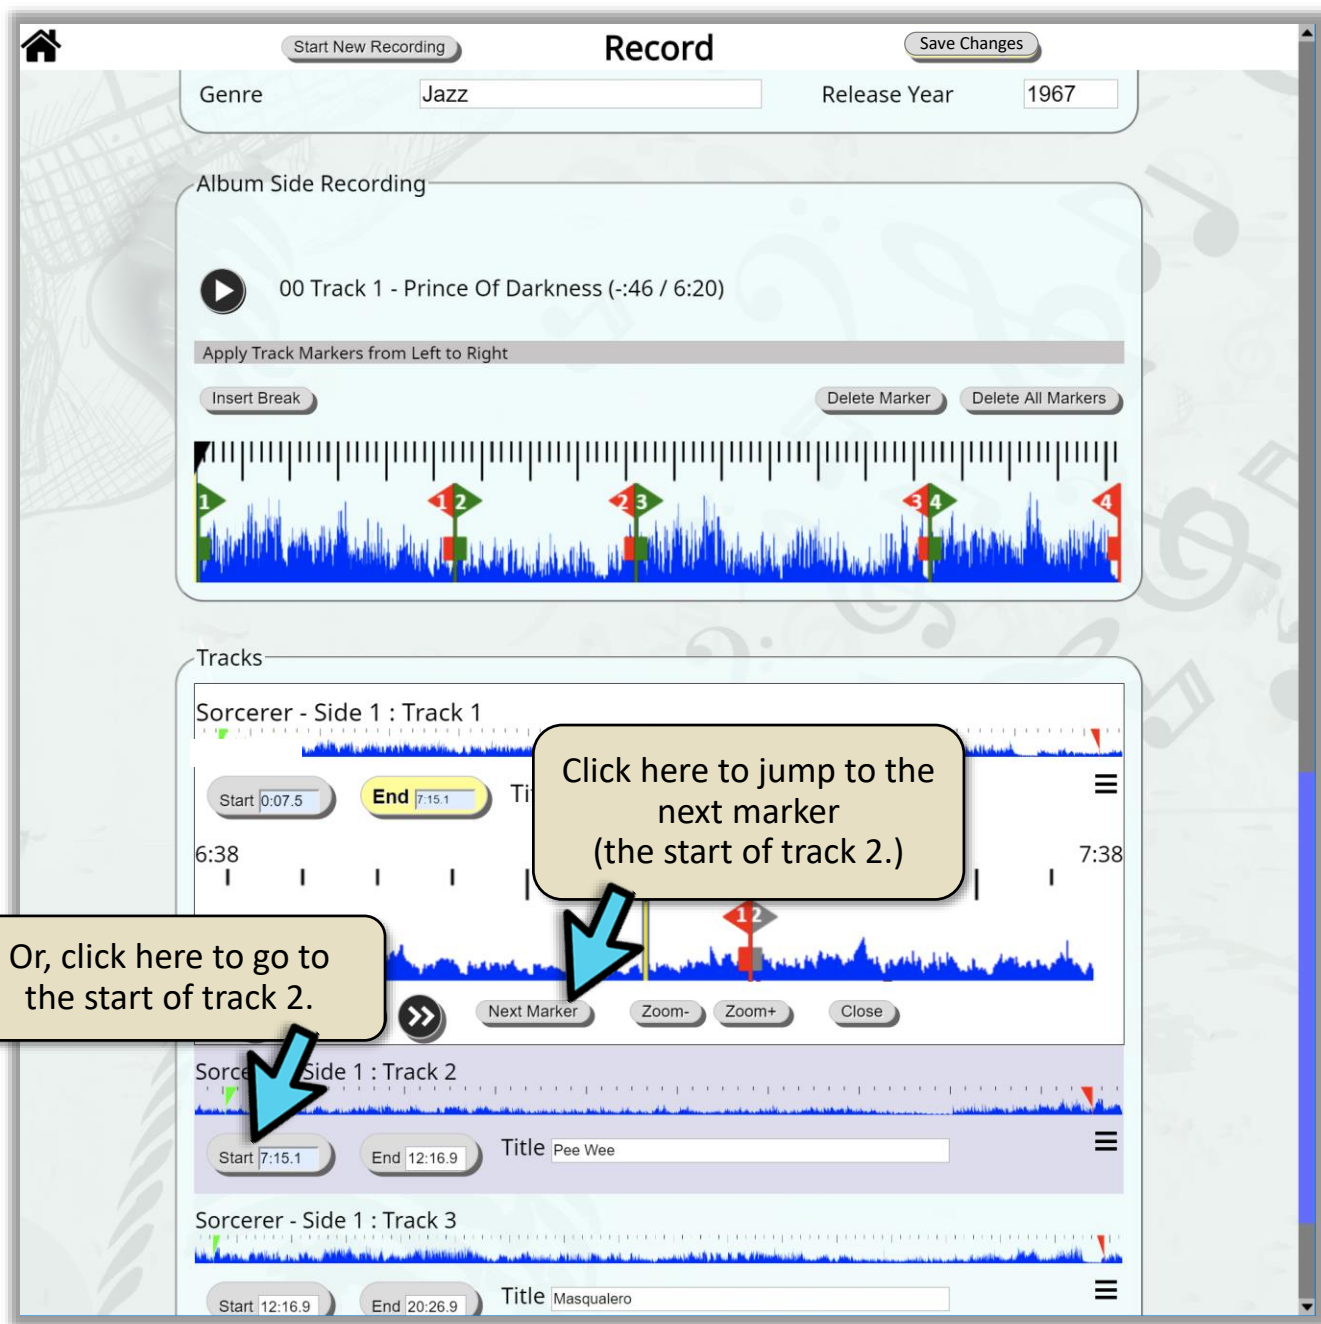

The waveform display shows a blue waveform with several markers. A callout box points to the "End" marker of the first track, stating: "Click here to edit the end of the track." Another callout box points to the "End of Track Marker" (a red triangle), stating: "End of Track Marker".

The "Tracks" section shows three tracks:

- Sorcerer - Side 1 : Track 1**: Start 0:07.5, End 7:15.1, Title Prince Of Darkness. The current position is 7:08.
- Sorcerer - Side 1 : Track 2**: Start 7:15.1, End 12:16.9, Title Pee Wee.
- Sorcerer - Side 1 : Track 3**: Start 12:16.9, End 20:26.9, Title Masqualero.

At the bottom, there are playback controls: "Next Marker", "Zoom-", "Zoom+", and "Close".

3.12 – Editing Tracks

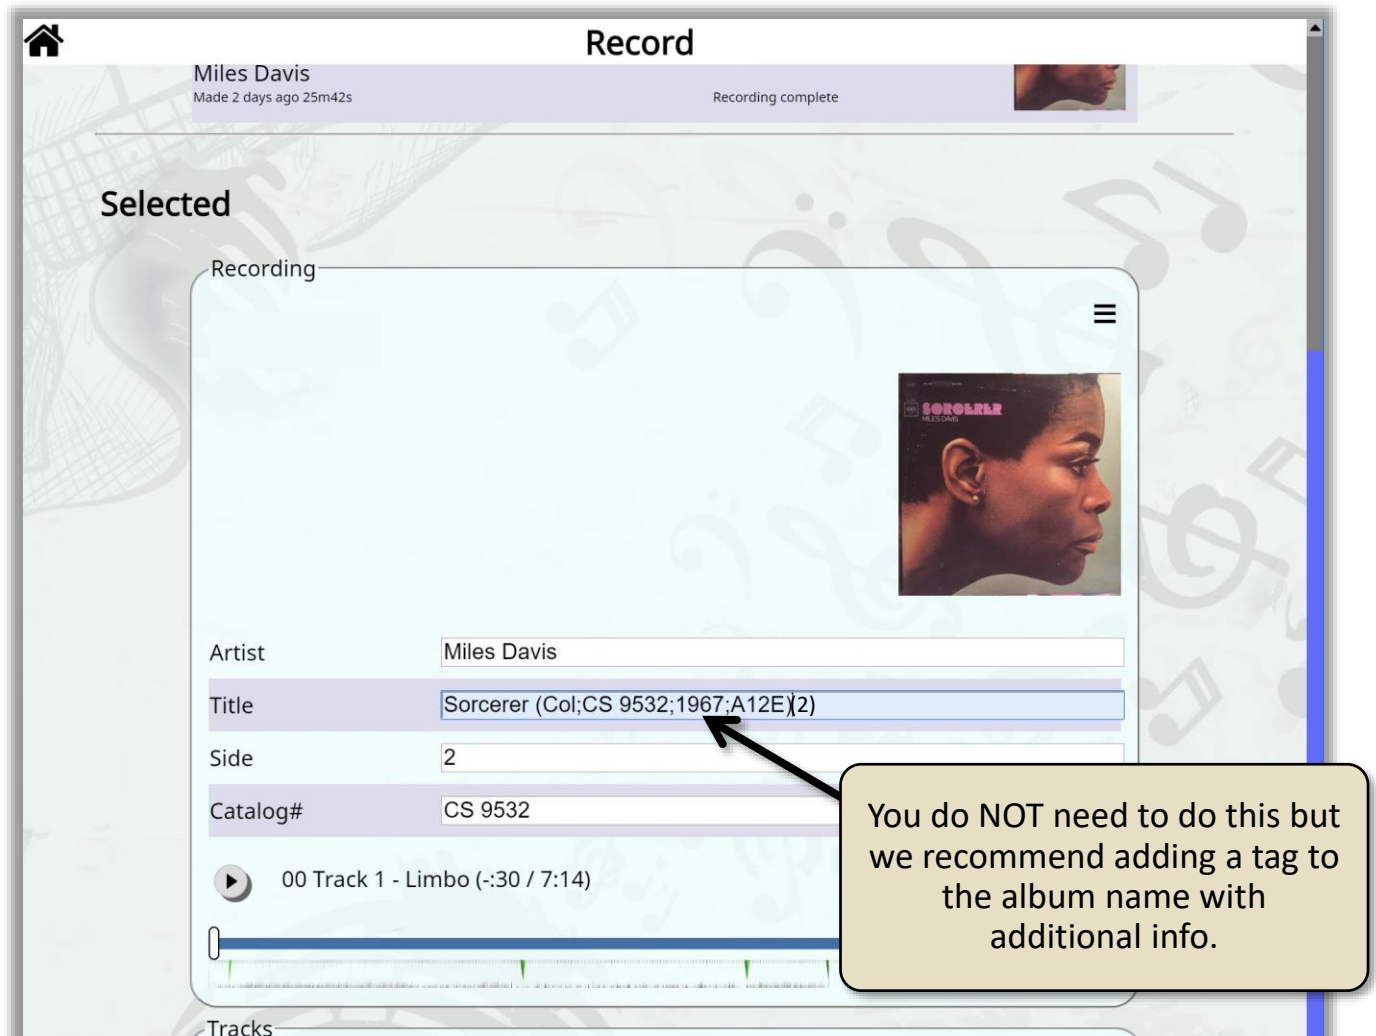

The screenshot displays the 'Record' interface with the following elements:

