

SugarCube Recording Guide

Volume 1: Basic Instructions for Recording and Saving

For SugarCube Models: SC-2, SC2-Mini, SC2-Mini/Phono
Applies to SugarCubeOS 2.2-50 and greater

Introduction

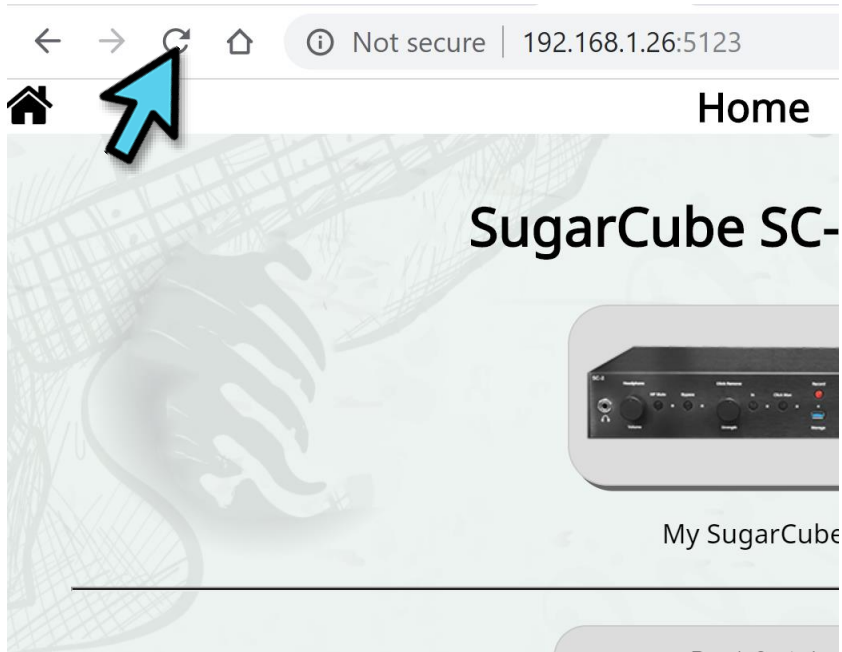

Section 1.0 – Initial setup

Section 2.0 – Recording

Section 3.0 – Editing Track Markers

Section 4.0 – Saving tracks

Before we start:

Any time your SugarCube gets an update (or, you think the program is acting funny), please do a full refresh of your browser window by:

Hold the **control key** on the keyboard and clicking on the refresh icon in the browser (you won't lose any work.)

IMPORTANT: Please only use a **Google Chrome** browser. Other browsers can disagree with Chrome on interpreting webpages and make the recording and track splitting functions behave incorrectly.

Thanks,

The SugarCube Support Team

Introduction

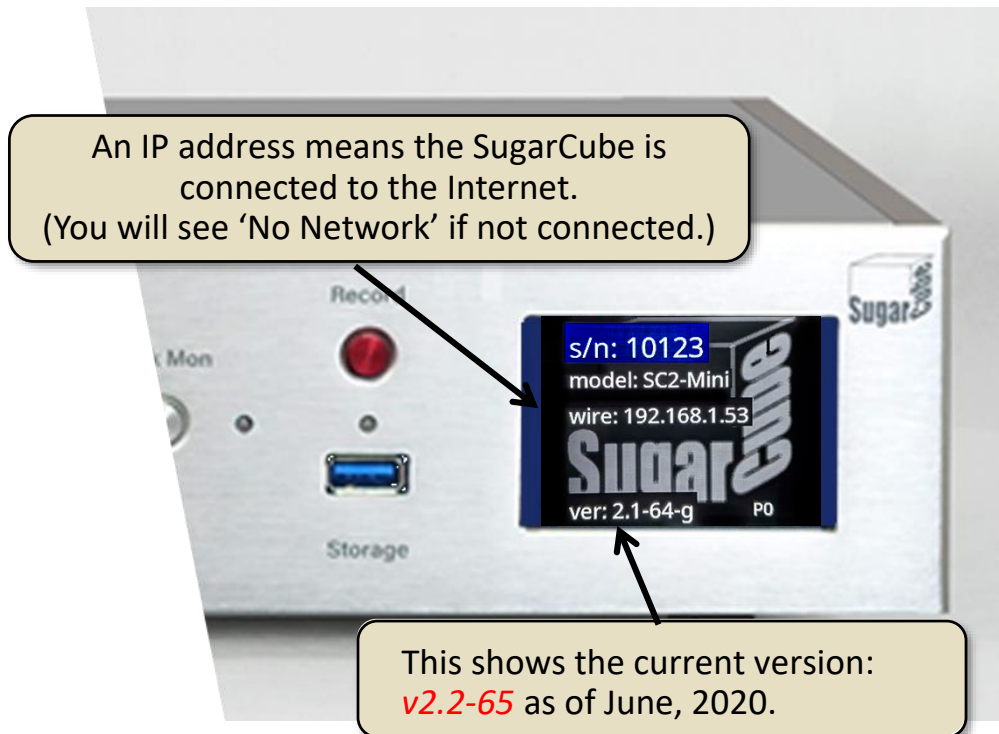

- This document outlines the use of recording and saving functions of the SugarCube Recording System.
 - Due to the complexity of editing audio, we highly recommend that you use Google Chrome on a tablet or laptop to access these menus (even if you don't use it for anything else.)
-

- Please note that as you use this software, every album that you record can be saved both as **individual tracks** as well as saved as a **whole album side**, either unprocessed or with clicks and pops removed.
- You can easily import these album sides into a number of competent audio editing programs on the Mac and Windows PCs such as PureVinyl (Mac only), Vinyl Studio (Mac or PC), Audacity (Mac, PC, Linux), Sound Studio (Mac), Amadeus Pro (Mac), GoldWave (Win), among others.
- However you choose to do final processing on your recordings, we know you will appreciate the sweet (and noise-free) output of your SC-2.
- We welcome your feedback regarding your experience with this software. Please send bug reports, comments, and suggestions for improvement to:

support@sweetvinyl.com

1.01 – Initial Setup

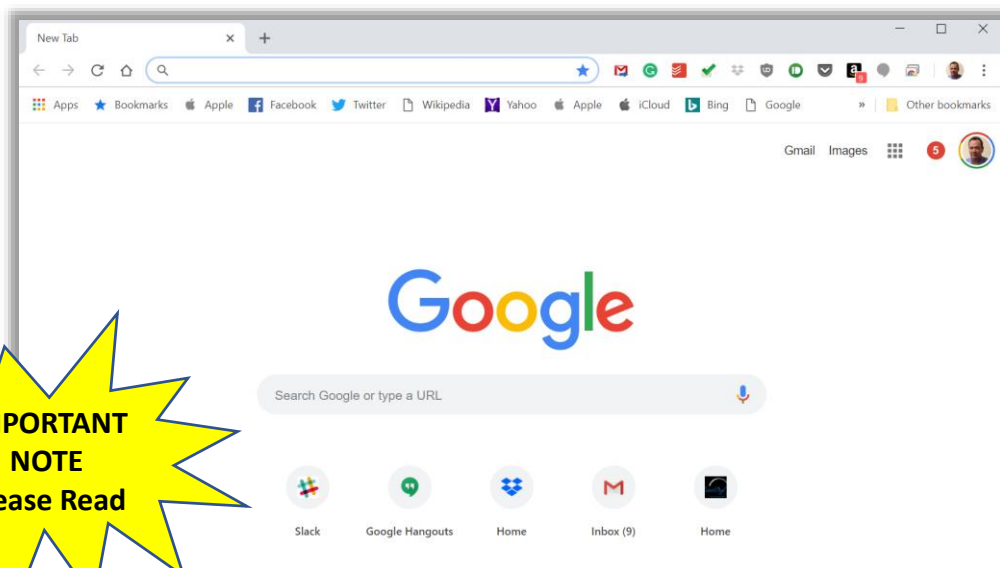

- First, be sure your SugarCube SC-2 is connected to the Internet and left powered ON for a few hours.
- Updates are automatic and will occur sometime after two hours of no music passing through the SugarCube.
- Once updated, your SC-2 will be running the latest beta version.
- You can check that your SugarCube has been updated by pressing and holding the *Bypass* button for 3 to 5 seconds until the display changes to look like the image below:

1.02 – Initial Setup

- We recommend operating the Recording / Track Splitting functions from a laptop, as a second choice, a tablet.
- Enter the IP address displayed followed by ':5123' to form a complete address such as: **192.168.1.7:5123** or **10.1.10.7:5123**
- If you need to find the IP address, press and hold the 'Bypass' button on the front panel for a few seconds.
- Please note that sometimes the IP address given by your router to the SugarCube will change so if you have difficulty connecting, please check the address again.

Please only use a Google Chrome browser.

**IMPORTANT
NOTE
Please Read**

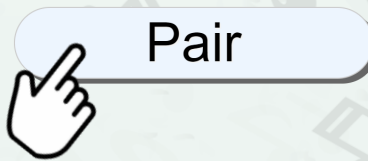

(1) While you edit an LP on the SugarCube, the **audio** for editing will come **from** your **browser** (i.e.—the speakers on your laptop or tablet) and will NOT play through your main speakers while editing.

(2) This audio is NOT the audio the SugarCube saves when you output tracks, it is just a proxy so you can clearly hear the edit points (it still sounds good though.)

1.04 – Pairing with Your SugarCube

1. Press the pair button on the back of your SugarCube
2. Look for the code on your SugarCube display
3. Enter that code below
4. This browser will then be authorised to control the SugarCube.

5123

- If your browser or app requests a pairing code, please just enter '5123' and click on 'Pair'.
- You no longer need to press the pairing button to get a code.