- Top Bar:** Home icon, 'Start New Recording' button, 'Record' title, and 'Save Changes' button.
- Form Fields:** 'Genre' set to 'Jazz' and 'Release Year' set to '1967'.
- Album Side Recording Section:**
 - Play button and text: '00 Track 1 - Prince Of Darkness (-:46 / 6:20)'.
 - Label: 'Apply Track Markers from Left to Right'.
 - Buttons: 'Insert Break', 'Delete Marker', and 'Delete All Markers'.
 - Waveform with markers 1, 2, 3, and 4.
- Tracks Section:**
 - Track 1:** 'Sorcerer - Side 1 : Track 1'. Waveform with markers. A callout box points to marker 2 with the text: 'Click here to jump to the next marker (the start of track 2.)'. Below the waveform are buttons: '>>', 'Next Marker', 'Zoom-', 'Zoom+', and 'Close'.
 - Track 2:** 'Sorcerer - Side 1 : Track 2'. Waveform with markers. A callout box points to the start of the track with the text: 'Or, click here to go to the start of track 2.'.
 - Track 3:** 'Sorcerer - Side 1 : Track 3'. Waveform with markers.

- Note: clicking on 'Next Marker' in any track will move you along through the album side from the current marker to the next marker.

Title: Sorcerer (Col;CS 9532;1967;A12E)(2)

Side: 2

Catalog#: CS 9532

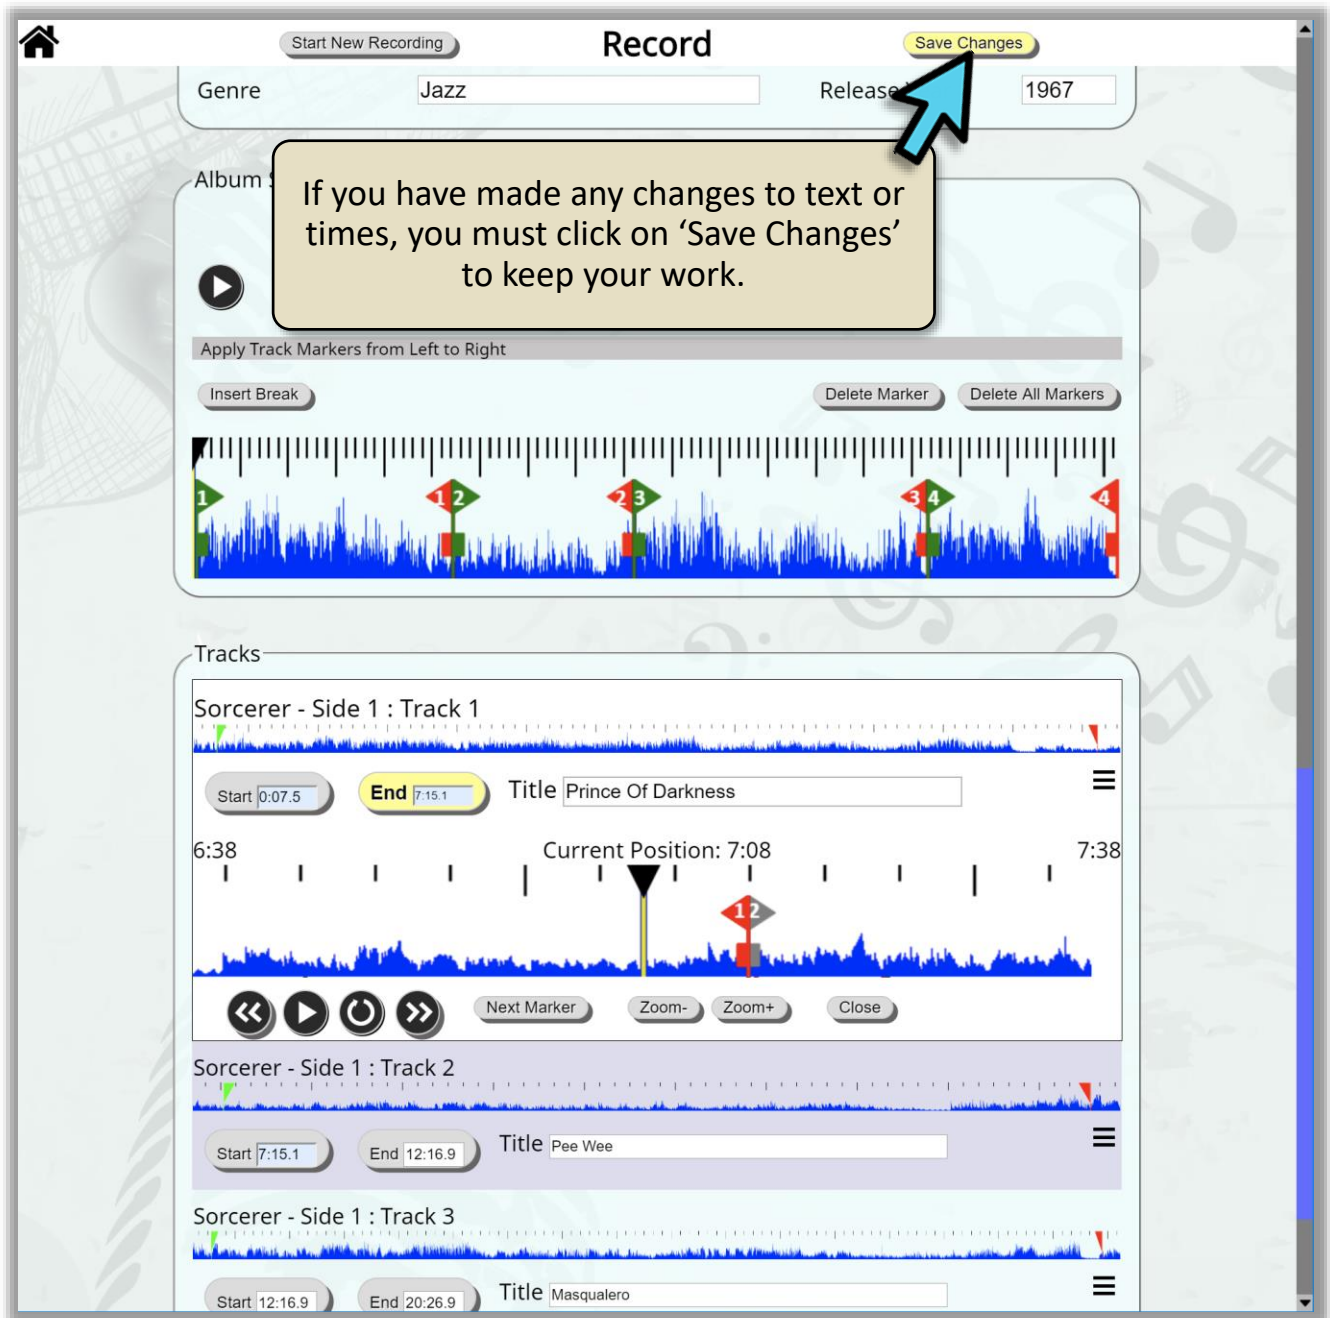

00 Track 1 - Limbo (-:30 / 7:14)

Tracks

You do NOT need to do this but we recommend adding a tag to the album name with additional info.

- It is helpful as your collection grows to have the additional information as part of the album name. There are no standard tags for this information.
- In this example, we added, in parentheses, “**(Col;**” for record label “Columbia”.
- “(Col; **CS 9532**” for the catalog number.
- “(Col; CS 9532; **1967**” for the release date.
- “(Col; CS 9532; 1967; **A12E)**” in our case A=AMG turntable, 12 is the arm length, and E is for our Etna cartridge; the “**(2)**” means side 2.
- NOTE: you cannot use symbols such as / ? * that are incompatible with your music server. Keep it simple using just () - ;
- This is just a suggestion for making your own tag system. Your archive will last for decades, down the road, you will be happy you took the time.

Start 12:16.9 End 20:26.9 Title Masqualero

- *Once* again, please do not forget to select *Save Changes* after you complete your editing of this album side or they will be lost.
- If you have made no changes, the *Save Changes* button will be dark and there is no need to select it.

3.15 – Editing Tracks

The screenshot shows the SugarCube Recording interface. At the top, there's a 'Record' button and a 'Save Changes' button. Below them, a track is displayed: '00 Track 1 - Waltz (Allegretto) (-:01 / 2:25)'. A waveform is shown with markers. Below the waveform, there's a section for 'Tracks' listing several tracks from 'Faust Ballet Music / Carmen Suite - Side 1'. Each track has a start and end time and a title. A callout box points to the waveform, stating: 'This shows the entire album side and where the tracks breaks are currently set.'

Track	Start	End	Title
00 Track 1 - Waltz (Allegretto)	0:01	2:26	Waltz (Allegretto)
Track 2	2:26	6:03	Ensemble(Adagio)
Track 3	6:03	7:34	Dance Of The Nubians
Track 4	7:34	9:02	Cleopatra's Dance
Track 5	9:02	11:26	Dance Of The Trojan Maidens
Track 6			

- The track names and track times are incorrect (just as you would expect with a mis-identified album.)
- However, sometimes the track names are close or even largely correct but the times are off.
- Whatever the case, it is simple to correct the entire album in just a few steps.

 00 Track 1 - Waltz (Allegretto) (-:01 / 2:25)

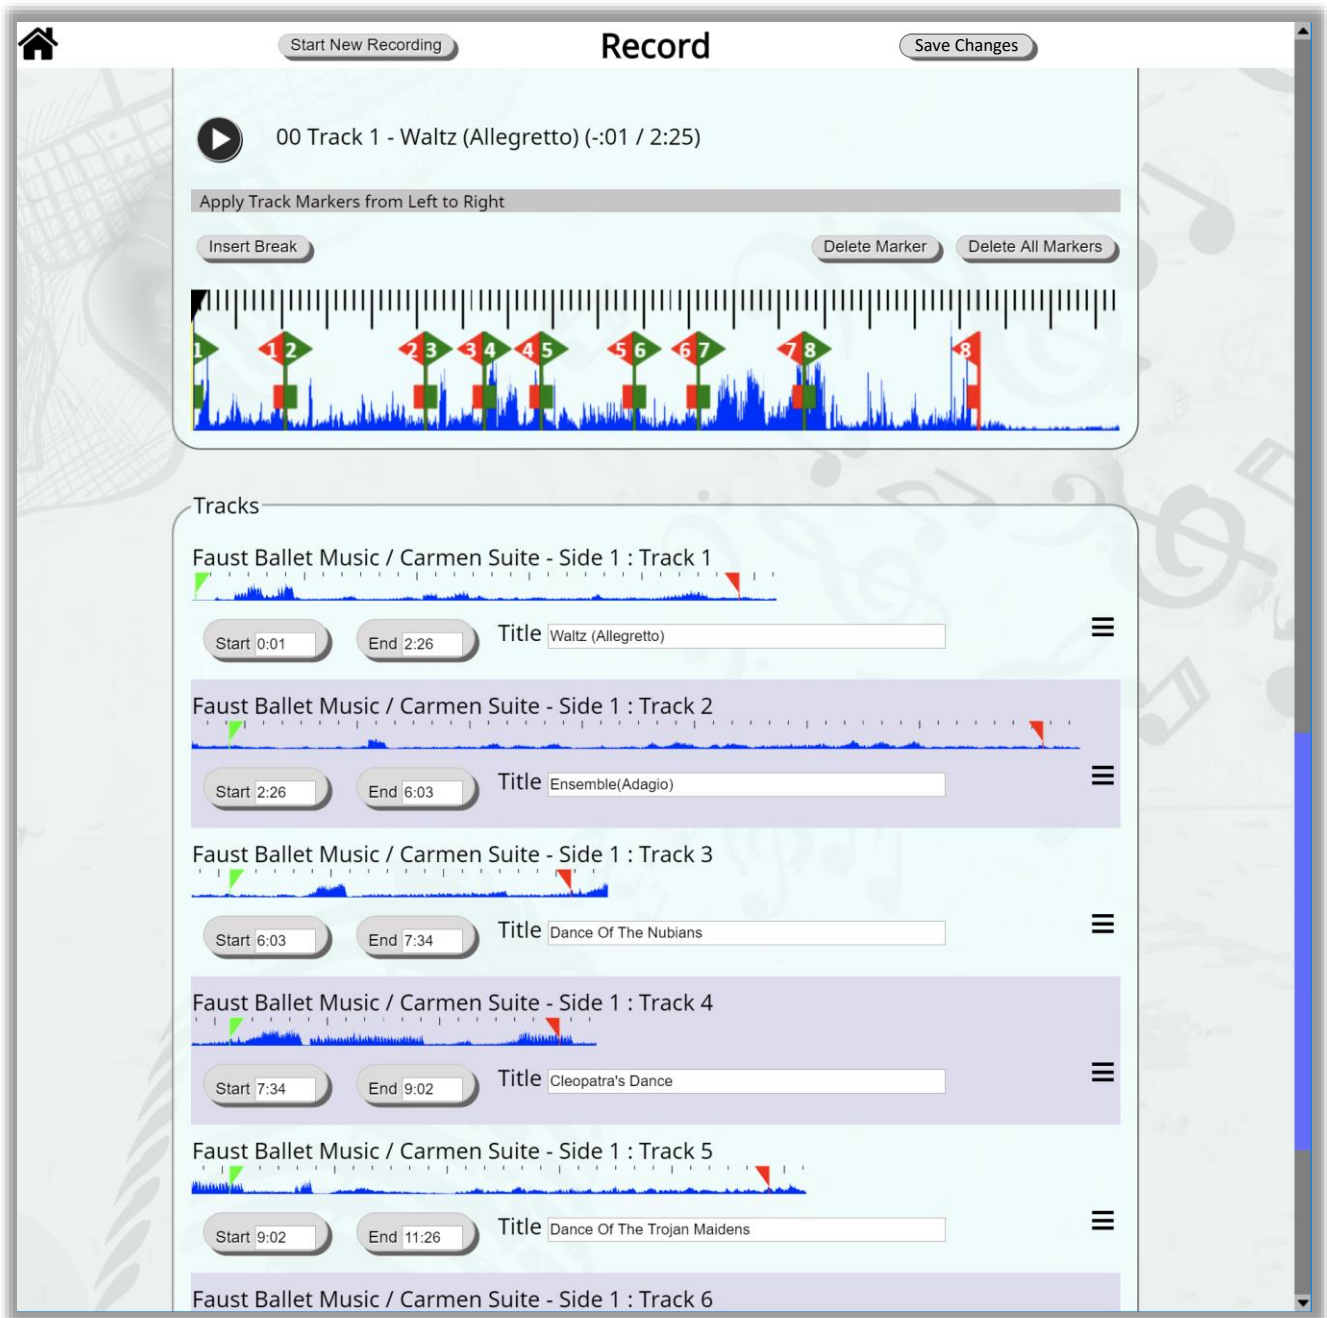

Apply Track Markers from Left to Right

Insert Break Delete Marker Delete All Markers

- Now we see the correct information in place.
- The track breaks are largely in the right place but do keep in mind that most turntables are accurate to, at best plus or minus 0.5%.
- So, by the end of the album, the times could be off by as much as +/-10 seconds.

3.17 – Editing Tracks

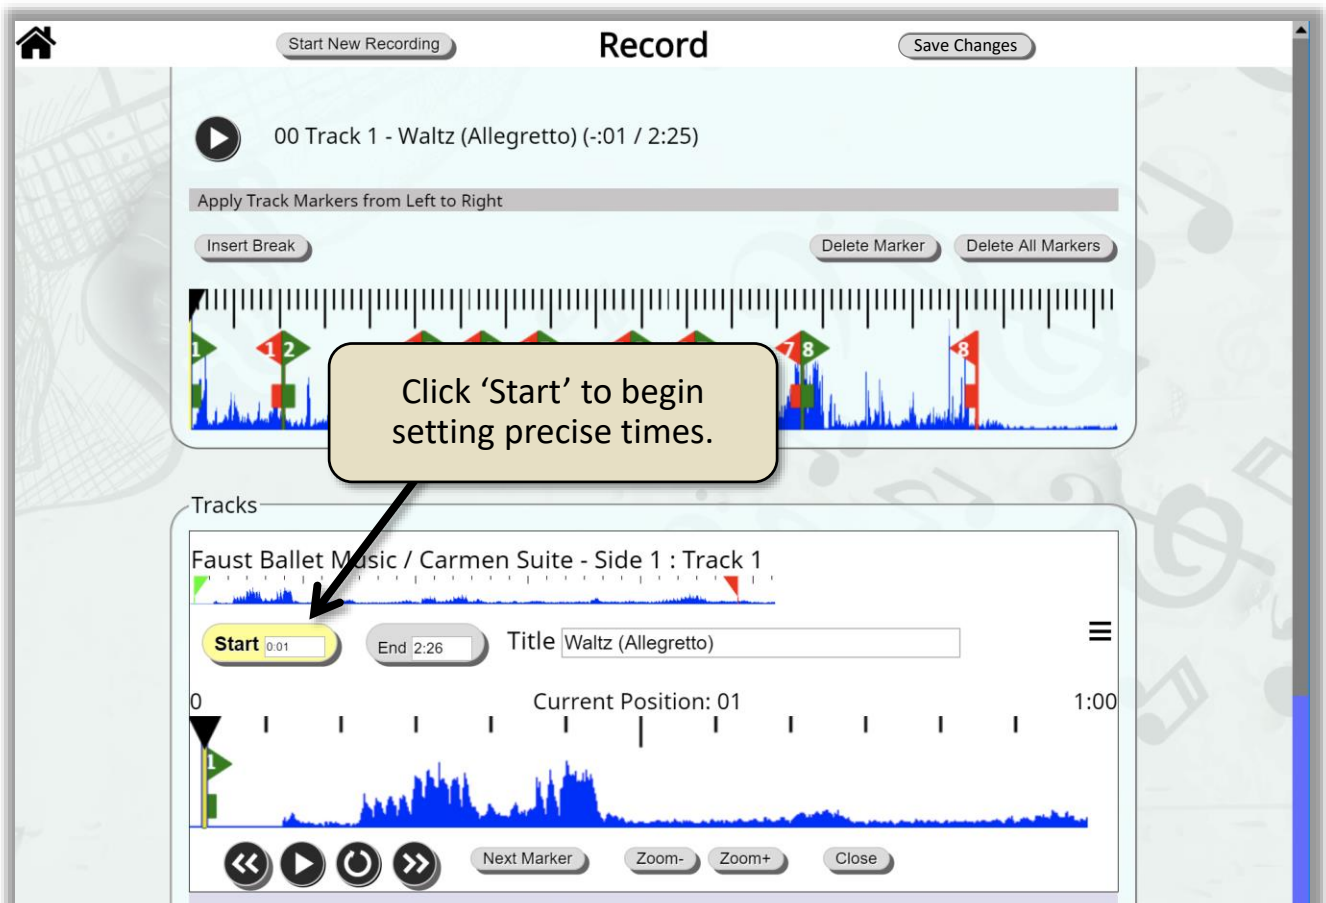

The screenshot displays the SugarCube Recording interface. At the top, there is a navigation bar with a home icon, a "Start New Recording" button, a "Record" button, and a "Save Changes" button. Below this, the main area shows a timeline for "00 Track 1 - Waltz (Allegretto) (-:01 / 2:25)". The timeline includes a ruler with markers and a waveform. Below the timeline, there are buttons for "Insert Break", "Delete Marker", and "Delete All Markers".