2.0 SugarCube Recording

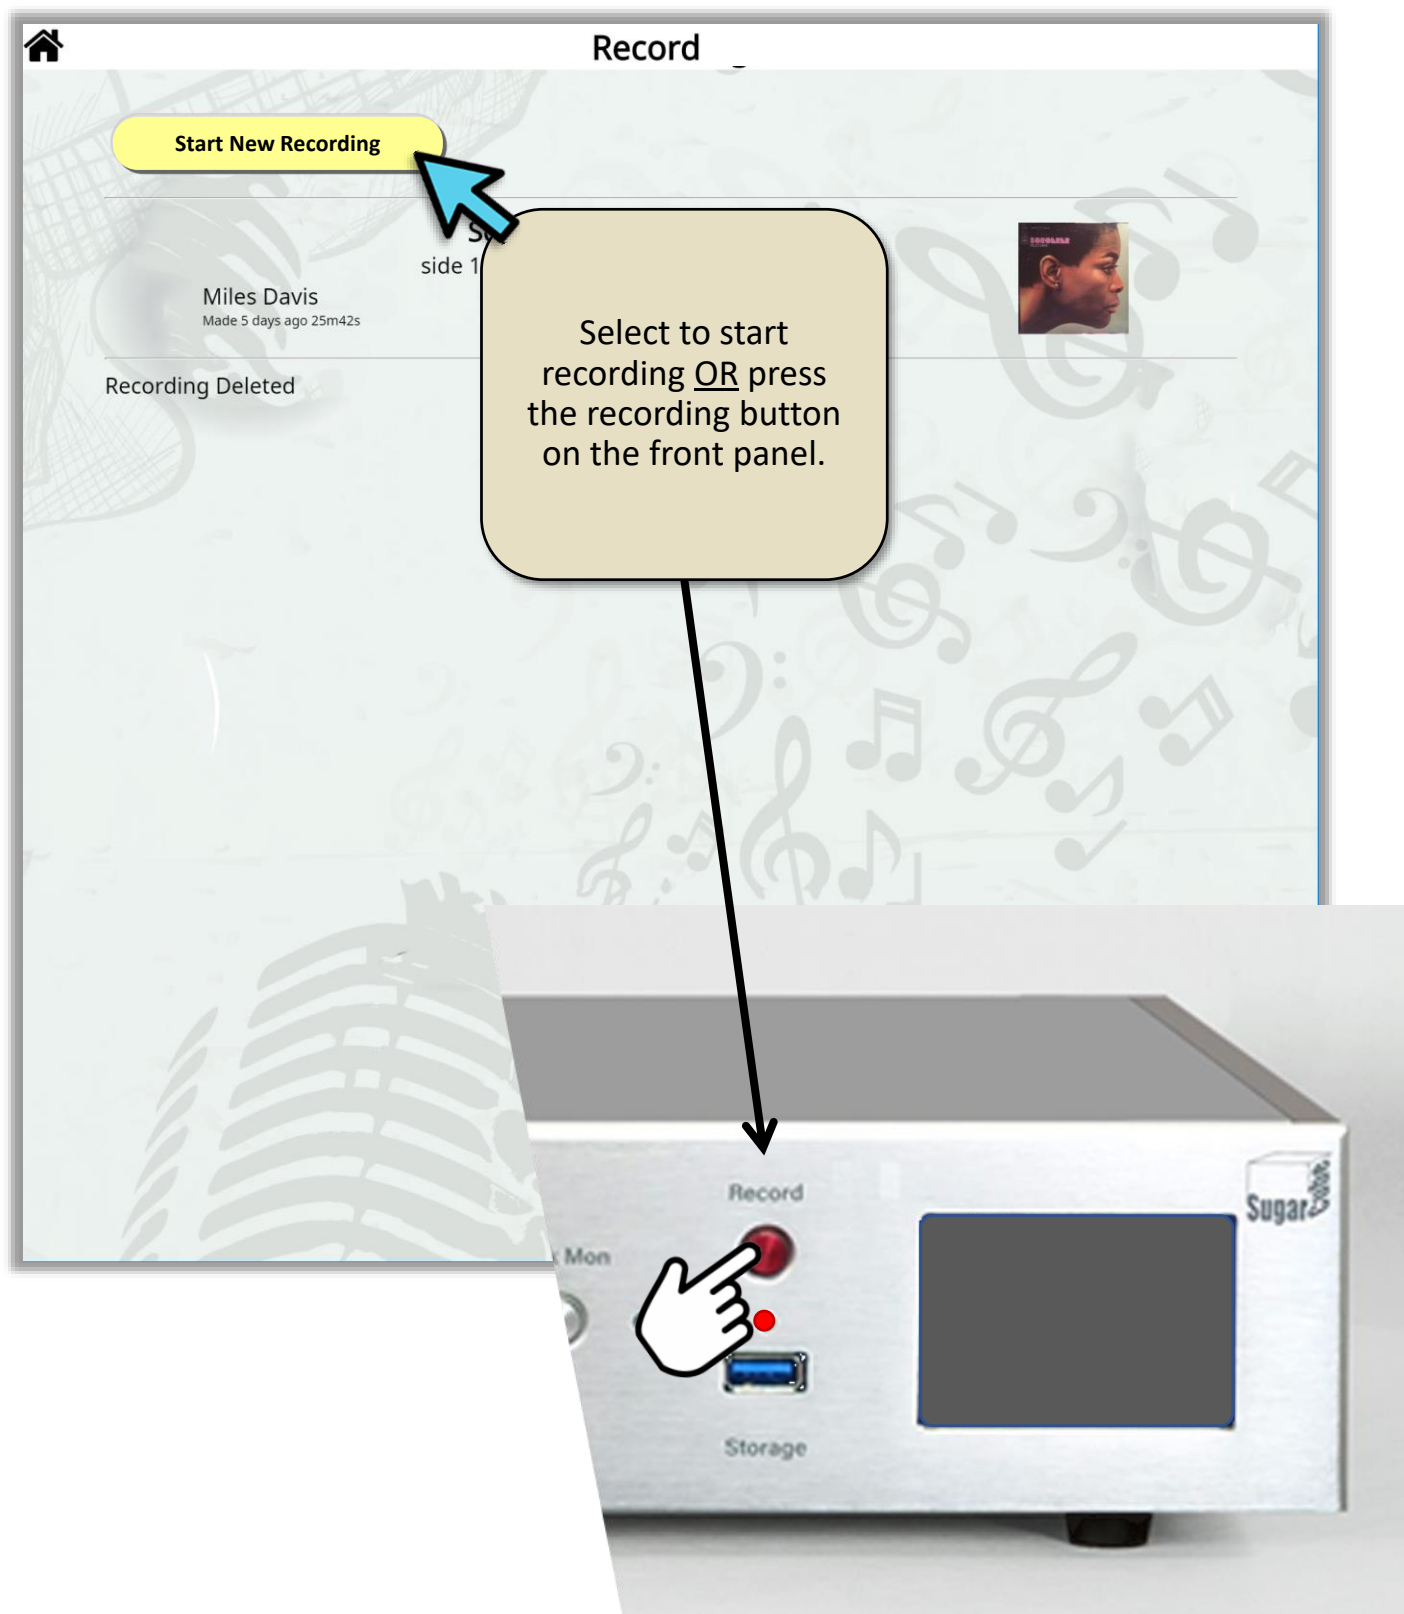

SugarCube Recording & Saving Guide

2.01 – Main Menu—Record

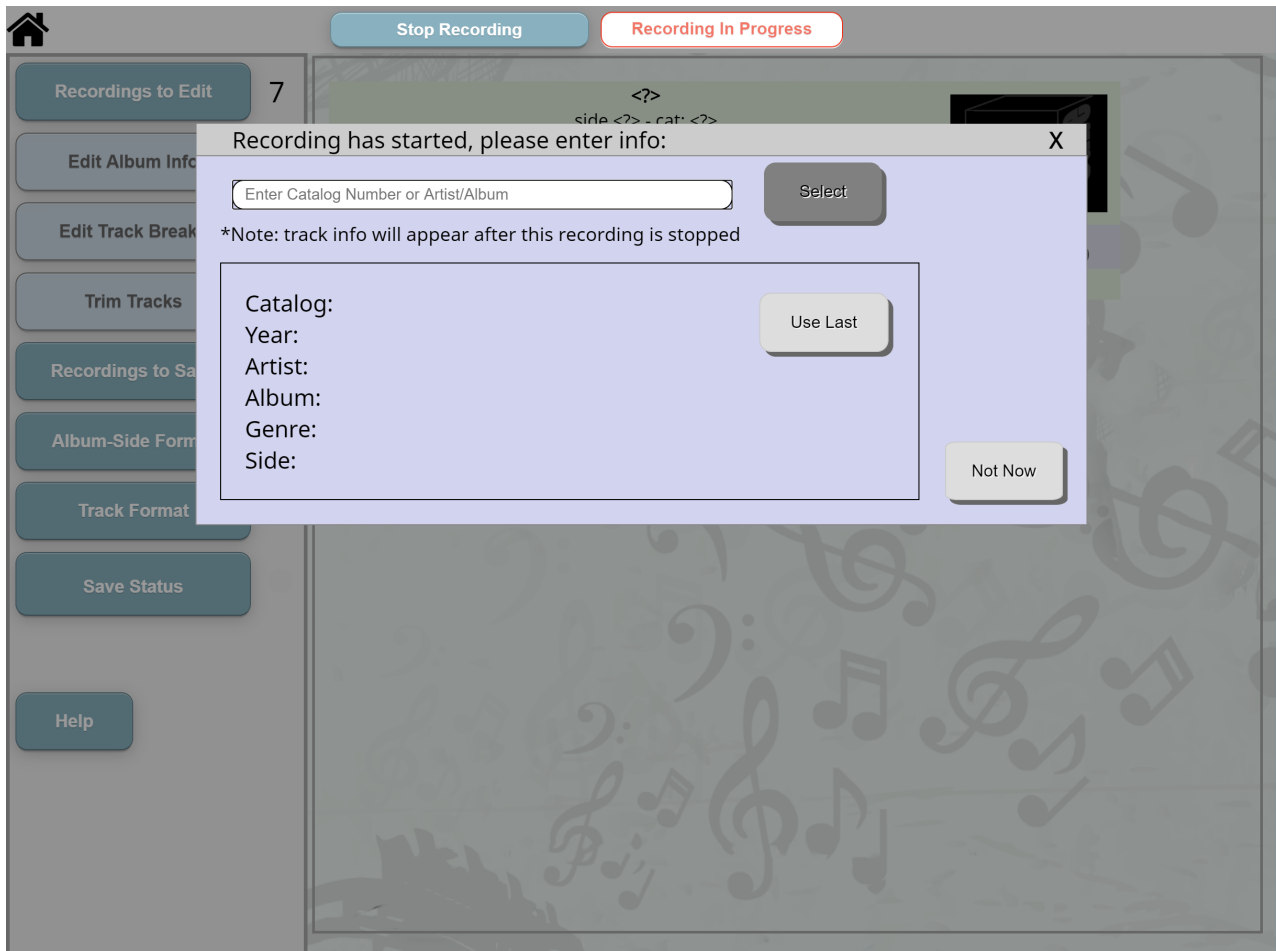

- 'Record' is where you initiate new recording as well as edit or add information on both the album and track level.
- You can trim *In* and *Out* points of each track in this view.
- You will also be able to choose what to save, where to save it, and in what format, sample rate, and bit width.

2.02 – Record Function

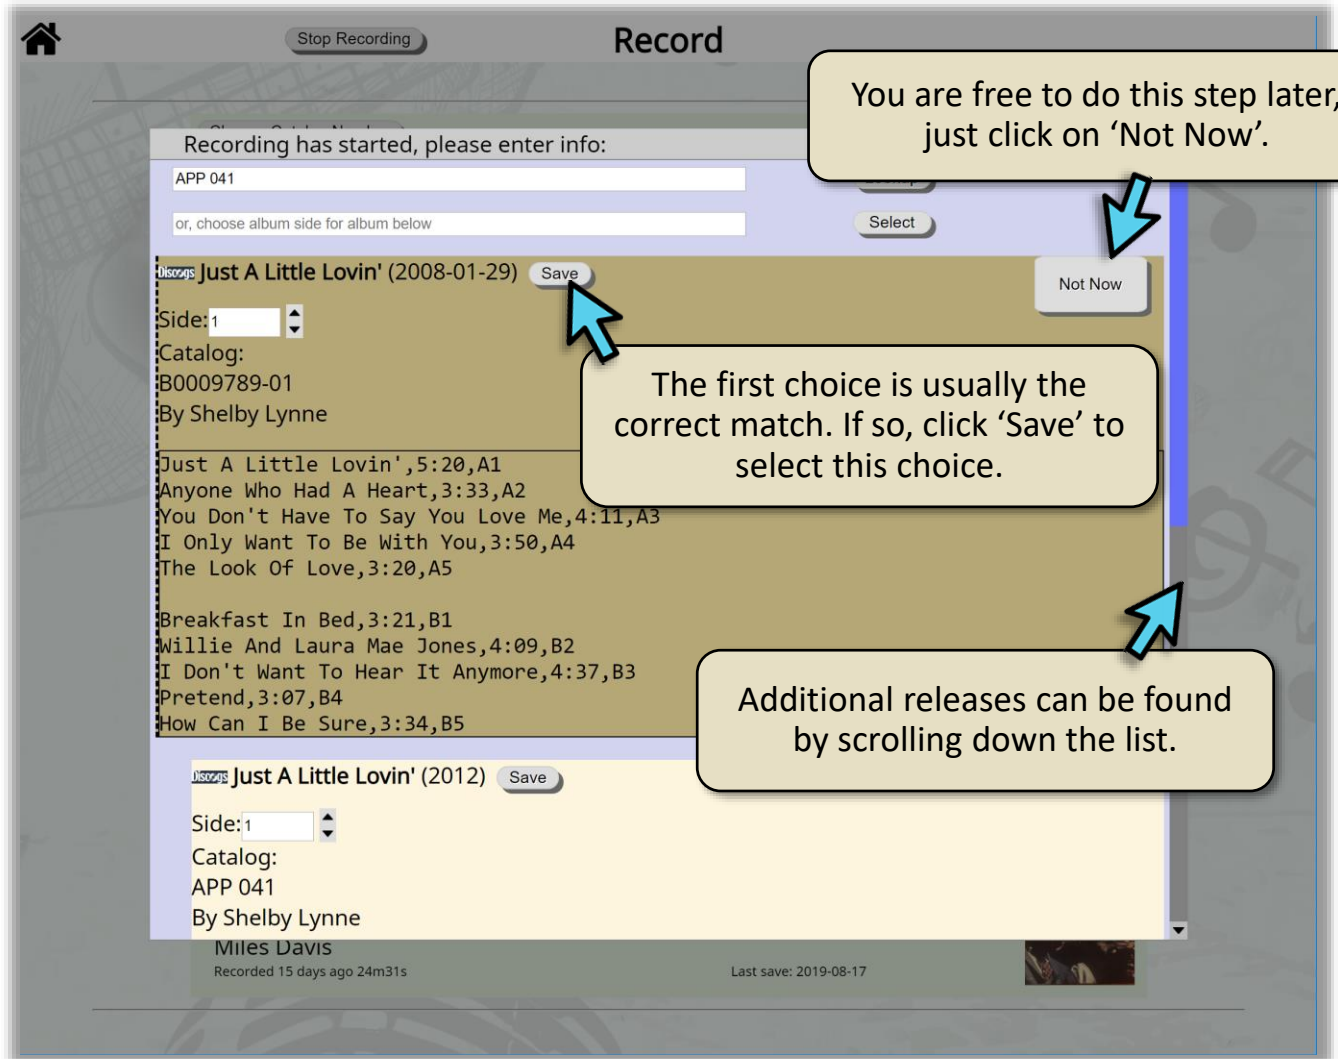

2.03 – Record Function

- The SugarCube is now recording to its internal storage (limited at this time to ten sides as of version 2.2-67.)
- A window pops up to get the catalog number of the album; you may instead enter the artist and/or album (example: "Miles Davis, Kind of Blue")
- Your SugarCube will automatically access the Discogs database (as of our software version 2.2-80 or greater).
- You can select 'Not Now' and the window will go away. You can then access Discogs during editing or just manually enter the desired information.
- You can stop recording by clicking on the button above or by pressing the red button on the front panel of the SugarCube.

2.05 – Record Function

The screenshot shows the 'Record' window in the SugarCube application. At the top, there is a 'Stop Recording' button and the title 'Record'. Below this, a message says 'Recording has started, please enter info:'. There are two input fields: 'APP 041' and 'or, choose album side for album below'. A 'Select' button is next to the second field. Below the input fields, there are two album entries. The first entry is 'Just A Little Lovin' (2008-01-29)' with a 'Save' button and a 'Not Now' button. The second entry is 'Just A Little Lovin' (2012)' with a 'Save' button. Each entry has a 'Side:' dropdown menu set to '1'. The first entry also has a 'Catalog:' field with the value 'B0009789-01' and the text 'By Shelby Lynne'. Below the catalog information, there is a list of tracks with their durations and side numbers. The second entry has a 'Catalog:' field with the value 'APP 041' and the text 'By Shelby Lynne'. Below the catalog information, there is a list of tracks with their durations and side numbers. At the bottom of the window, there is a status bar with the text 'Recorded 15 days ago 24m31s' and 'Last save: 2019-08-17'.