Below the main timeline, there is a section titled "Tracks" which lists several tracks for "Faust Ballet Music / Carmen Suite - Side 1":

- Track 1:** Start 0:01, End 2:26, Title Waltz (Allegretto)
- Track 2:** Start 2:26, End 6:03, Title Ensemble(Adagio)
- Track 3:** Start 6:03, End 7:34, Title Dance Of The Nubians
- Track 4:** Start 7:34, End 9:02, Title Cleopatra's Dance
- Track 5:** Start 9:02, End 11:26, Title Dance Of The Trojan Maidens
- Track 6:** (No start/end times or title visible)

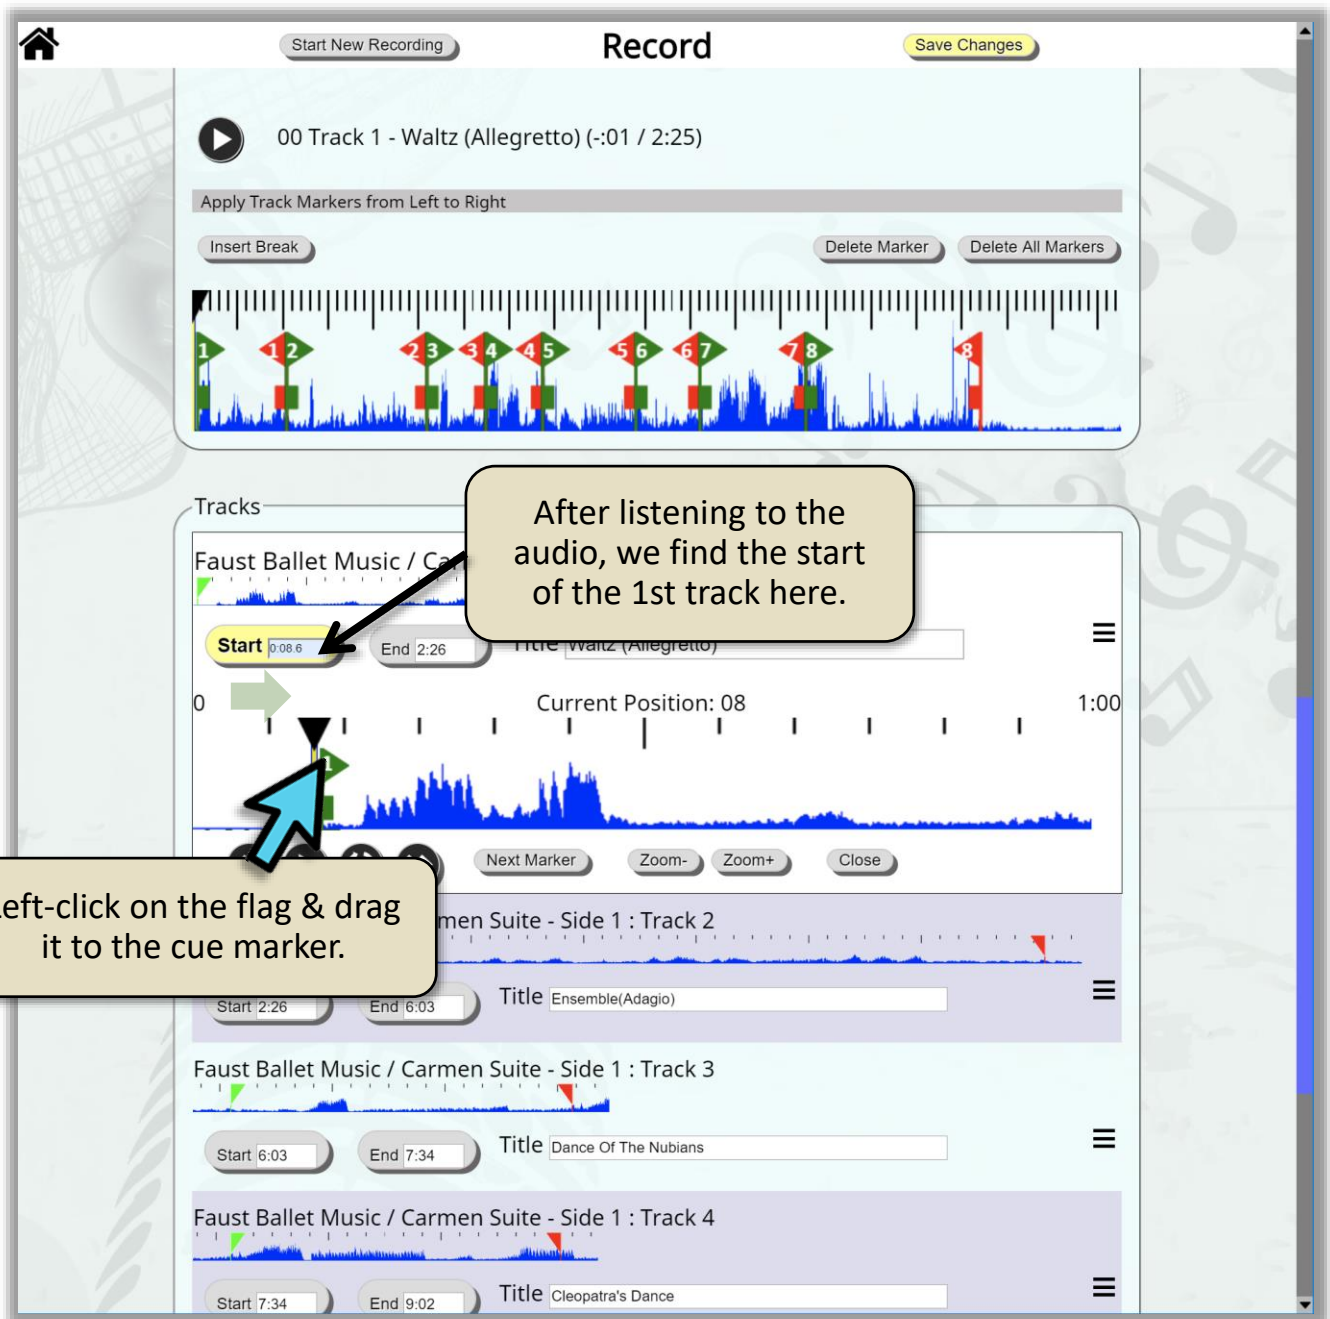

- Scrolling down the page, you will see that the tracks are properly named and start and stop times are in roughly the correct place.

3.18 – Editing Tracks

- Getting the 'Start' and 'End' markers right where they need to be can be done relatively quickly.
- First click on 'Start' of Track 1, listen for the beginning of the first track, move the flag to the correct time, then click on 'Next Marker'.
- Next, do the same adjustment for the 'End' marker.
- When that is set, next click on 'Next Marker' again. This time, the focus will jump to the 'Start' marker of the next track and it will already be in place just after the 'End' flag you just set.
- Continue on to the end which will generally require just one adjustment per track.

3.19 – Editing Tracks

3.20 – Editing Tracks

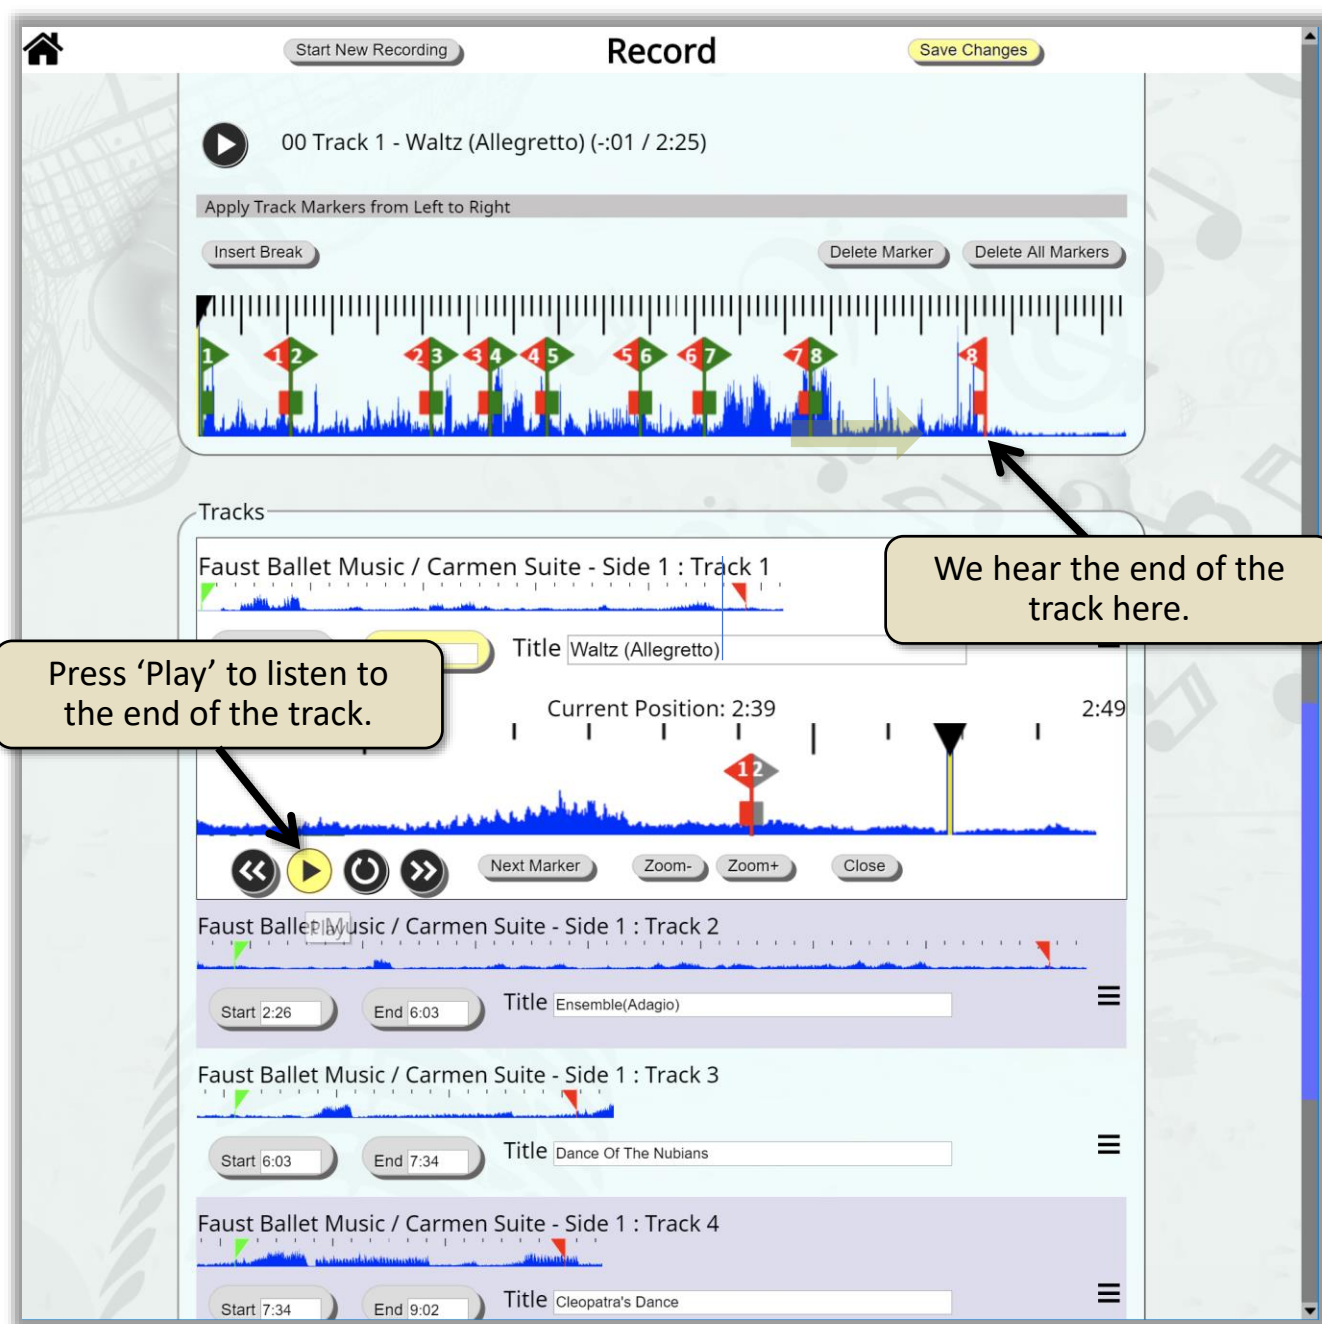

The screenshot displays the SugarCube Recording interface. At the top, there is a navigation bar with a home icon, a "Start New Recording" button, a "Record" label, and a "Save Changes" button. Below this, a track titled "00 Track 1 - Waltz (Allegretto) (-:01 / 2:25)" is shown. A play button icon is to the left of the title. Below the title, a bar indicates "Apply Track Markers from Left to Right". Below this bar are three buttons: "Insert Break", "Delete Marker", and "Delete All Markers". A waveform visualization shows several markers numbered 1 through 8, with markers 1-7 being green and marker 8 being red. Below the waveform, a "Tracks" section lists four tracks:

- Track 1: "Faust Ballet Music / Carmen Suite - Side 1 : Track 1". It has a "Start" time of 0:08.6, an "End" time of 2:26, and a "Title" of "Waltz (Allegretto)". A "Current Position: 08" is indicated. Below the waveform, there are navigation buttons: "<<", ">>", "Next Marker", "Zoom-", "Zoom+", and "Close".
- Track 2: "Faust Ballet Music / Carmen Suite - Side 1 : Track 2". It has a "Start" time of 2:26.
- Track 3: "Faust Ballet Music / Carmen Suite - Side 1 : Track 3". It has a "Start" time of 6:03.
- Track 4: "Faust Ballet Music / Carmen Suite - Side 1 : Track 4". It has a "Start" time of 7:34, an "End" time of 9:02, and a "Title" of "Cleopatra's Dance".

A callout box with a black arrow pointing to the "Next Marker" button contains the text: "Click on 'Next Marker' to jump to track 1's End marker."

3.21 – Editing Tracks

The screenshot displays the SugarCube Recording interface. At the top, there are buttons for 'Start New Recording', 'Record', and 'Save Changes'. Below these, a play button icon is followed by the text '00 Track 1 - Waltz (Allegretto) (-:01 / 2:25)'. A section titled 'Apply Track Markers from Left to Right' contains buttons for 'Insert Break', 'Delete Marker', and 'Delete All Markers'. A waveform visualization shows several markers numbered 1 through 8, with a yellow arrow pointing to the end of the track. Below this, a 'Tracks' section lists four tracks: 'Faust Ballet Music / Carmen Suite - Side 1 : Track 1', 'Faust Ballet Music / Carmen Suite - Side 1 : Track 2', 'Faust Ballet Music / Carmen Suite - Side 1 : Track 3', and 'Faust Ballet Music / Carmen Suite - Side 1 : Track 4'. Each track has a waveform and a title field. The first track's title is 'Waltz (Allegretto)'. A 'Current Position: 2:39' indicator is shown. A play button icon is highlighted with a yellow circle. A text box with an arrow pointing to the play button says 'Press 'Play' to listen to the end of the track.' Another text box with an arrow pointing to the end of the waveform says 'We hear the end of the track here.'

3.23 – Editing Tracks

The screenshot shows the SugarCube Recording interface with the following elements:

- Top Bar:** Home icon, "Start New Recording" button, "Record" status, and "Save Changes" button.
- Track 1:** "00 Track 1 - Waltz (Allegretto) (-:01 / 2:25)". It features a timeline with markers numbered 1 through 8. A callout box points to a marker with the text: "IMPORTANT NOTE: if you grab the marker by the flag, it moves alone (if you want to remove space between the tracks.)".
- Tracks List:**
 - Track 2:** "Faust Ballet Music / Carmen Suite - Side 1 : Track 2". Start: 0:08.6, End: 2:35.5, Title: "Waltz (Allegretto)".
 - Track 3:** "Faust Ballet Music / Carmen Suite - Side 1 : Track 3". Start: 2:38.6, End: 6:03, Title: "Ensemble(Adagio)".
 - Track 4:** "Faust Ballet Music / Carmen Suite - Side 1 : Track 4". Start: 6:03, End: 7:34, Title: "Dance Of The Nubians".
 - Track 5:** "Faust Ballet Music / Carmen Suite - Side 1 : Track 4". Start: 7:34, End: 9:02, Title: "Cleopatra's Dance".
- Timeline:** Shows "Current Position: 2:37" and a range from 1:49 to 2:49. Navigation buttons include "Next Marker", "Zoom-", "Zoom+", and "Close".