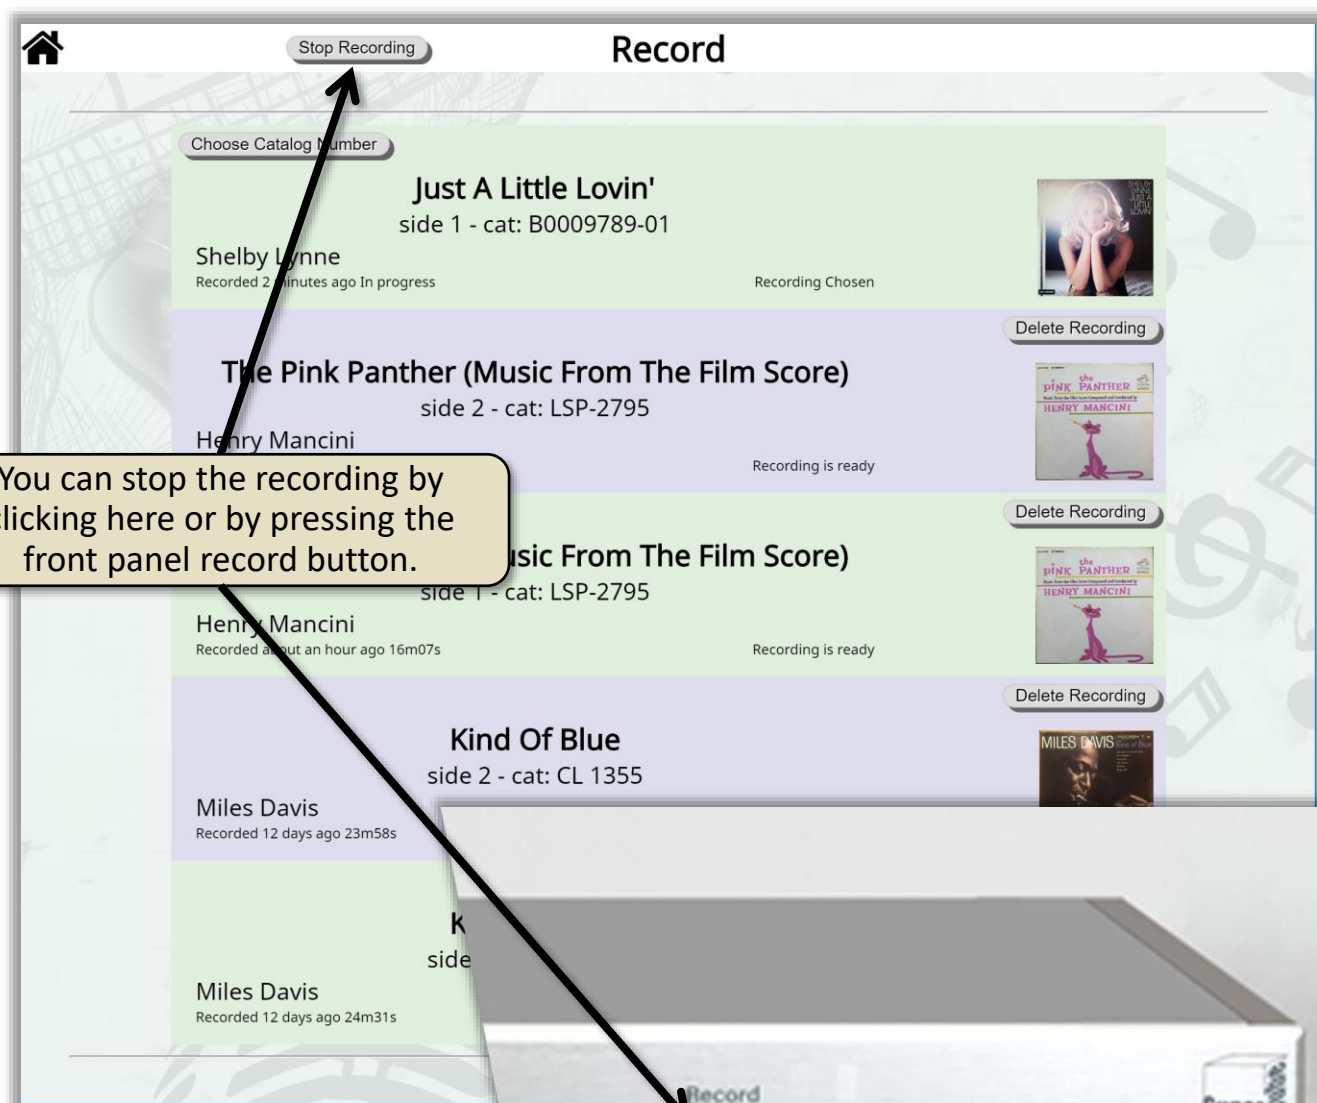

You are free to do this step later, just click on 'Not Now'.

The first choice is usually the correct match. If so, click 'Save' to select this choice.

Additional releases can be found by scrolling down the list.

- The SugarCube is continues to record while you enter the catalog number and choose a release and side.
- One the information is selected (or you choose 'Not Now', the window will disappear.

2.06 – Record Function

You can stop the recording by clicking here or by pressing the front panel record button.

The album cover displays during recording.

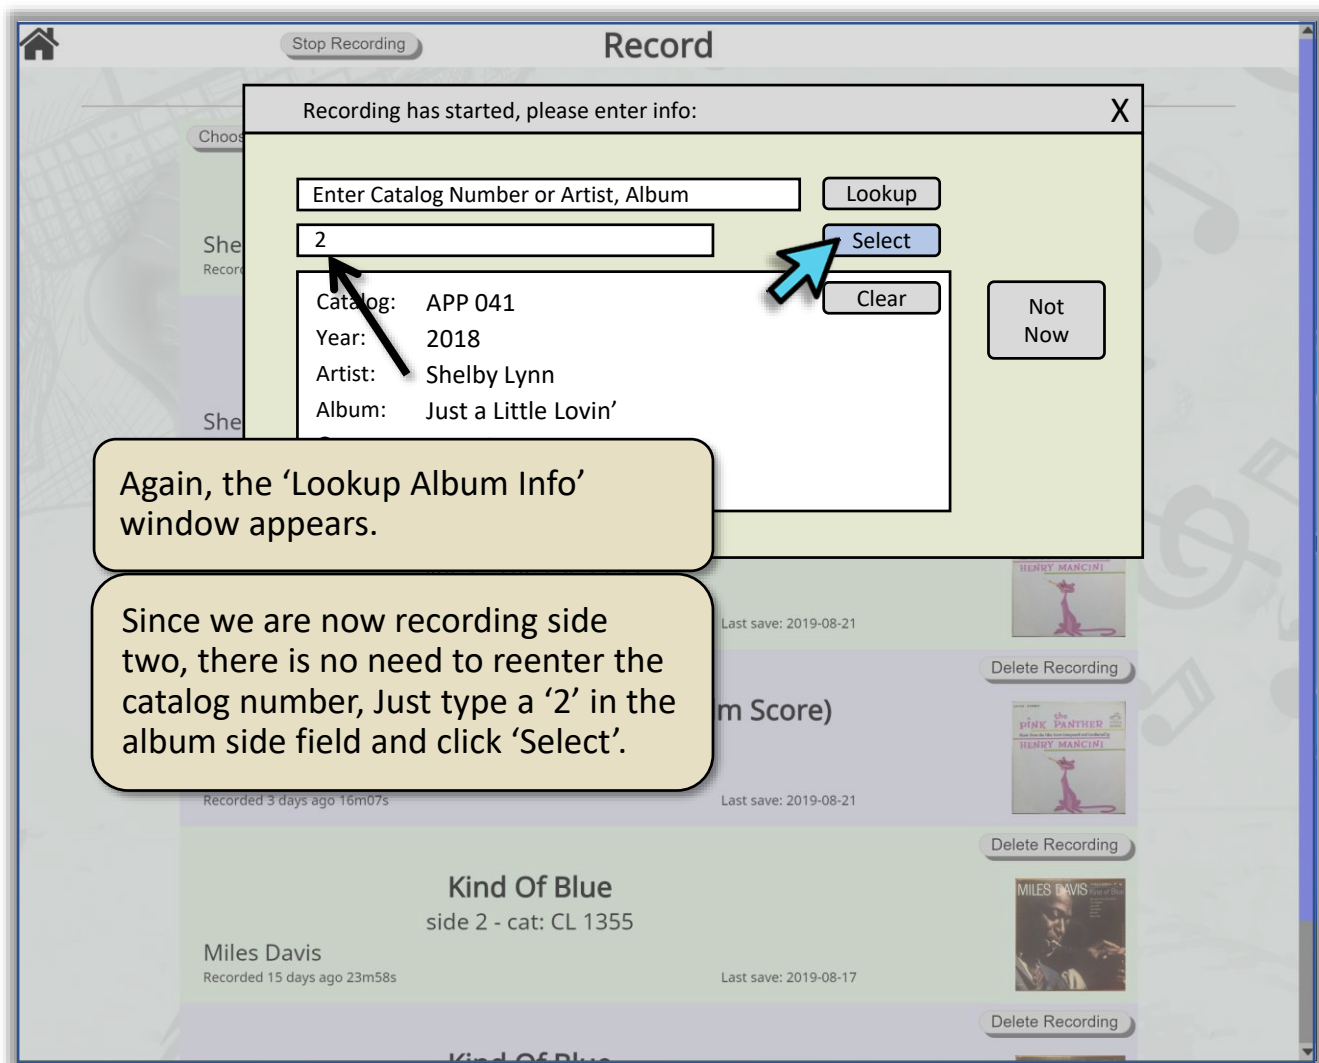

2.07 – Record Function

Start New Recording
Record

In this example we are recording both sides of the album. Side 1 is now complete, click here to start side 2.

Shel Record	Delete Recording 
The Pink Panther (Music From The Film Score) side 2 - cat: LSP-2795 Henry Mancini Recorded 3 days ago 14m10s Last save: 2019-08-21	Delete Recording 
The Pink Panther (Music From The Film Score) side 1 - cat: LSP-2795 Henry Mancini Recorded 3 days ago 16m07s Last save: 2019-08-21	Delete Recording 
Kind Of Blue side 2 - cat: CL 1355 Miles Davis Recorded 15 days ago 23m58s Last save: 2019-08-17	Delete Recording 
Kind Of Blue side 1 - cat: CL 1355 Miles Davis Recorded 15 days ago 24m31s Last save: 2019-08-17	Delete Recording 

2.08 – Record Function

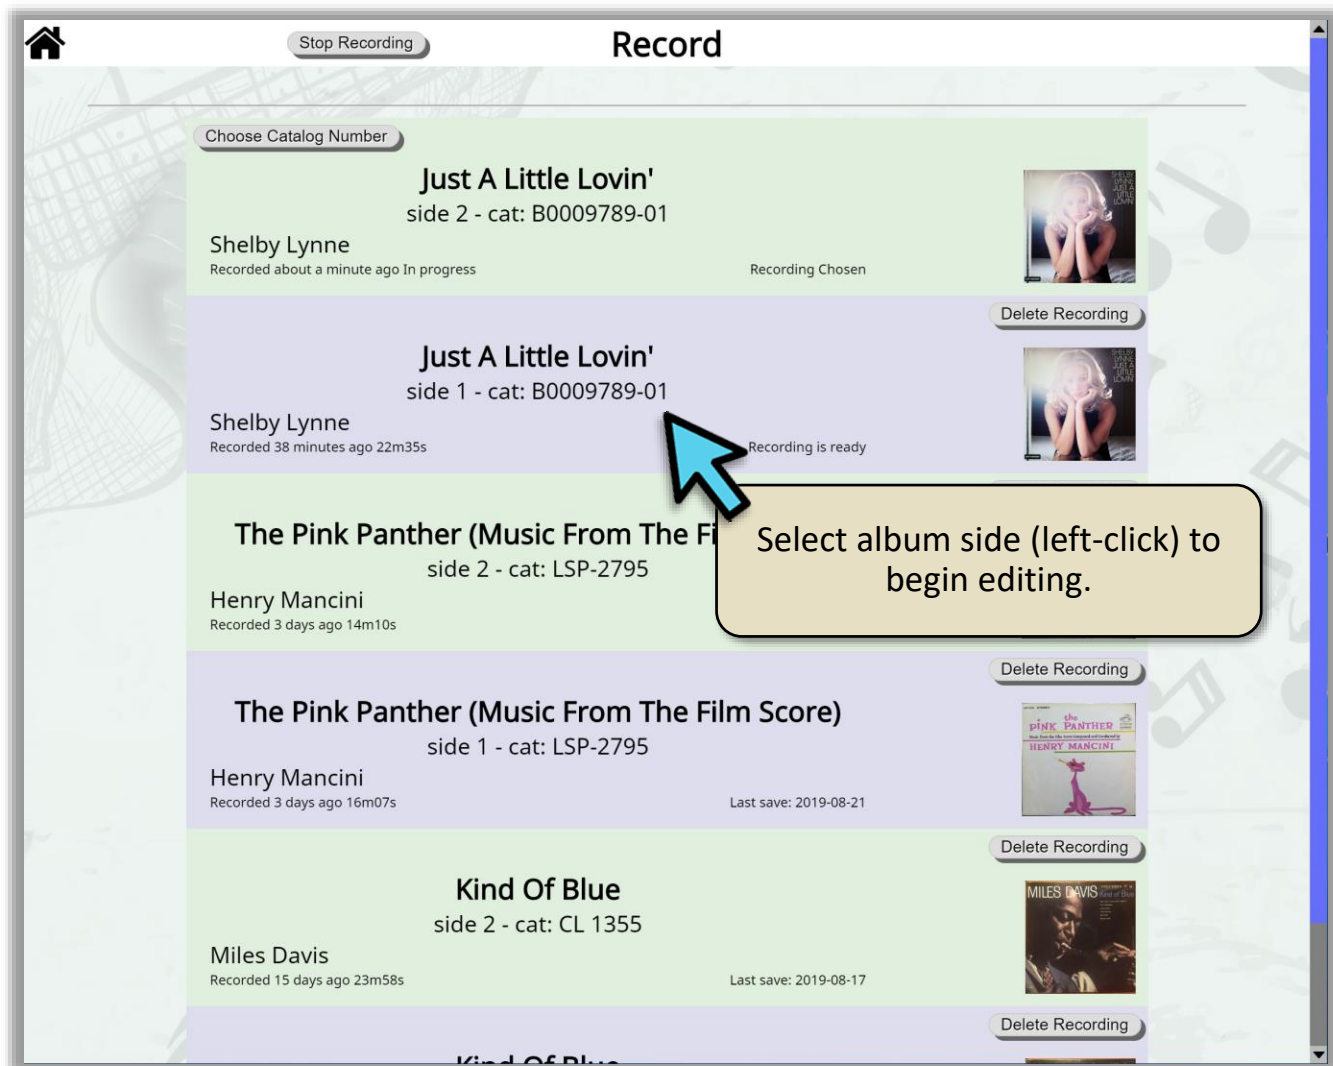

The screenshot shows the 'Record' window in the SugarCube application. A modal dialog is open with the title 'Recording has started, please enter info:'. Inside the modal, there is a text input field labeled 'Enter Catalog Number or Artist, Album' containing the number '2'. To the right of this field are buttons for 'Lookup', 'Select', and 'Clear'. Below the input field, the following information is displayed: Catalog: APP 041, Year: 2018, Artist: Shelby Lynn, and Album: Just a Little Lovin'. A 'Not Now' button is also present. A blue arrow points to the 'Select' button, and a black arrow points to the '2' in the input field. In the background, the 'Kind Of Blue' album by Miles Davis is visible, along with other recording entries and a 'Delete Recording' button.

Again, the 'Lookup Album Info' window appears.

Since we are now recording side two, there is no need to reenter the catalog number, Just type a '2' in the album side field and click 'Select'.

2.10 – Record Function

The screenshot shows the 'Record' interface of the SugarCube application. At the top, there is a 'Stop Recording' button and a 'Record' title. Below this is a 'Choose Catalog Number' button. The main area displays a list of recordings, each with a title, artist, side information, and a 'Delete Recording' button. A blue arrow points to the 'Just A Little Lovin' side 1 - cat: B0009789-01' entry, and a yellow callout box contains the text: 'Select album side (left-click) to begin editing.'

Recording Title	Artist	Side	Catalog Number	Status	Action
Just A Little Lovin'	Shelby Lynne	side 2	B0009789-01	Recording Chosen	
Just A Little Lovin'	Shelby Lynne	side 1	B0009789-01	Recording is ready	Delete Recording
The Pink Panther (Music From The Film Score)	Henry Mancini	side 2	LSP-2795		
The Pink Panther (Music From The Film Score)	Henry Mancini	side 1	LSP-2795	Last save: 2019-08-21	Delete Recording
Kind Of Blue	Miles Davis	side 2	CL 1355	Last save: 2019-08-17	Delete Recording

2.11 – Catalog Lookup

The screenshot shows the 'Record' interface with a 'Start New Recording' button. The main content area displays a catalog lookup for 'Just A Little Lovin' by Shelby Lynne. The interface is divided into sections for different sides of the recording.

Catalog#

Genre Release Year

Album Side Recording

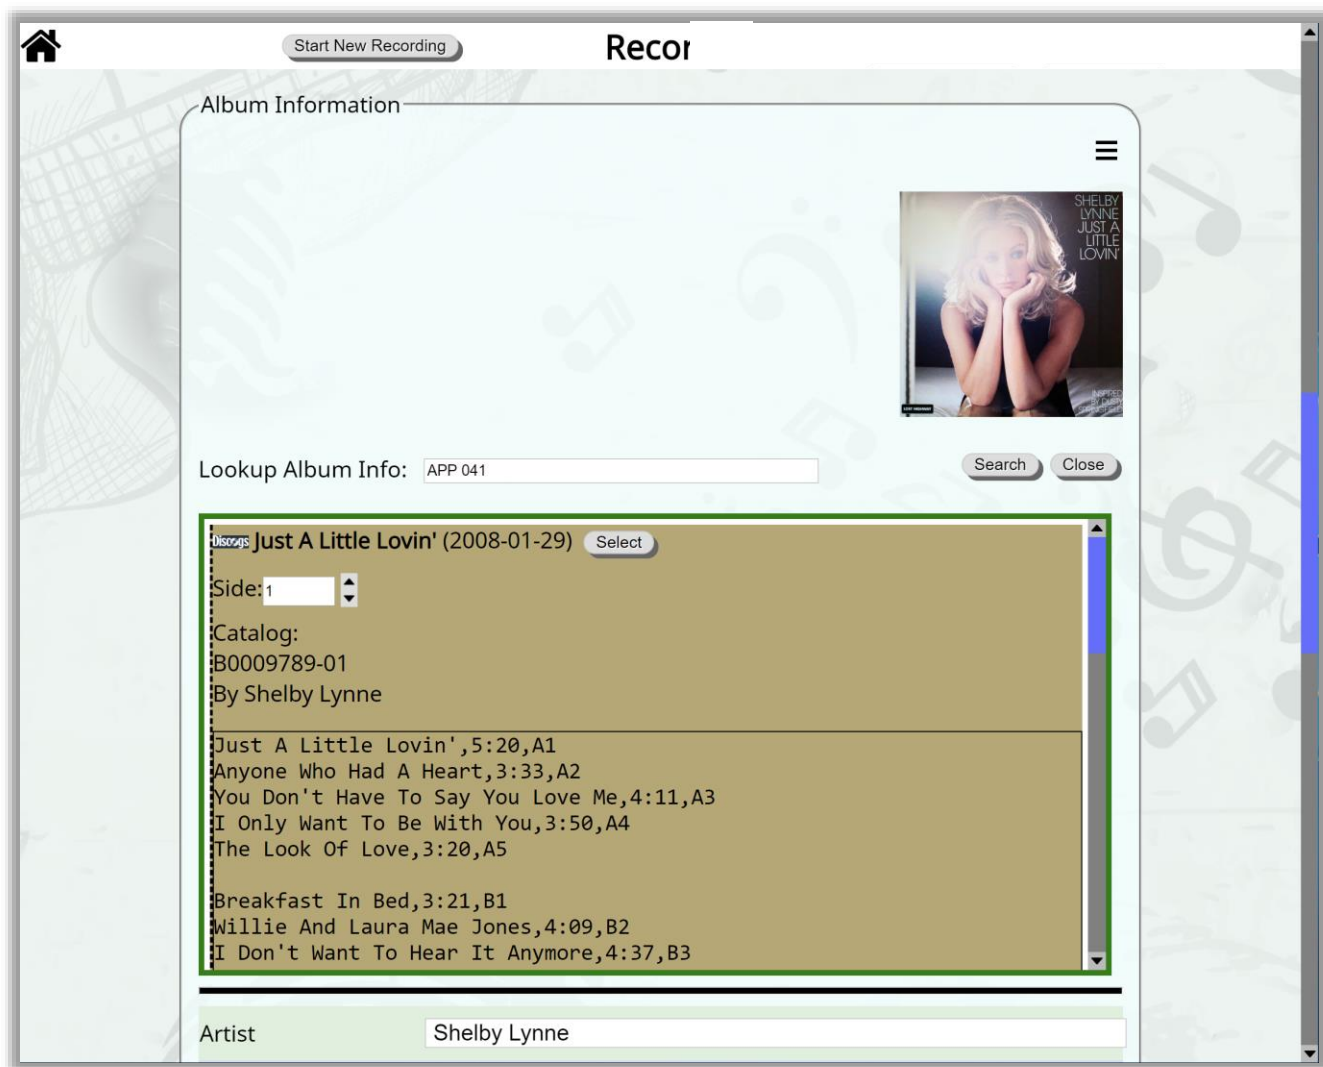

00 Track 1 - Just A Little Lovin' (-1:48 / 4:30)

Apply Track Markers from Left to Right

Use this field to enter the catalog number or artist, album.

- You can enter the catalog number or artist, album if you did not do so when recording was initiated (for instance, if you clicked on the 'Not Now' button on the window that popped up when you pressed record.)
- This is also useful if you are not in front of this web interface and are making one or more recording before accessing these recording functions.
- This will access (or re-access) the online Discogs database so that you can add or change any or all of the album, track, and album art information.

2.13 – Catalog Lookup

Album Information

Lookup Album Info:

Discogs Just A Little Lovin' (2008-01-29)

Just A Little Lovin', 5:20, A1
Anyone Who Had A Heart, 3:33, A2
You Don't Have To Say You Love Me, 4:11, A3
I Only Want To Be With You, 3:50, A4
The Look Of Love, 3:20, A5

Breakfast In Bed, 3:21, B1
Willie And Laura Mae Jones, 4:09, B2
I Don't Want To Hear It Anymore, 4:37, B3

Artist

- The above information from Discogs for this release happens to have the track times as well as track names.
- Please note that not all releases of a particular album will have track times. This is just a deficiency of the Discogs database due to its user supported structure.
- You can easily add the times in the SugarCube recording editor in several different ways as will be illustrated below.

2.14 – Catalog Lookup

- Once you click on 'Select', you will be prompted to okay the update of three elements: (1) the album information; (2) the album artwork; and (3) the track information.
- So, if the album information is already correct, you may choose to click 'Cancel' and it will not be updated but choosing 'Cancel' will NOT stop the confirmation process which will then move on to ask if you want to change the album artwork.
- If the album artwork is already correct you may choose to click 'Cancel' and the album artwork will not be updated. However, choosing 'Cancel' will NOT stop the confirmation process which will then move on to ask if you want to change the track information.
- After it asks to confirm or cancel 'Track Information,' it is done.

2.15 – Catalog Lookup

192.168.1.26:5123 says
Confirm Change Album Art?

OK Cancel

Click 'Ok' to update the album artwork.

Title: L'Arlésienne / Carmen

- If the album artwork is already correct you may choose to click 'Cancel' and the album artwork will not be updated. However, choosing 'Cancel' will NOT stop the process which will then move on to ask if you want to change the track information.
- The artwork is incorrect in this example, so do go ahead and click on 'OK.'

2.16 – Catalog Lookup

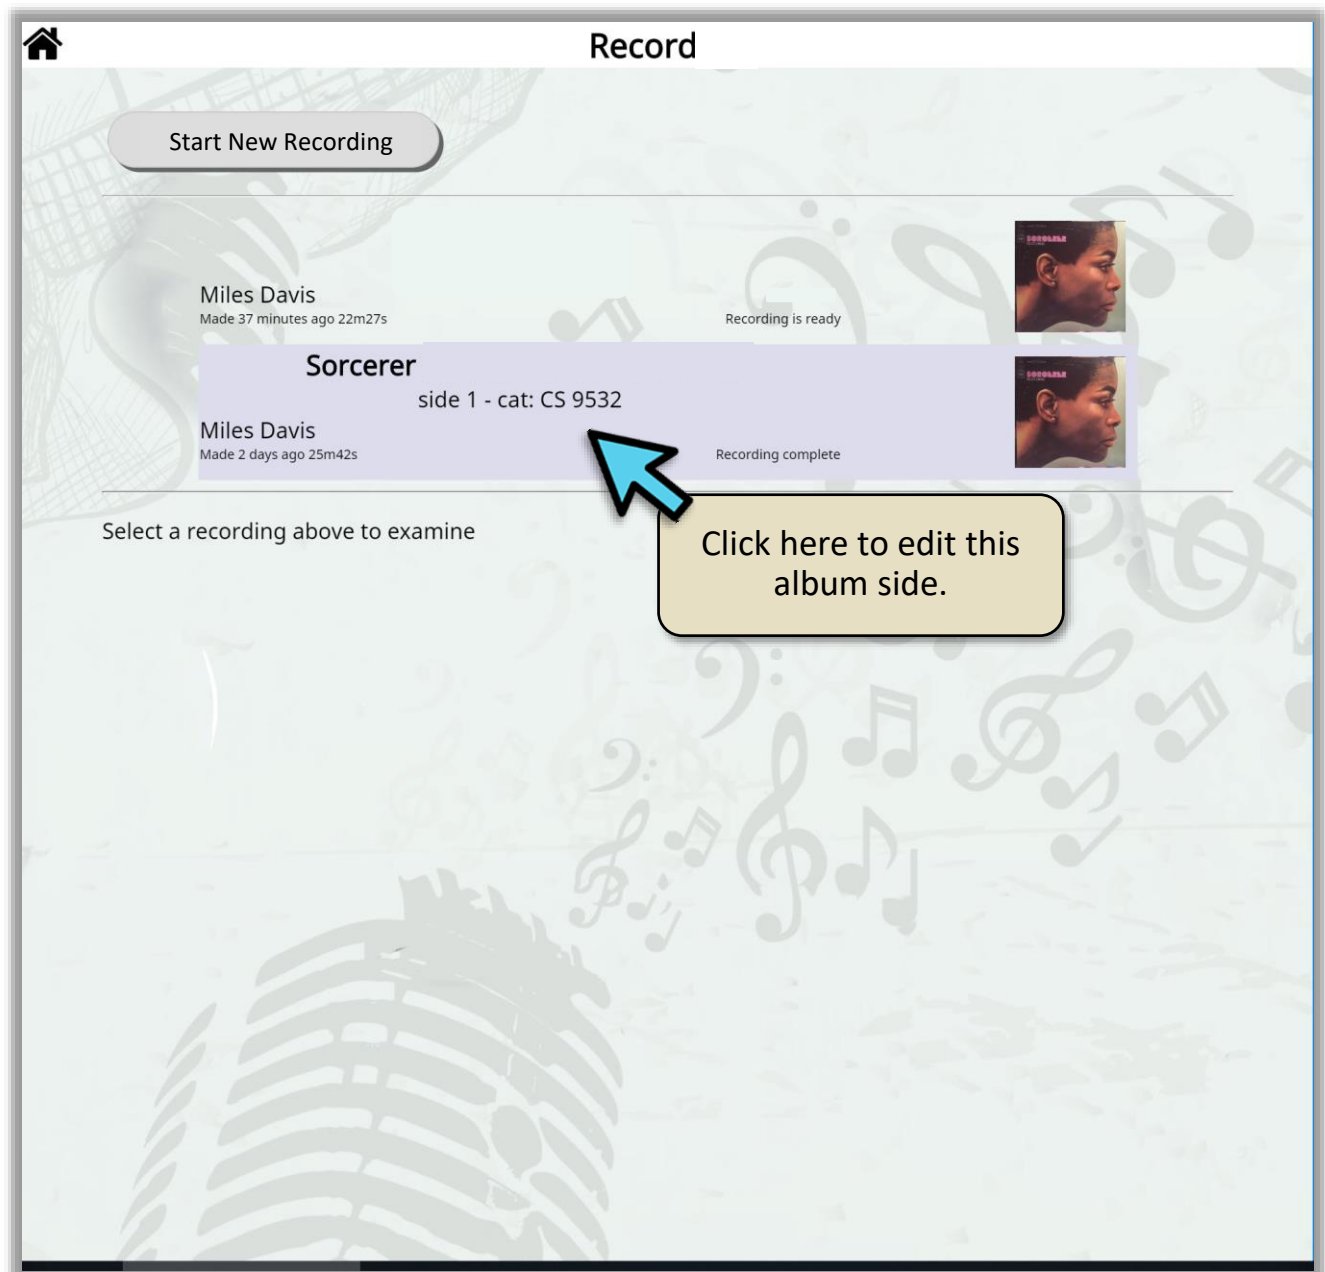

- If the track information is already correct you may choose to click 'Cancel' and it will not be updated.
- Otherwise, click 'OK' and that concludes the three confirmation steps.
- More often than not, the track information is what is most in need of updating, and so you will most often confirm this step.

3.0 Editing Tracks

SugarCube Recording Guide

3.01 – Record Function—Editing Tracks

- We just finished recording side two of Miles Davis ‘Sorcerer.’
- The system has identified the album side and has fetched the artwork.
- The system has finalized the analysis of the audio.
- If the track breaks were found, markers will be in place.
- All done, ready to edit.

- A pane opens containing track and time information as a first approximation of the track times.
- Scroll down to see the album information.

3.03 – Editing Tracks

The screenshot shows the 'Record' interface with a 'Start New Recording' button at the top. Below it is the 'Album Information' section, which includes a 'Lookup Album Info:' field with a placeholder 'Type a catalog number or artist/album info' and a 'Search' button. Below this are several input fields for 'Artist' (Miles Davis), 'Title' (Sorcerer), 'Side' (1), 'Catalog#' (CS 9532), 'Genre' (Jazz), and 'Release Year' (1967). Below the album information is the 'Album Side Recording' section, which includes a play button, a track name '00 Track 1 - Prince Of Darkness (-:46 / 6:20)', and buttons for 'Apply Track Markers from Left to Right', 'Insert Break', 'Delete Marker', and 'Delete All Markers'. A waveform visualization is shown at the bottom of the recording section.