3.24 – Editing Tracks

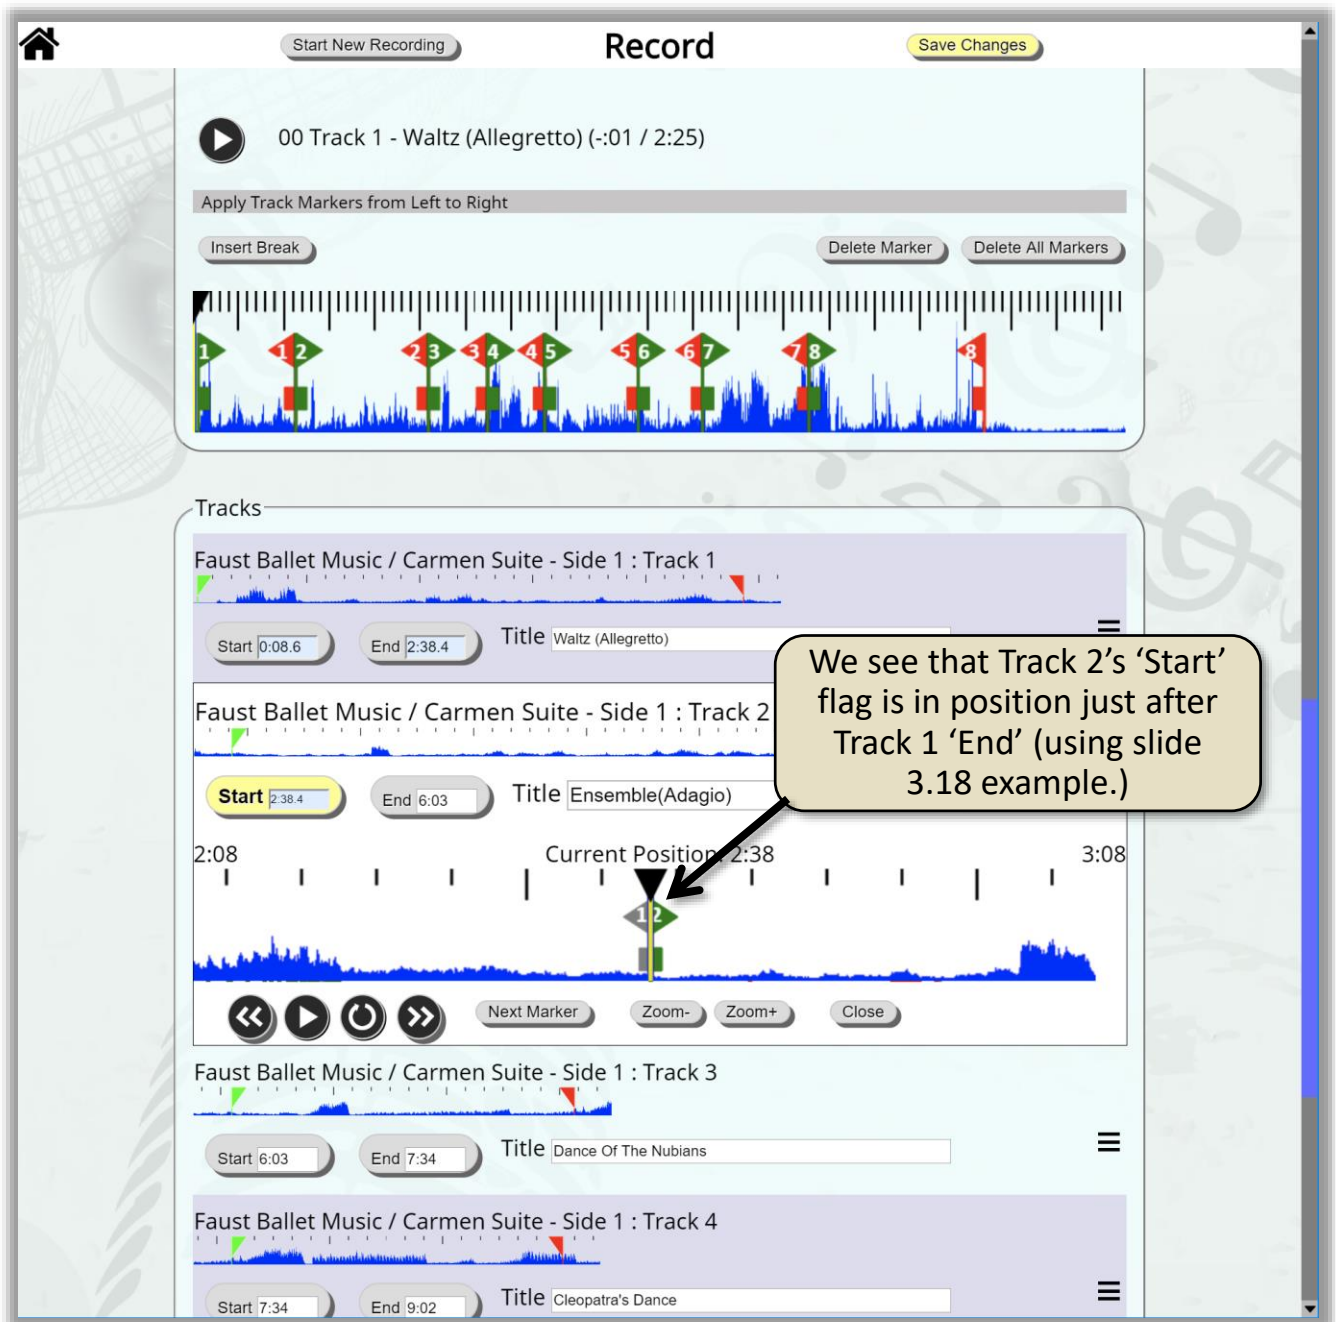

The screenshot displays the SugarCube Recording interface. At the top, there is a navigation bar with a home icon, a "Start New Recording" button, a "Record" title, and a "Save Changes" button. Below this, a track titled "00 Track 1 - Waltz (Allegretto) (-:01 / 2:25)" is shown. A timeline for this track features numbered markers (1-8) and a waveform. Above the waveform, the text "Apply Track Markers from Left to Right" is present, along with buttons for "Insert Break", "Delete Marker", and "Delete All Markers".

The main section, titled "Tracks", lists four tracks from "Faust Ballet Music / Carmen Suite - Side 1":

- Track 1:** Title "Waltz (Allegretto)", Start "0:08.6", End "2:38.4". The current position is 2:38. A "Next Marker" button is visible below the waveform.
- Track 2:** Title "5th Variation", Start "2:38.4", End "6:03".
- Track 3:** Title "6th Variation", Start "6:03", End "7:34".
- Track 4:** Title "Cleopatra's Dance", Start "7:34", End "9:02".

A callout box with an arrow pointing to the "Next Marker" button on Track 1 contains the text: "Click on 'Next Marker' to move to the start of Track 2."

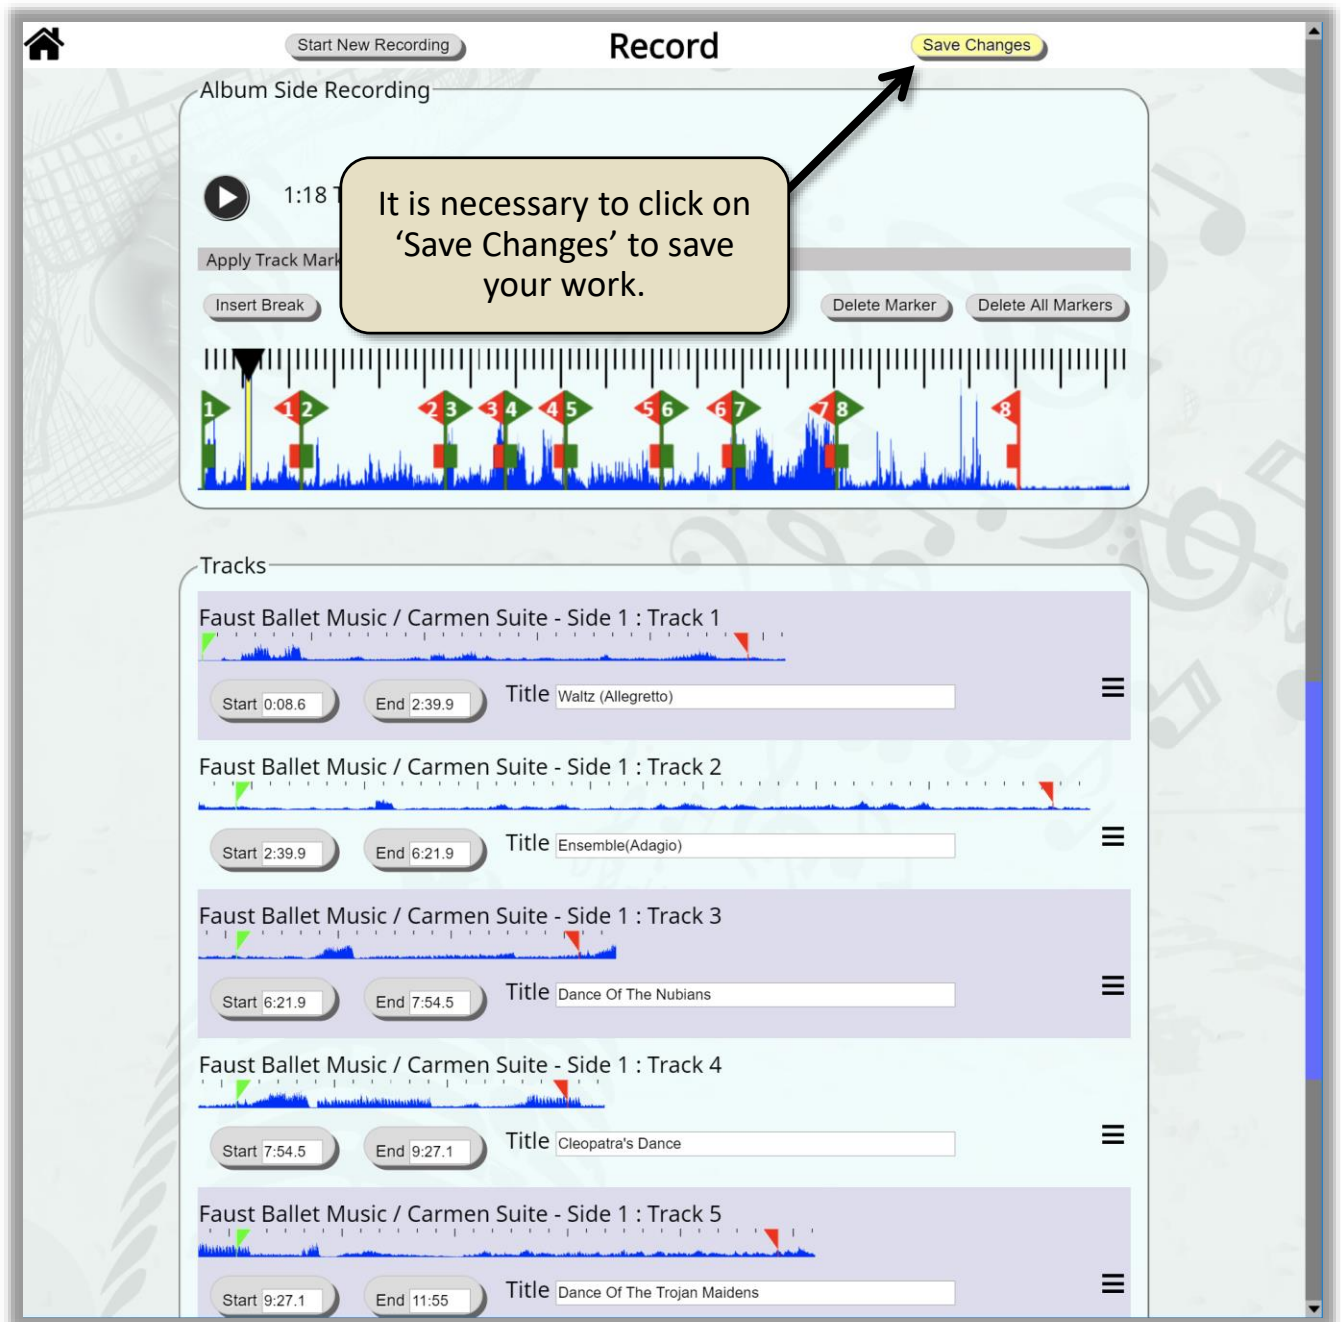

3.25 – Editing Tracks

The screenshot displays the SugarCube Recording software interface. At the top, there's a 'Record' button and a 'Save Changes' button. Below this, a timeline for 'Track 1 - Waltz (Allegretto)' is shown with various markers. The 'Tracks' section below lists four tracks: Track 1 (Waltz), Track 2 (Ensemble), Track 3 (Dance Of The Nubians), and Track 4 (Cleopatra's Dance). A callout box points to the 'Start' flag of Track 2, indicating its position relative to Track 1's 'End' flag. The interface also includes playback controls and a 'Current Position' indicator.

- You may find that this automatic placement of the Start flag of the next track against the End flag of the previous track is really all you need.
- Otherwise, feel free to move it to the right to reduce the gap between tracks by grabbing the top (green triangle with '2').
- Or, you can even move the Start flag left before the end of the previous track for situations such as live albums or crossfaded tracks.

3.26 – Editing Tracks

The screenshot shows the SugarCube Recording interface. At the top, there is a 'Record' tab and a 'Save Changes' button. A callout box with an arrow pointing to the 'Save Changes' button contains the text: "It is necessary to click on 'Save Changes' to save your work." Below the 'Record' tab, there is a section for 'Album Side Recording' which includes a play button, a time display of '1:18', and buttons for 'Apply Track Mark', 'Insert Break', 'Delete Marker', and 'Delete All Markers'. A waveform is visible with several markers numbered 1 through 8. Below this, there is a section for 'Tracks' which lists five tracks for 'Faust Ballet Music / Carmen Suite - Side 1':

- Track 1: Start 0:08.6, End 2:39.9, Title Waltz (Allegretto)
- Track 2: Start 2:39.9, End 6:21.9, Title Ensemble(Adagio)
- Track 3: Start 6:21.9, End 7:54.5, Title Dance Of The Nubians
- Track 4: Start 7:54.5, End 9:27.1, Title Cleopatra's Dance
- Track 5: Start 9:27.1, End 11:55, Title Dance Of The Trojan Maidens

- Everything is now correct and ready for saving to files.
- This concludes this update to the SugarCube “track splitting changes and additions.”