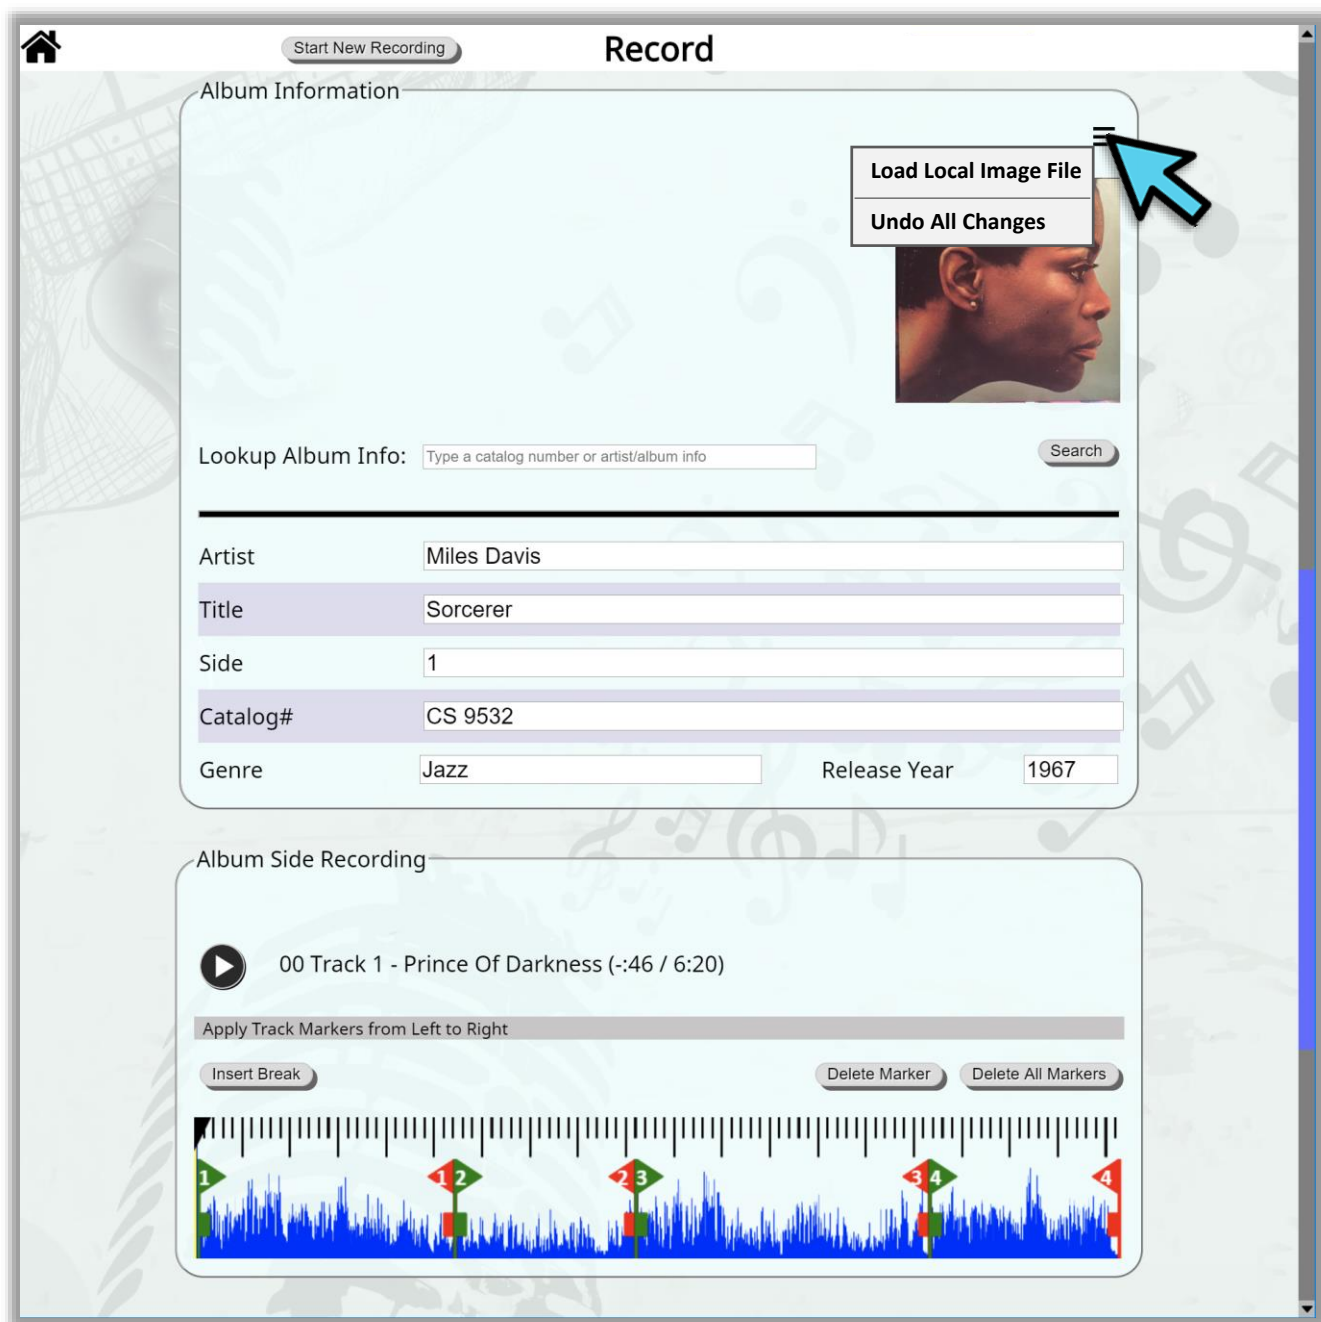

Here you can enter the catalog number (such as CS-9532) or artist, album (such as Miles Davis, Sorcerer.)

Then press 'Search'.

You can directly edit the text in any of the white fields in the album info.

- To add to or change any information, just type directly in any field.
- You can enter the catalog number above to lookup album and track information and the SC-2 will fill the fields with the data found.

- This menu allows you to change the album art or change the album itself. You can delete the album to start again with all your changes removed.
- If the album art is missing (meaning our server couldn't find it) then you can insert a jpg or png file from anywhere that you were able to locate and access one.

3.05 – Editing Tracks

The screenshot shows the SugarCube Recording Guide interface. At the top, there's a 'Record' section with a 'Start New Recording' button. Below it, the 'Album Side Recording' section shows a track titled '00 Track 1 - Prince Of Darkness (-:46 / 6:20)' with a waveform and markers. Below this, the 'Tracks' section lists four tracks for 'Sorcerer - Side 1':

- Sorcerer - Side 1 : Track 1 (Title: Prince Of Darkness)
- Sorcerer - Side 1 : Track 2 (Title: Pee Wee)
- Sorcerer - Side 1 : Track 3 (Title: Masqualero)
- Sorcerer - Side 1 : Track 4 (Title: The Sorcerer)

A context menu is open over Track 1, showing 'Duplicate' and 'Delete' options. A blue arrow points to the 'Delete' button.

- This track submenu enables you to delete a track if, for some reason, there is an extra or partial track.
- You can also duplicate the track if two tracks have no detectable break between them and you would like to create two independent tracks.

You can directly edit the text in any of the white fields in the album info.

- To add to or change any information, just type directly in the desired field.

3.07 – Editing Tracks

The screenshot displays the 'Record' interface of the SugarCube application. At the top, there are fields for 'Genre' (Jazz) and 'Release Year' (1967). Below these, the 'Album Side Recording' section is visible, showing a track titled '00 Track 1 - Prince Of Darkness (-:46 / 6:20)'. A play button icon is located to the left of the track title. A callout box points to this play button, stating: 'You can play the album side here.' Another callout box points to the track title, stating: 'If you have made any changes to any information, it is automatically saved.' Below the track title, there is a timeline with a blue waveform and several colored flags (red, green, blue) indicating markers. A callout box points to these flags, stating: 'You can grab up here to move each flag separately.' Below the timeline, there is a section titled 'Tracks' which lists four tracks: 'Sorcerer - Side 1 : Track 1', 'Sorcerer - Side 1 : Track 2', 'Sorcerer - Side 1 : Track 3', and 'Sorcerer - Side 1 : Track 4'. Each track has a waveform and a title field. A callout box points to the title field of 'Sorcerer - Side 1 : Track 2', stating: 'OR, you can grab here to move the end/start together.' The title field for 'Sorcerer - Side 1 : Track 2' contains the text 'Pee Wee'. The title field for 'Sorcerer - Side 1 : Track 3' contains the text 'Masqualero'. The title field for 'Sorcerer - Side 1 : Track 4' contains the text 'The Sorcerer'.

You can play the album side here.

If you have made any changes to any information, it is automatically saved.

You can grab up here to move each flag separately.

OR, you can grab here to move the end/start together.

- Here you can add or delete tracks.
- You can move markers (flags) together or individually.

3.08 – Editing Tracks

Click here to position the cue on top of the marker to delete.

- Here you can add or delete tracks.
- You can move markers (flags) together or individually.
- Be sure to select 'Save Changes' after editing any text or adjusting any start or end times of the tracks.

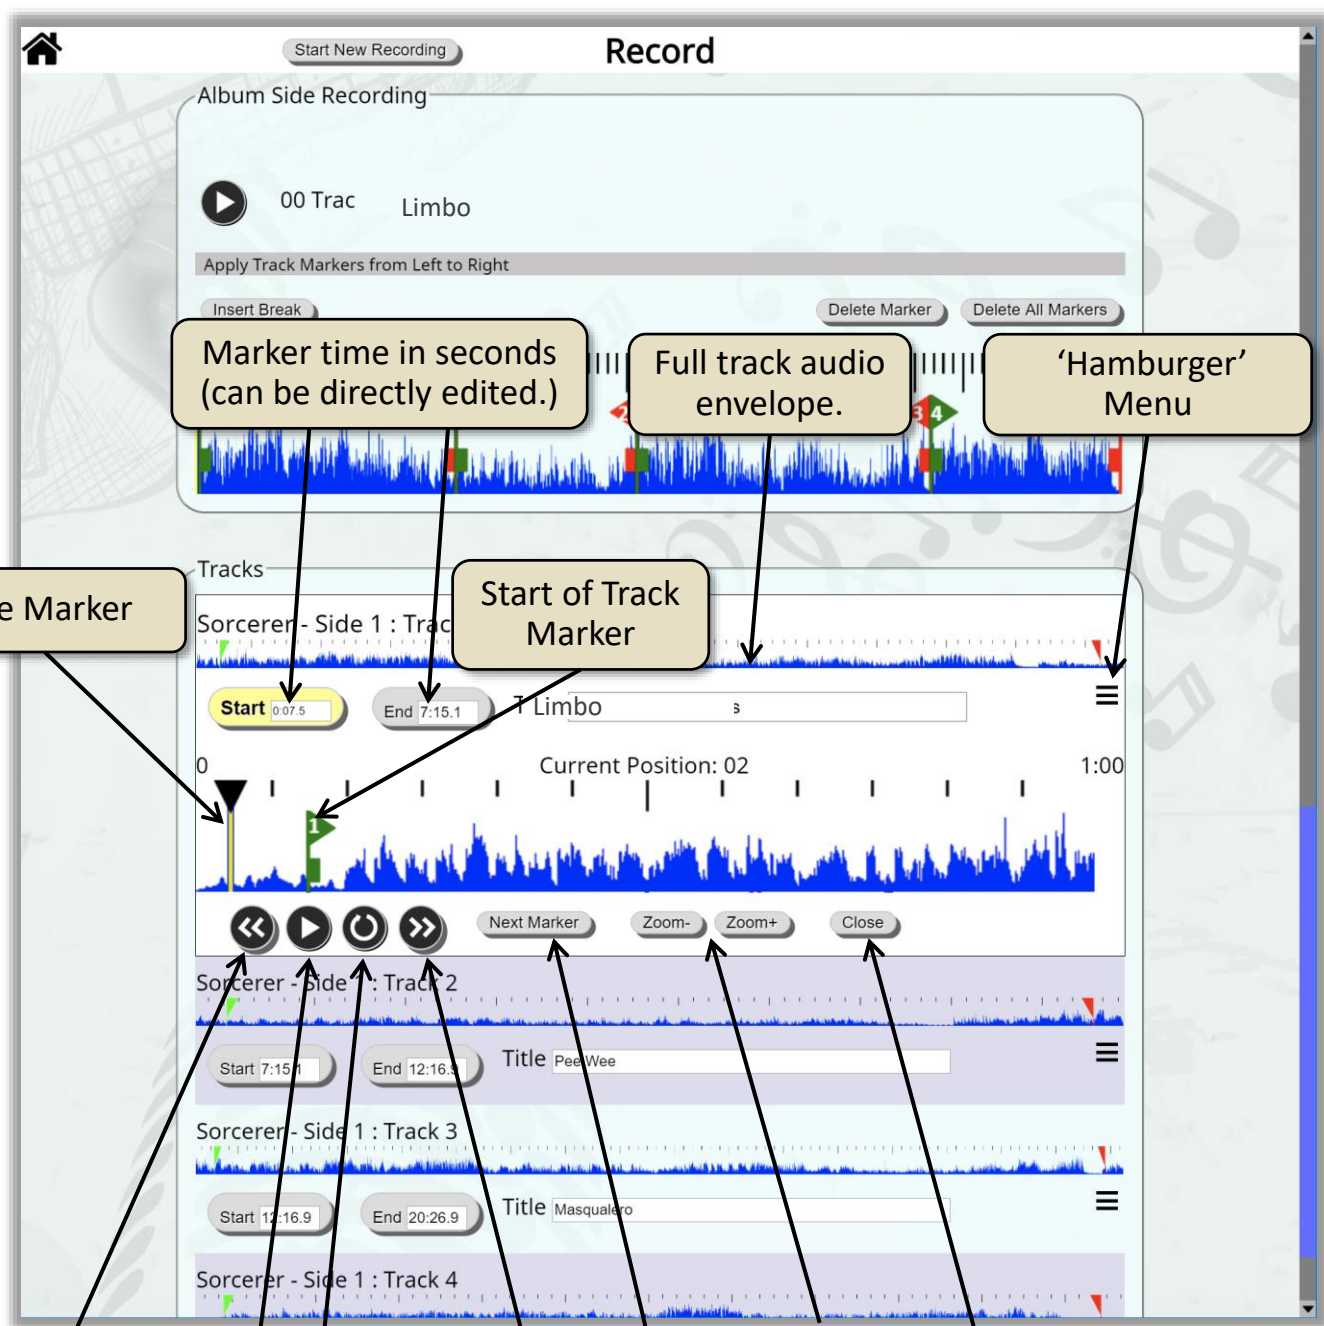

3.09 – Editing Tracks

Click here to edit the start of the track.

- Select (click on) the word 'Start' and an edit window will open (next page).
- It is usually best to begin with 'Start'.
- Note: you can also just directly edit the numbers in the white field of 'Start' or 'End' but that is usually not a good idea since you will want to hear the results of your change.

3.10 – Editing Tracks

3.11 – Editing Tracks

The screenshot displays the SugarCube Recording Guide interface, specifically the 'Record' section. At the top, there are fields for 'Genre' (Jazz) and 'Release Year' (1967). Below these, the 'Album Side Recording' is set to 'Vonetta'. The main track list shows '00 Track 1 - Prince Of Darkness (-:46 / 6:20)'. A callout box points to the 'End' button in the track details, stating 'Click here to edit the end of the track.' Another callout box points to the 'End of Track Marker' (a red triangle) on the waveform, stating 'End of Track Marker'. The track details for 'Prince Of Darkness' show a 'Start' time of 0:07.5 and an 'End' time of 7:15.1. The waveform shows a blue signal with a red triangle marker at the end. Below the track details, there are buttons for 'Next Marker', 'Zoom-', 'Zoom+', and 'Close'. The track list also includes 'Sorcerer - Side 1 : Track 2' (Pee Wee) and 'Sorcerer - Side 1 : Track 3' (Masqualero).

00 Track 1 - Limbo (-:30 / 7:14)

Tracks

You do NOT need to do this but we recommend adding a tag to the album name with additional info.

- It is helpful as your collection grows to have the additional information as part of the album name. There are no standard tags for this information.
- In this example, we added, in parentheses, “**(Col;**” for record label “Columbia”.
- “**(Col; CS 9532**” for the catalog number.
- “**(Col; CS 9532; 1967**” for the release date.
- “**(Col; CS 9532; 1967; A12E)**” in our case A=AMG turntable, 12 is the arm length, and E is for our Etna cartridge; the “**(2)**” means side 2.
- NOTE: you cannot use symbols such as / ? * that are incompatible with your music server. Keep it simple using just () - ;
- This is just a suggestion for making your own tag system. Your archive will last for decades, down the road, you will be happy you took the time.

3.15 – Editing Tracks

The screenshot shows the SugarCube Recording Guide interface. At the top, there's a 'Record' tab and a 'Start New Recording' button. Below this, a track is displayed: '00 Track 1 - Waltz (Allegretto) (-:01 / 2:25)'. A waveform is shown with several track markers (red and green flags) indicating breaks. Below the waveform, there are buttons for 'Insert Break', 'Delete Marker', and 'Delete All Markers'. A section titled 'Tracks' lists five tracks with their start/end times and titles. A callout box points to the waveform, stating: 'This shows the entire album side and where the tracks breaks are currently set.'

Track	Start	End	Title
Faust Ballet Music / Carmen Suite - Side 1 : Track 1	0:01	2:26	Waltz (Allegretto)
Faust Ballet Music / Carmen Suite - Side 1 : Track 2	2:26	6:03	Ensemble(Adagio)
Faust Ballet Music / Carmen Suite - Side 1 : Track 3	6:03	7:34	Dance Of The Nubians
Faust Ballet Music / Carmen Suite - Side 1 : Track 4	7:34	9:02	Cleopatra's Dance
Faust Ballet Music / Carmen Suite - Side 1 : Track 5	9:02	11:26	Dance Of The Trojan Maidens
Faust Ballet Music / Carmen Suite - Side 1 : Track 6			

- The track names and track times are incorrect (just as you would expect with a mis-identified album.)
- However, sometimes the track names are close or even largely correct but the times are off.
- Whatever the case, it is simple to correct the entire album in just a few steps.

Insert Break Delete Marker Delete All Markers

- Now we see the correct information in place.
- The track breaks are largely in the right place but do keep in mind that most turntables are accurate to, at best plus or minus 0.5%.
- So, by the end of the album, the times could be off by as much as +/-10 seconds.

3.17 – Editing Tracks

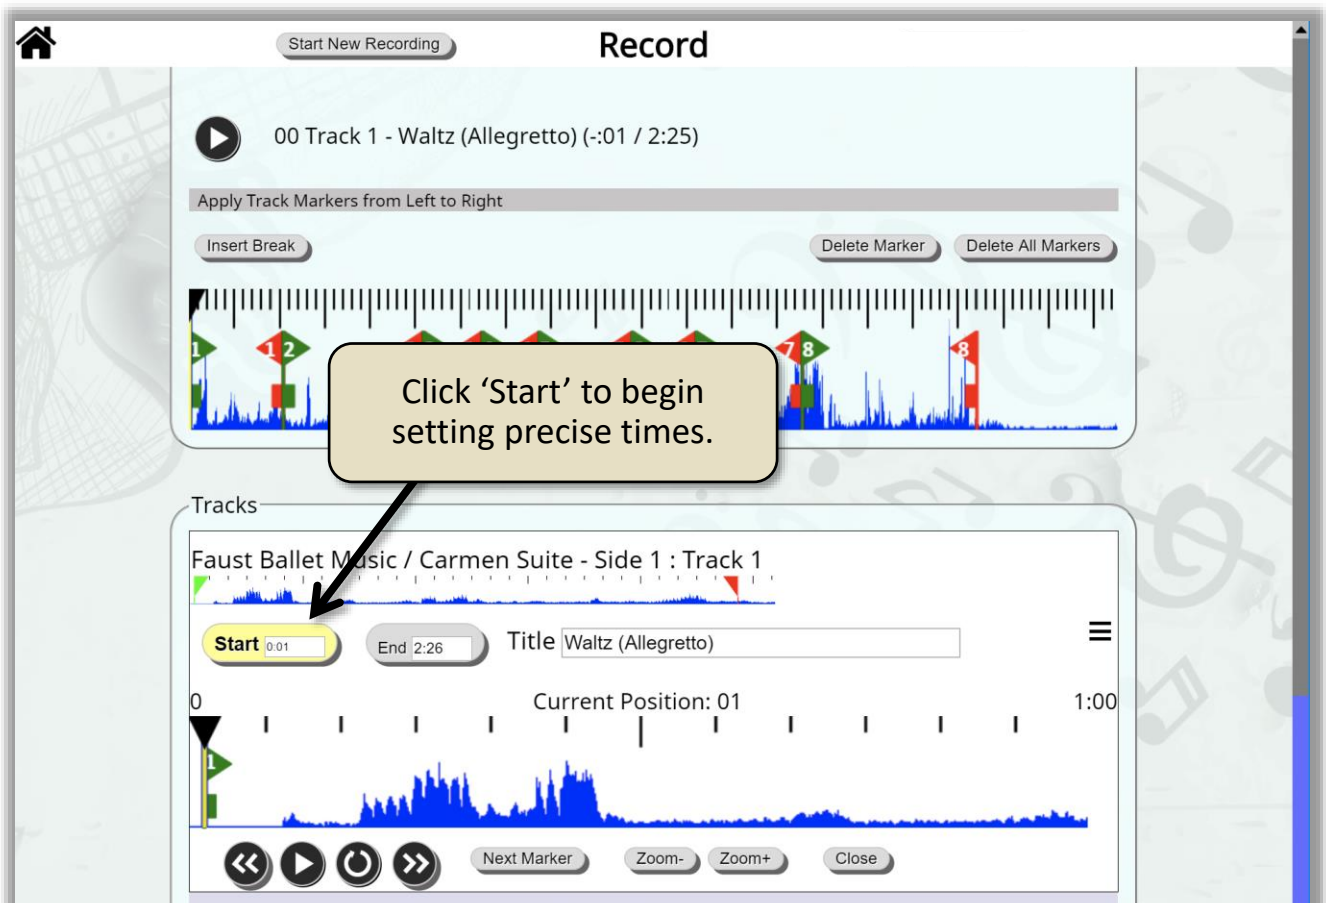

The screenshot displays the 'Record' interface of the SugarCube software. At the top, there is a 'Start New Recording' button and a 'Record' label. Below this, a timeline shows a recording of '00 Track 1 - Waltz (Allegretto) (-:01 / 2:25)'. The timeline includes a ruler with markers and a waveform. Below the timeline, there are buttons for 'Insert Break', 'Delete Marker', and 'Delete All Markers'. The main section is titled 'Tracks' and lists six tracks, each with a waveform, start/end times, and a title:

Track	Start	End	Title
Faust Ballet Music / Carmen Suite - Side 1 : Track 1	0:01	2:26	Waltz (Allegretto)
Faust Ballet Music / Carmen Suite - Side 1 : Track 2	2:26	6:03	Ensemble(Adagio)
Faust Ballet Music / Carmen Suite - Side 1 : Track 3	6:03	7:34	Dance Of The Nubians
Faust Ballet Music / Carmen Suite - Side 1 : Track 4	7:34	9:02	Cleopatra's Dance
Faust Ballet Music / Carmen Suite - Side 1 : Track 5	9:02	11:26	Dance Of The Trojan Maidens
Faust Ballet Music / Carmen Suite - Side 1 : Track 6			

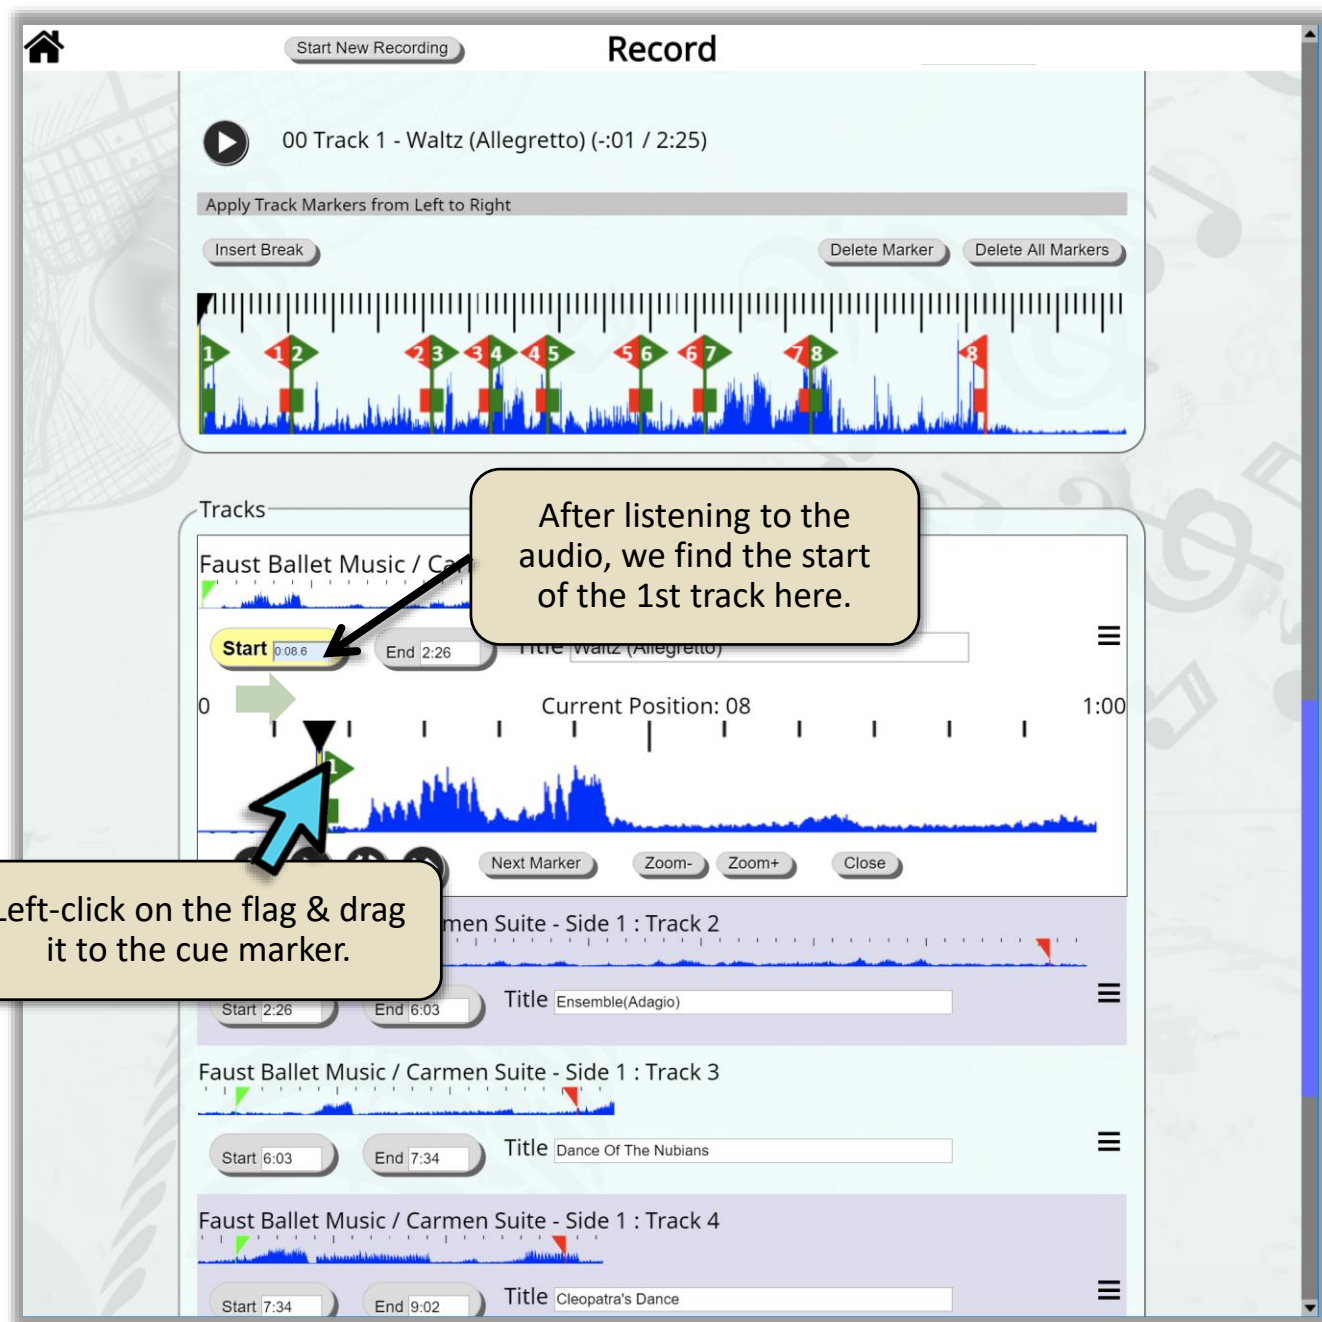

- Scrolling down the page, you will see that the tracks are properly named and start and stop times are in roughly the correct place.

3.18 – Editing Tracks

- Getting the 'Start' and 'End' markers right where they need to be can be done relatively quickly.
- First click on 'Start' of Track 1, listen for the beginning of the first track, move the flag to the correct time, then click on 'Next Marker'.
- Next, do the same adjustment for the 'End' marker.
- When that is set, next click on 'Next Marker' again. This time, the focus will jump to the 'Start' marker of the next track and it will already be in place just after the 'End' flag you just set.
- Continue on to the end which will generally require just one adjustment per track.

After listening to the audio, we find the start of the 1st track here.

Left-click on the flag & drag it to the cue marker.