Enable or disable normalization. This sets the peak of the audio found anywhere on the album side to this level in dB below full-scale.

4.08 – Preparing to Save the Whole Album Side

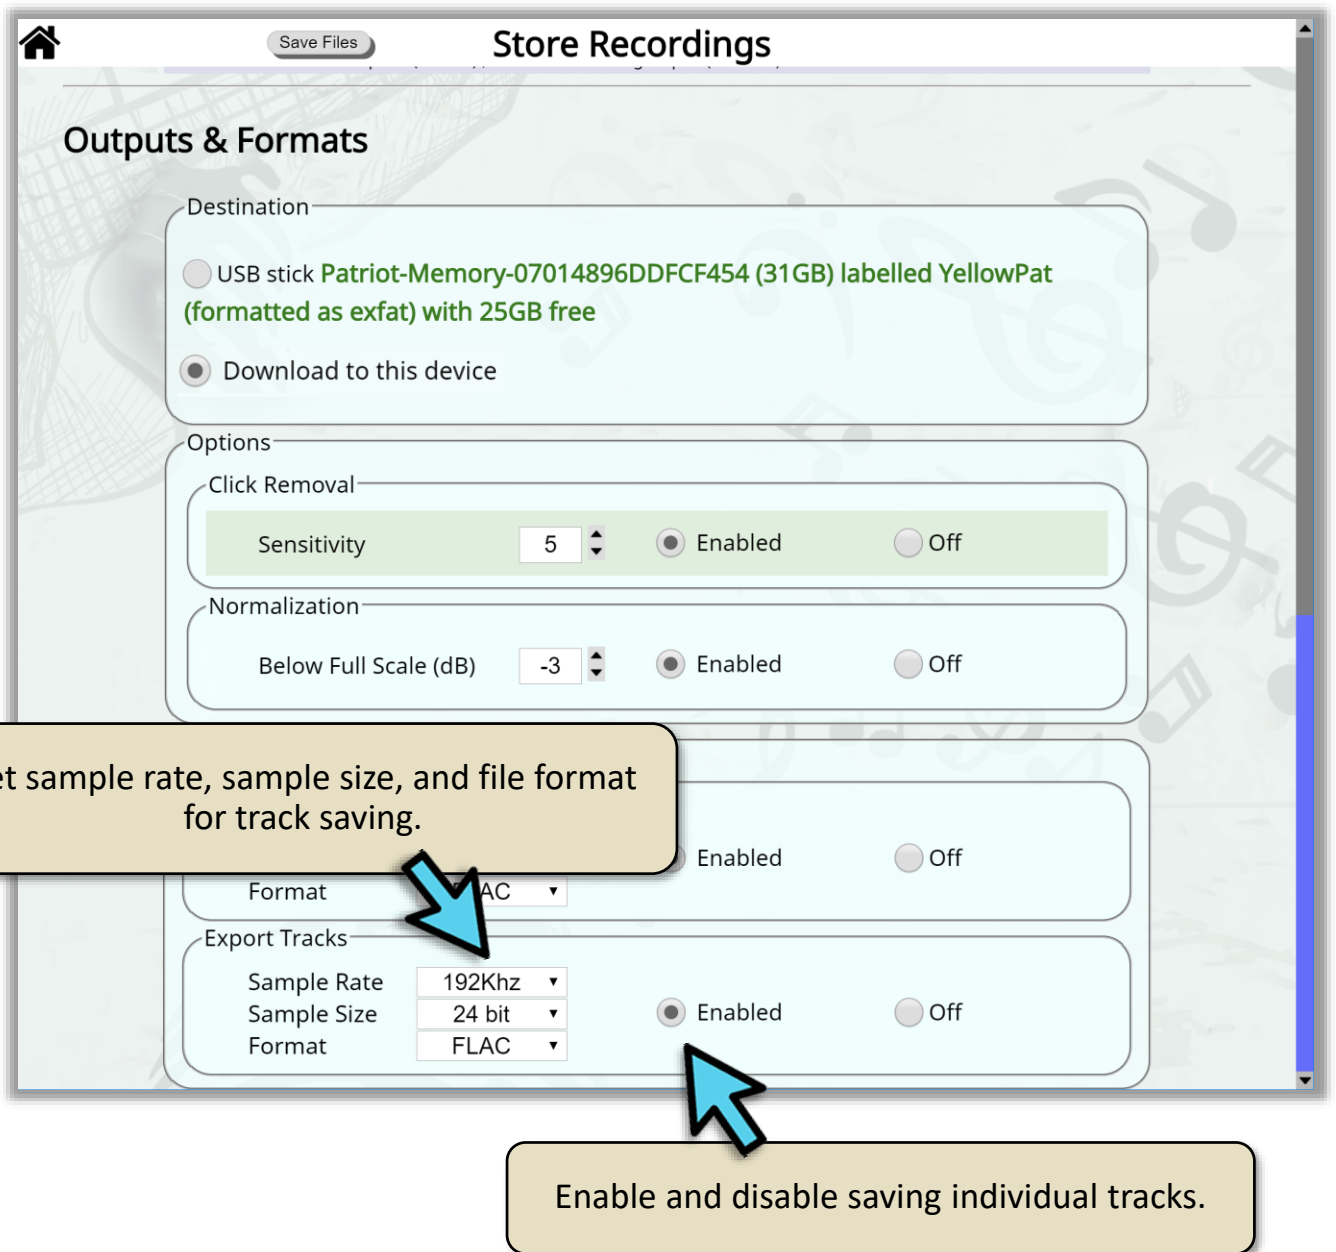

The screenshot shows the 'Store Recordings' window in SugarCube. It has a 'Save Files' button and a home icon. The 'Outputs & Formats' section includes a 'Destination' choice between a USB stick (Patriot-Memory-07014896DDFCF454 (31GB) labelled YellowPat, formatted as exfat with 25GB free) and 'Download to this device'. Below is an 'Options' section with 'Click Removal' and 'Sensitivity' (set to 5) both with 'Enabled' and 'Off' radio buttons. The 'Format' section has two sub-sections: 'Export Whole Album Side' and 'Export Tracks'. Each has dropdowns for 'Sample Rate' (192Khz), 'Sample Size' (24 bit), and 'Format' (FLAC), followed by 'Enabled' and 'Off' radio buttons. A callout box with a blue arrow points to the 'Export Whole Album Side' section, stating: 'Set sample rate, sample size, and file format for album side saving.' Another callout box with a blue arrow points to the 'Enabled' radio button for 'Export Whole Album Side', stating: 'Enable and disable album side export saving the entire album side as one file.'

Set sample rate, sample size, and file format for album side saving.

Enable and disable album side export saving the entire album side as one file.

- We strongly recommend that you save whole album sides in an archive folder on your home computer, NAS, or music server.
- The 'Export Whole Album' function will also allow you, if you wish, to later import the album side into your favorite PC or Mac audio editor such as Pure Vinyl, Vinyl Studio, or Audacity, etc.

4.09 – Preparing to Save Tracks

The screenshot shows the 'Store Recordings' window with a 'Save Files' button and a home icon. The 'Outputs & Formats' section includes a 'Destination' choice between a USB stick and downloading to the device. Below are 'Options' for 'Click Removal' (Sensitivity 5, Enabled) and 'Normalization' (Below Full Scale -3 dB, Enabled). The 'Export Tracks' section has dropdowns for Sample Rate (192Khz), Sample Size (24 bit), and Format (FLAC), along with an 'Enabled' radio button. Two callout boxes with arrows provide instructions: one points to the 'Export Tracks' section, and the other points to the 'Enabled' radio button.

- The 'Save Files' process will save all album sides that were checked and will save the whole album side and/or tracks.
- The individual tracks will be numbered and tagged with the appropriate metadata.

4.11 – Saving Tracks

- The SugarCube will now process the selected album sides and output files (in the formats selected) to this device (your laptop or desktop.)
- If 'Click Repaired' was selected, clicks and pops will be removed from each track. If for some reason you want raw tracks, select 'Not Processed'.
- 'Normalization' sets the level of the loudest track on its album side to whatever dB below full scale has been set. (We recommend: -1 dB)
- Note: you can make multiple passes using different formats. For example, you could have high-res uncompressed files and then run the process again to make mp3's for your mobile phone or car.

4.12 – Saving Tracks

The screenshot shows the 'Store Recordings' page in the SugarCube application. At the top, there is a home icon, a 'Save Files' button, and the title 'Store Recordings'. Below this, the text 'Files Transferred From SugarCube' is followed by a link: '[Click Here to Save to Local File System](#)'. The 'Saved Files' section shows 'Done (8 - about 8 hours ago)'. A blue arrow points from this section to a yellow callout box that says 'Click here to open a window to select where to save the files.' Below the 'Recordings' section, there is a 'Select All' button. The recordings are listed in a table-like format with alternating green and purple background colors. Each entry includes a checkbox, the track name, side information, artist name, recording time, last save date, and a thumbnail image.

Checkbox	Track Name	Side	Artist	Recorded	Last Save	Thumbnail
☐	Just A Little Lovin'	side 2 - cat: B0009789-01	Shelby Lynne	Recorded about 10 hours ago 22m19s	Last save: 2019-08-22	
5 Tracks: Breakfast In Bed (3m53s) , Willie And Laura Mae Jones (3m09s) , I Don't Want To Hear It Anymore (4...						
☐	Just A Little Lovin'	side 1 - cat: B0009789-01	Shelby Lynne	Recorded about 12 hours ago 22m35s	Last save: 2019-08-22	
5 Tracks: Just A Little Lovin' (4m30s) , Anyone Who Had A Heart (4m30s) , You Don't Have To Say You Love Me ...						
☐	The Pink Panther (Music From The Film Score)

Here, under 'Networks' in Windows 10, I see my NAS called 'NASDAS'.