3.20 – Editing Tracks

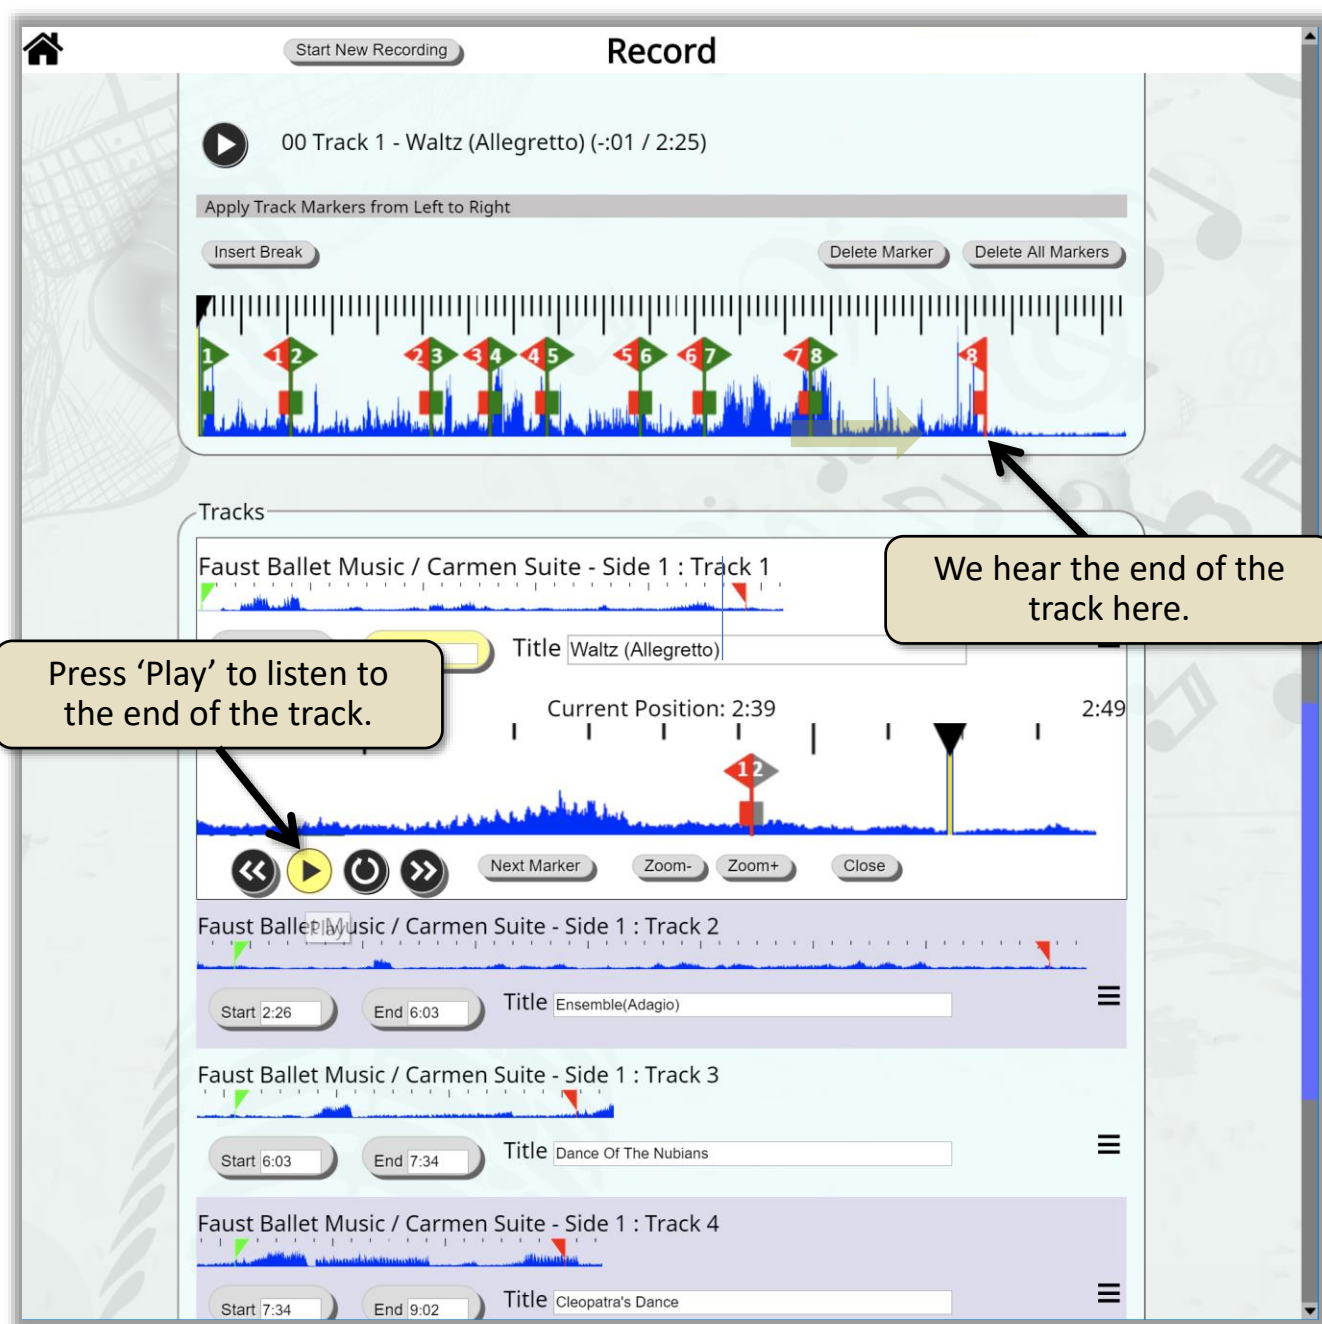

The screenshot displays the SugarCube recording software interface. At the top, there is a 'Record' button and a 'Start New Recording' button. Below this, a track titled '00 Track 1 - Waltz (Allegretto) (-:01 / 2:25)' is shown. A timeline at the top of the track area displays track markers from 1 to 8, with a ruler above them. Below the timeline are buttons for 'Insert Break', 'Delete Marker', and 'Delete All Markers'. The main section of the interface is titled 'Tracks' and lists four tracks:

- Track 1: Faust Ballet Music / Carmen Suite - Side 1 : Track 1. It has a 'Start' time of 0:08.6, an 'End' time of 2:26, and a 'Title' of 'Waltz (Allegretto)'. The current position is 0:08. Below the waveform, there are navigation buttons: '<<', '<', 'Play/Pause', '>', '>>', 'Next Marker', 'Zoom-', 'Zoom+', and 'Close'. An arrow points from a text box to the 'Next Marker' button.
- Track 2: Faust Ballet Music / Carmen Suite - Side 1 : Track 2. It has a 'Start' time of 2:26.
- Track 3: Faust Ballet Music / Carmen Suite - Side 1 : Track 3. It has a 'Start' time of 6:03.
- Track 4: Faust Ballet Music / Carmen Suite - Side 1 : Track 4. It has a 'Start' time of 7:34, an 'End' time of 9:02, and a 'Title' of 'Cleopatra's Dance'.

A text box with a black border and a drop shadow contains the instruction: "Click on 'Next Marker' to jump to track 1's End marker."

3.24 – Editing Tracks

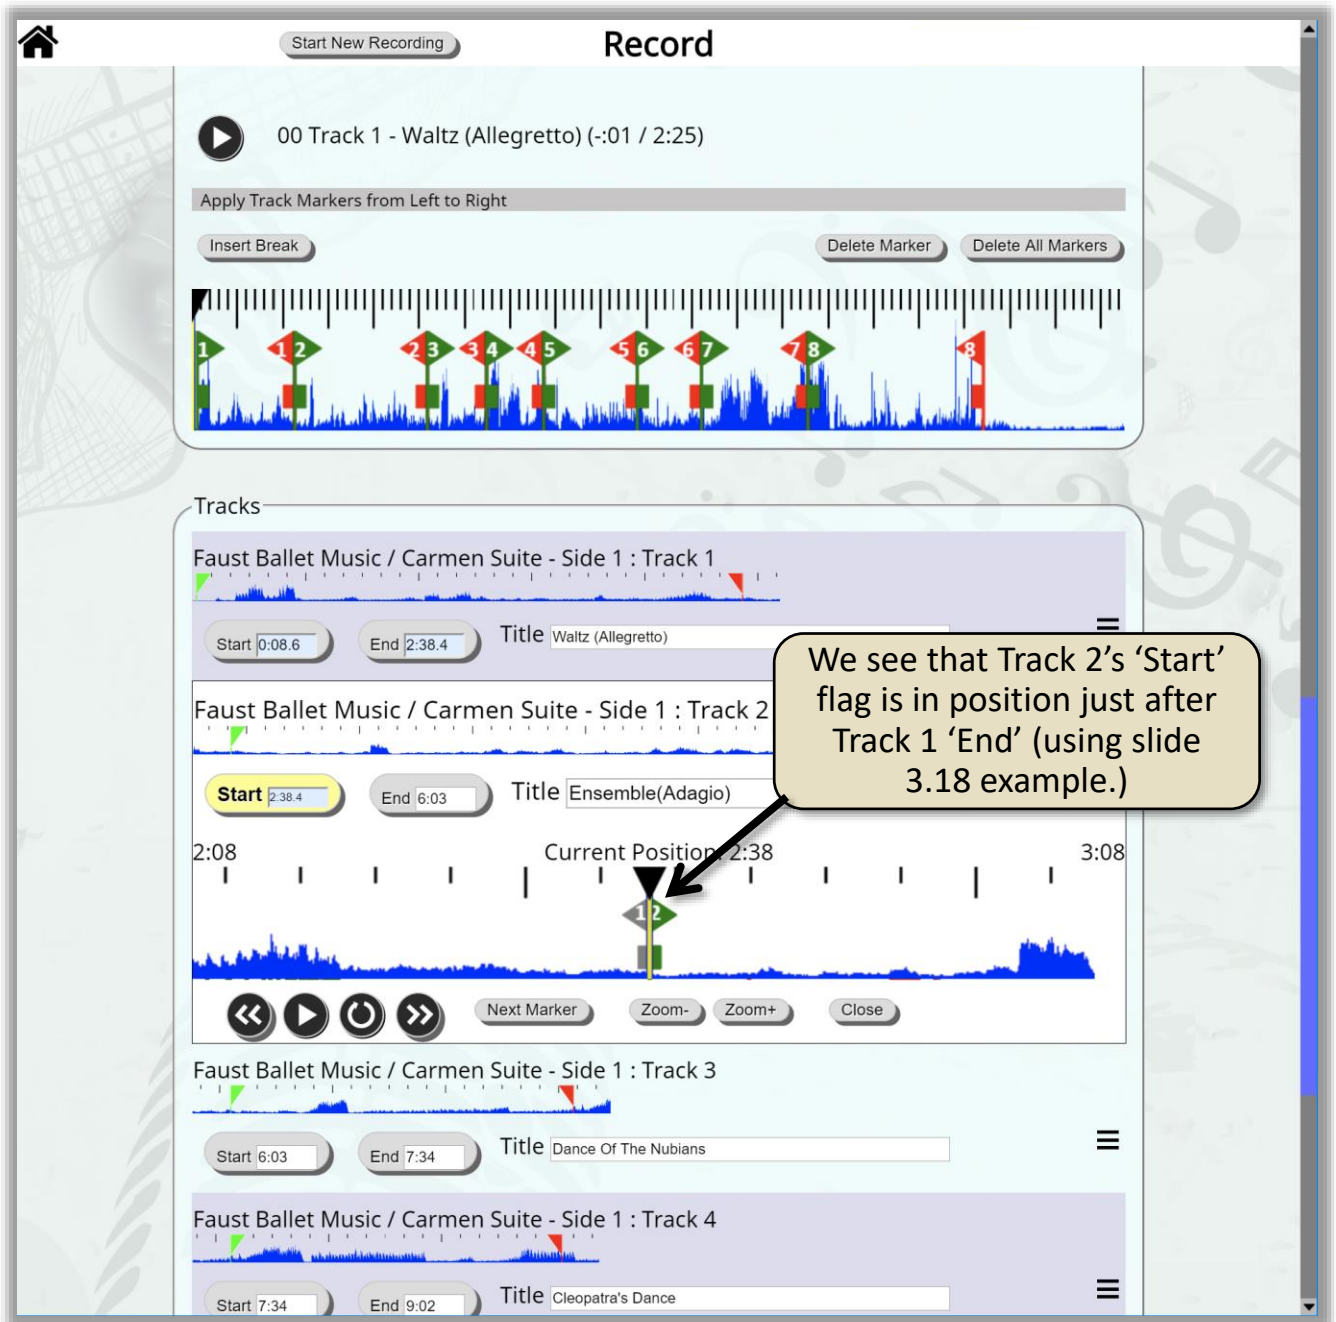

The screenshot displays the SugarCube recording interface. At the top, there is a 'Record' button and a 'Start New Recording' button. Below this, a track titled '00 Track 1 - Waltz (Allegretto) (-:01 / 2:25)' is shown. A timeline at the top of the track area displays track markers from 1 to 8, with a 'Delete Marker' and 'Delete All Markers' button. Below the track area, a 'Tracks' section lists four tracks:

- Track 1: Faust Ballet Music / Carmen Suite - Side 1 : Track 1. Start: 0:08.6, End: 2:38.4, Title: Waltz (Allegretto). Current Position: 2:38.
- Track 2: Faust Ballet Music / Carmen Suite - Side 1 : Track 2. Start: 2:38.4, End: 6:03, Title: 5th Movement.
- Track 3: Faust Ballet Music / Carmen Suite - Side 1 : Track 3. Start: 6:03, End: 7:34, Title: 6th Movement.
- Track 4: Faust Ballet Music / Carmen Suite - Side 1 : Track 4. Start: 7:34, End: 9:02, Title: Cleopatra's Dance.

A callout box with an arrow pointing to the 'Next Marker' button in the Track 1 controls contains the text: "Click on 'Next Marker' to move to the start of Track 2."