I opened the 'Music' folder and then the 'SugarCube' folder (you will navigate to wherever you wish to save the files).

Clicking on 'Save' will place the 'Download.zip' folder with the tracks inside into this NAS location.

- This 'File Save' window will allow you to save to a NAS if it is visible to this device.
- You can also save to any location accessible by your device (Windows, Mac, tablet, etc.)

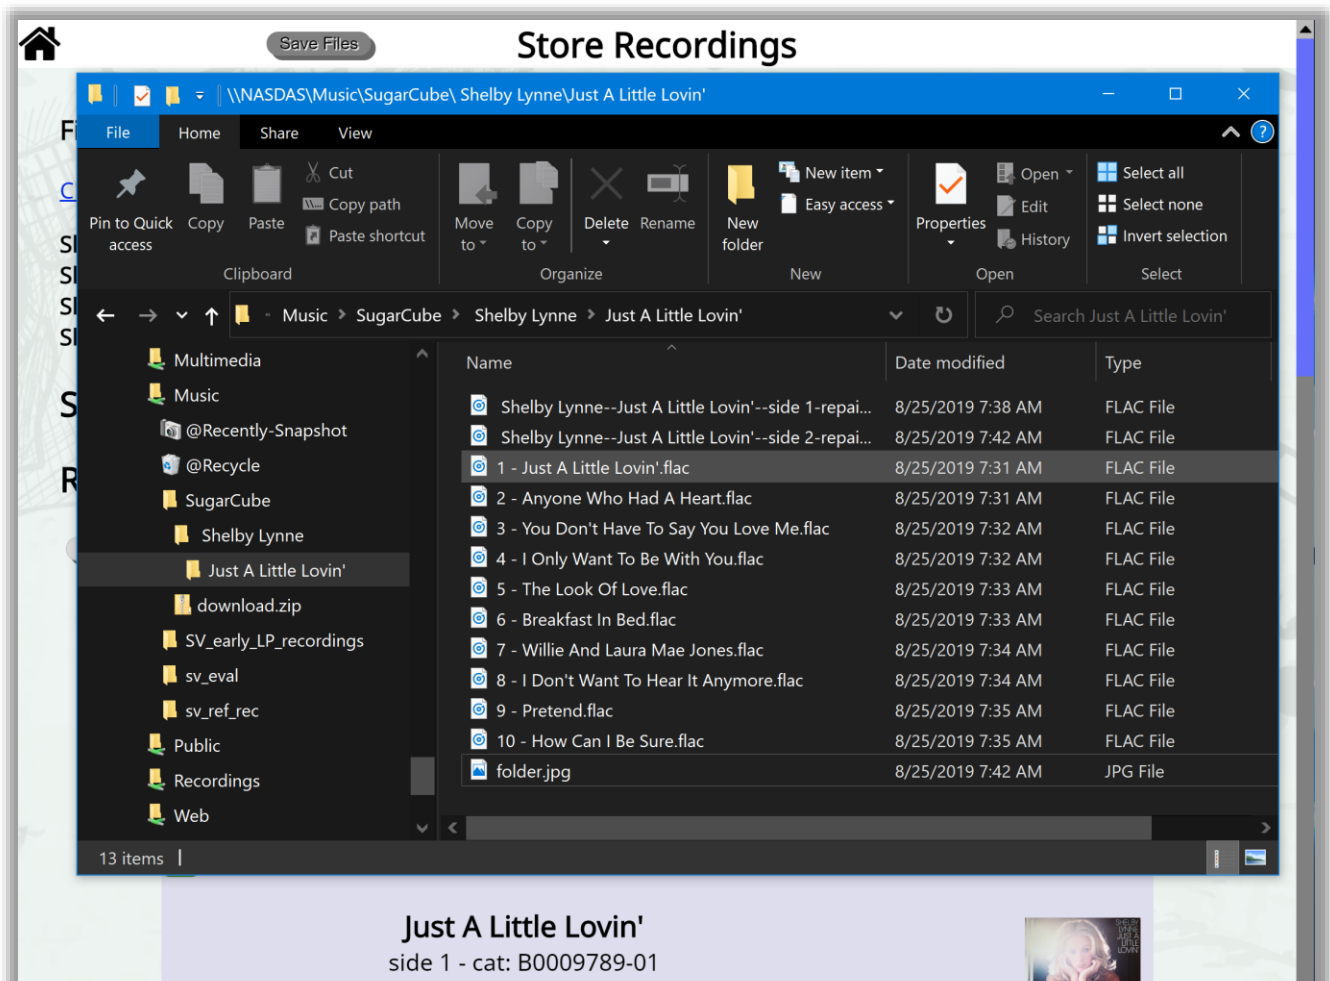

4.14 – Saving Tracks

4.15 – Saving Tracks

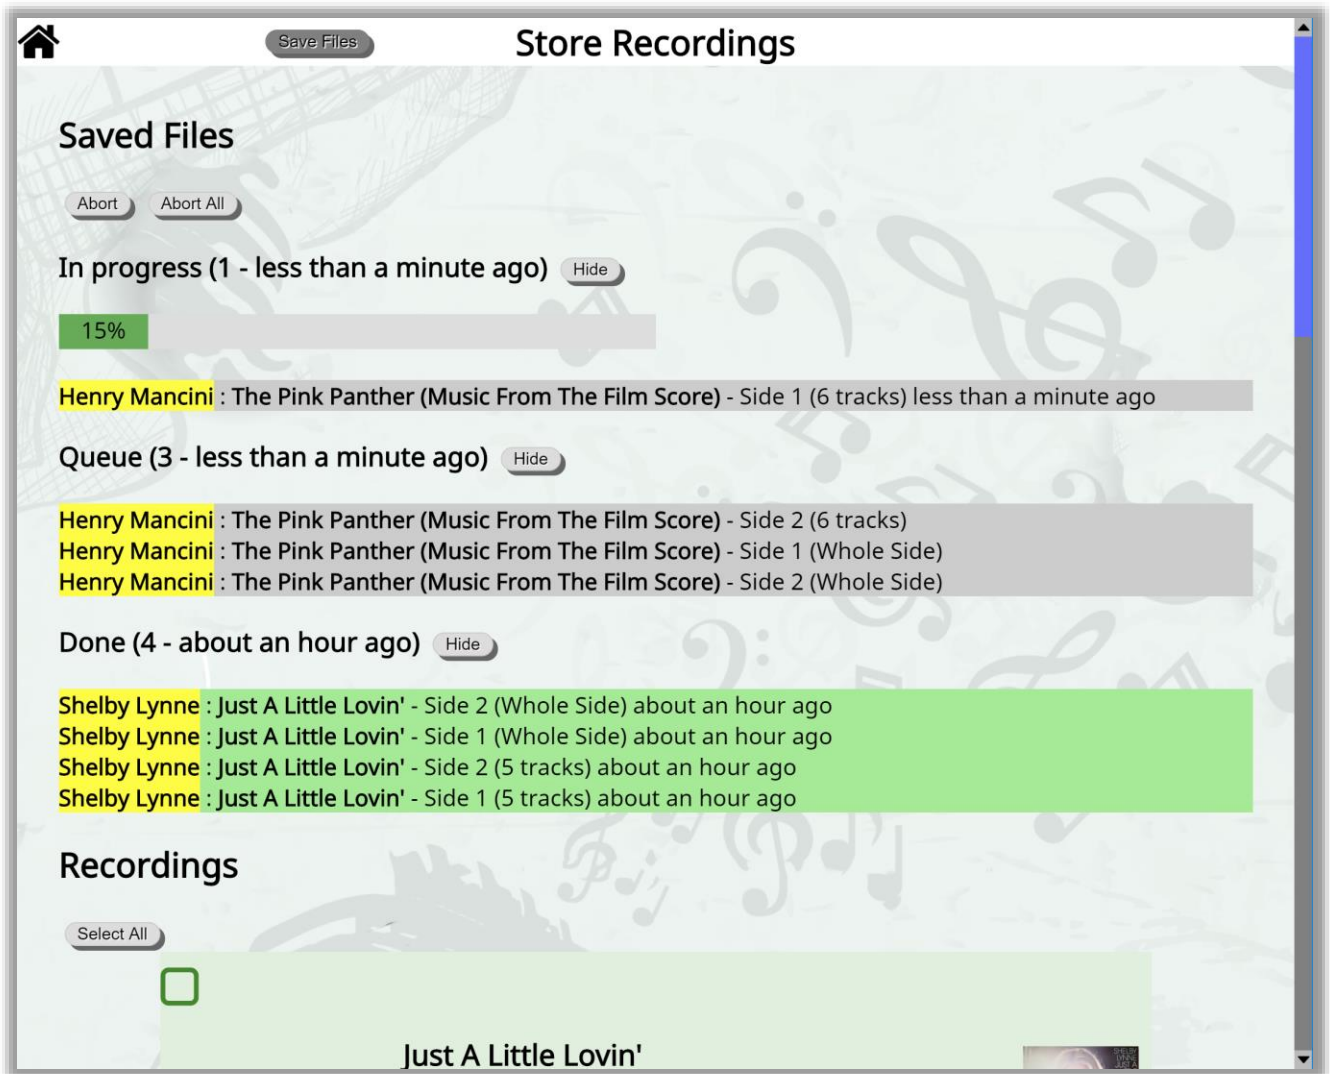

4.16 – Saving Tracks

- Inside the artist folder are the one or more album folders.
- Inside each album folder are, in the example above, the album sides and the individual tracks that were selected in the previous steps.
- Please note: if you wish to save many artists and/or many albums at once, the total size may be greater than 2 GB in which case the zip folder will come across as a .tar type compressed folder.
- If you routinely save very large numbers of recordings, please download and install either 'WinRAR' or '7z', both are reliable shareware utilities for decompressing any know file format from any operating system.

4.17 – Saving Tracks

The screenshot shows the 'Store Recordings' interface. At the top, there is a 'Save Files' button. Below it, the 'Saved Files' section contains 'Abort' and 'Abort All' buttons. The 'In progress' section shows a progress bar at 15% and a 'Hide' button. Below this, a recording by Henry Mancini is listed. The 'Queue' section shows three recordings by Henry Mancini. The 'Done' section shows four recordings by Shelby Lynne. The 'Recordings' section at the bottom has a 'Select All' button and a list of recordings, with 'Just A Little Lovin'' visible.