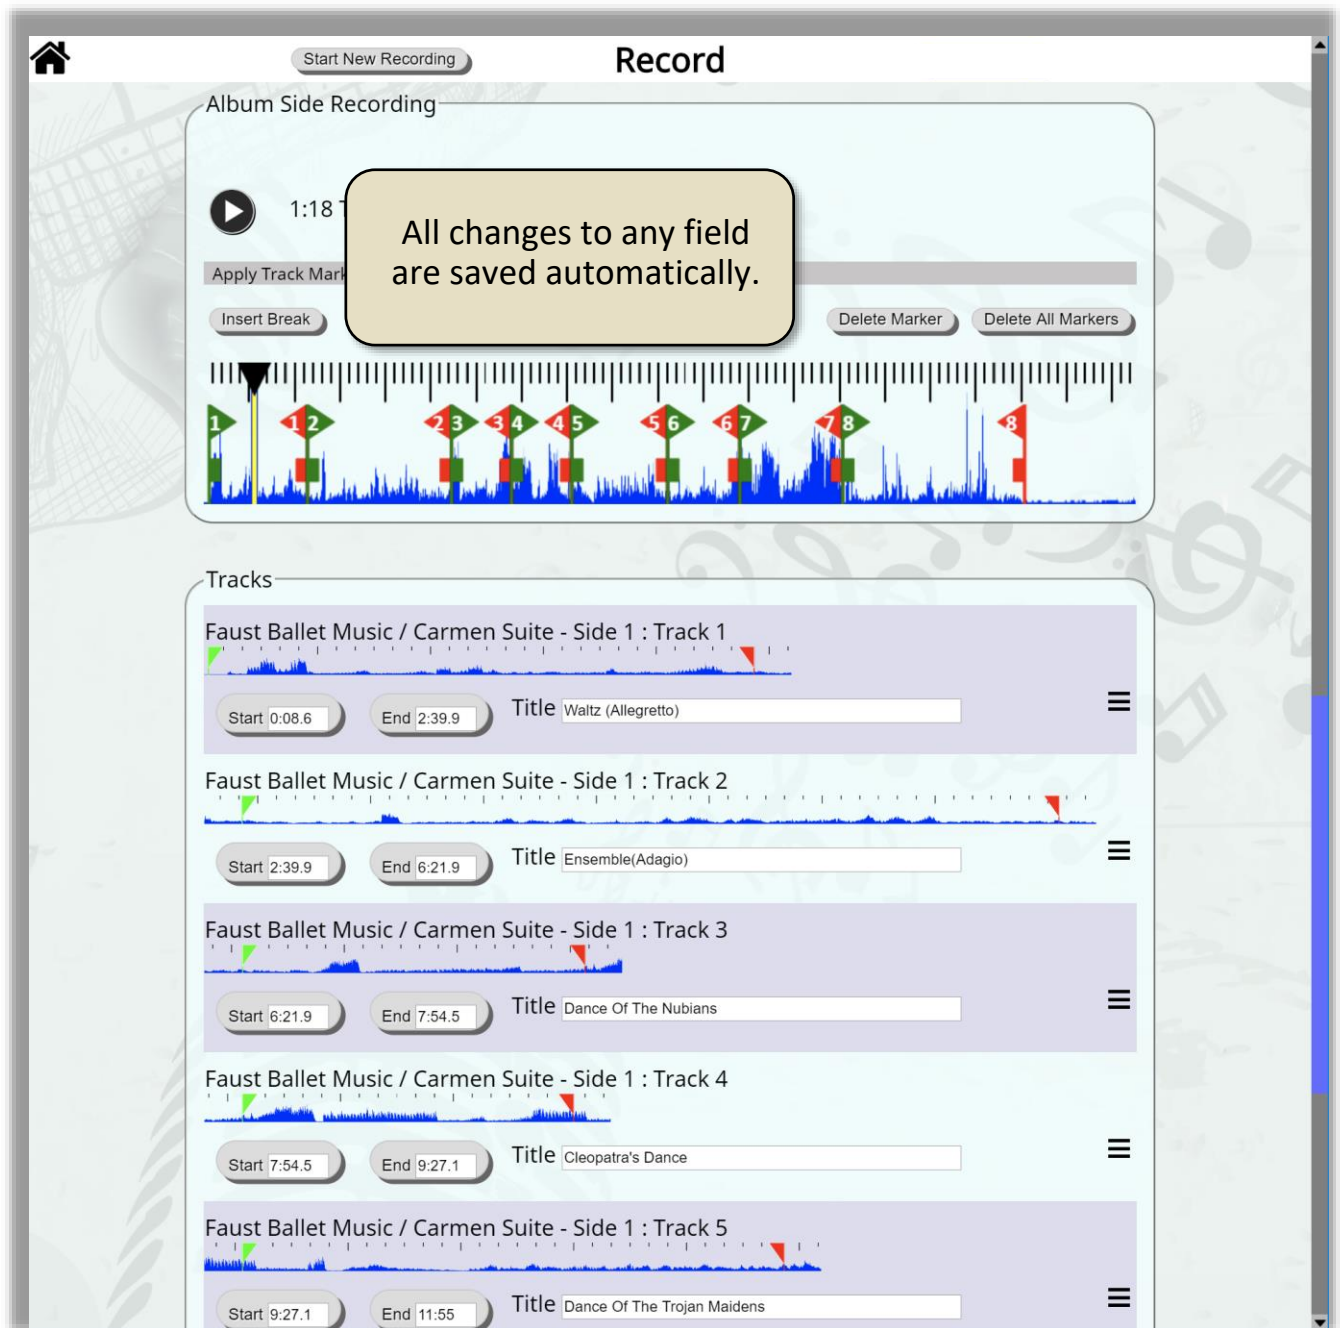

3.25 – Editing Tracks

The screenshot displays the SugarCube Recording Guide interface. At the top, there's a 'Record' button and a 'Start New Recording' button. Below this, a timeline shows 'Track 1 - Waltz (Allegretto)' with a duration of 00:01 / 2:25. A callout box points to the 'Start' flag of Track 2, stating: "We see that Track 2's 'Start' flag is in position just after Track 1 'End' (using slide 3.18 example.)". The 'Tracks' section shows four tracks: Track 1 (Waltz), Track 2 (Ensemble), Track 3 (Dance Of The Nubians), and Track 4 (Cleopatra's Dance). Each track has a 'Start' and 'End' time and a 'Title' field. The interface also includes playback controls like 'Next Marker', 'Zoom-', 'Zoom+', and 'Close'.

- You may find that this automatic placement of the Start flag of the next track against the End flag of the previous track is really all you need.
- Otherwise, feel free to move it to the right to reduce the gap between tracks by grabbing the top (green triangle with '2').
- Or, you can even move the Start flag left before the end of the previous track for situations such as live albums or crossfaded tracks.

4.05 – Preparing to Save Tracks

The screenshot shows the 'Store Recordings' interface in the SugarCube application. At the top, there is a 'Save Files' button and a 'Select All' dropdown menu. Below this, three music albums are listed, each with a checkbox on the left and a thumbnail image on the right.

- Album 1 (White background):** 'Just A Little Lovin'' by Shelby Lynne. side 2 - cat: B0009789-01. Recorded 3 days ago 22m19s. Last save: 2019-08-24. 5 Tracks: Breakfast In Bed (3m53s), Willie And Laura Mae Jones (3m09s), I Don't Want To Hear It Anymore (4...)
- Album 2 (Light Green background):** 'The Pink Panther (Music From The Film Score)' by Henry Mancini. side 2 - cat: LSP-2795. Recorded 6 days ago 14m10s. Last save: 2019-08-21. 6 Tracks: It Had Better Be Tonight (Vocal) (1m58s), Cortina (1m57s), The Lonely Princess (2m31s), Somethin...
- Album 3 (Light Purple background):** 'The Pink Panther (Music From The Film Score)' by Henry Mancini. side 1 - cat: LSP-2795. Recorded 6 days ago 16m07s. Last save: 2019-08-24.

A blue arrow points to the checkbox of the second album, 'The Pink Panther (Music From The Film Score)'. A yellow callout box with a black border contains the text: 'Click to select each album side that you wish to save to USB.'

SugarCube Quick Start Recording Guide

Choosing Album-Side and Track Formats & Post-Processing

The image displays two side-by-side screenshots of the SugarCube software interface, illustrating the configuration for file saving. Both screenshots show a sidebar on the left with buttons for 'Recordings to Edit', 'Edit Album Info', 'Edit Track Breaks', 'Trim Tracks', 'Recordings to Save', 'Album-Side Format', 'Track Format', 'Save Status', and 'Help'. The main area is divided into sections for 'Album Side Format' and 'Track Format'.

Left Screenshot (a. Album-Side file saving configuration):

- Album Side Format:**
 - Click Removal:** Sensitivity is set to 5. The 'Off' radio button is selected.
 - Normalization:** Below Full Scale (dB) is set to 0. The 'Enabled' radio button is selected.
 - Format:** Format is set to FLAC, Sample Rate to 192KHz, and Sample Size to 24 bit.
 - Save Whole Album Sides?:** The 'no' radio button is selected.

Right Screenshot (b. Individual track file saving configuration):

- Track Format:**
 - Click Removal:** Sensitivity is set to 5. The 'Enabled' radio button is selected.
 - Normalization:** Below Full Scale (dB) is set to 0. The 'Enabled' radio button is selected.
 - Format:** Format is set to FLAC, Sample Rate to 96KHz, and Sample Size to 24 bit.
 - Save Individual Tracks?:** The 'yes' radio button is selected.

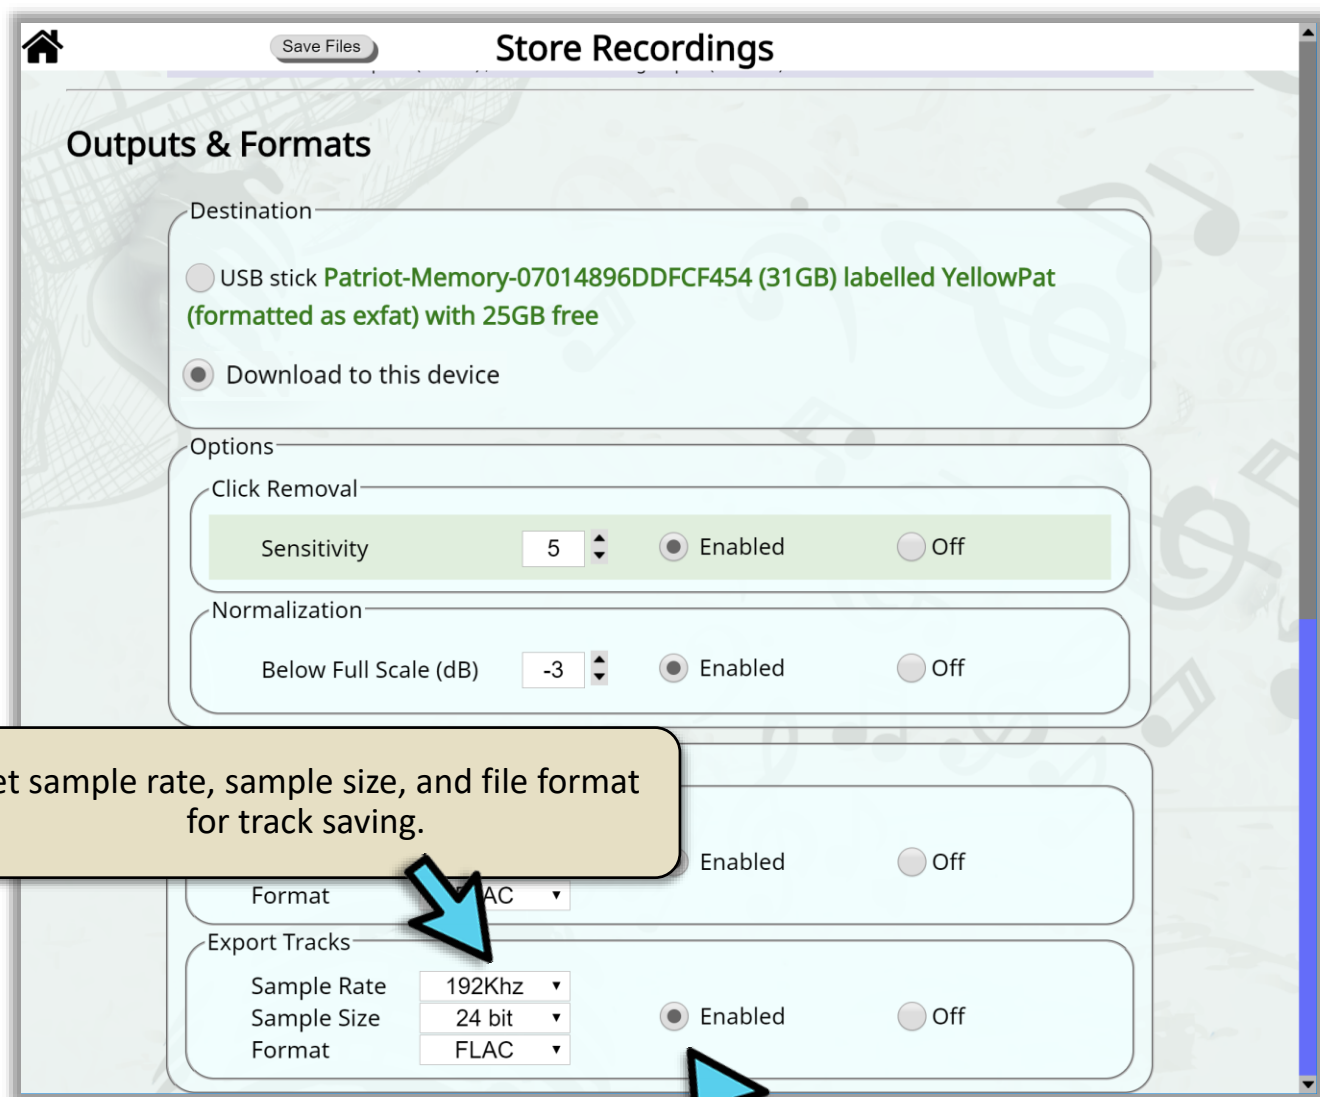

Annotations:

- For example, turning off Click Removal for Album-Side archiving.** (Points to the 'Off' radio button in the left screenshot's Click Removal section.)
- Click Removal is set on for track saves.** (Points to the 'Enabled' radio button in the right screenshot's Click Removal section.)
- Normalization adjusts the overall volume of the whole side whether saving an album side or individual tracks. The number is in decibels below full-scale. We recommend keeping it on for both.** (Points to the 'Enabled' radio button in the left screenshot's Normalization section.)
- Setting file format parameters** (Points to the Format section in the left screenshot.)
- We have disabled saving album sides for this example session.** (Points to the 'no' radio button in the left screenshot's Save Whole Album Sides? section.)
- Go to the file save status page** (Points to the 'Save Status' button in the right screenshot.)

4.11 – Saving Tracks

- The SugarCube will now process the selected album sides and output files (in the formats selected) to this device (your laptop or desktop.)
- If 'Click Repaired' was selected, clicks and pops will be removed from each track. If for some reason you want raw tracks, select 'Not Processed'.
- 'Normalization' sets the level of the loudest track on its album side to whatever dB below full scale has been set. (We recommend: -1 dB)
- Note: you can make multiple passes using different formats. For example, you could have high-res uncompressed files and then run the process again to make mp3's for your mobile phone or car.

4.12 – Saving Tracks

The screenshot shows the 'Store Recordings' page in the SugarCube application. At the top, there is a home icon, a 'Save Files' button, and the title 'Store Recordings'. Below this, the text 'Files Transferred From SugarCube' is followed by a link: '[Click Here to Save to Local File System](#)'. The 'Saved Files' section shows 'Done (8 - about 8 hours ago)'. A blue arrow points from this section to a yellow callout box that says 'Click here to open a window to select where to save the files.' Below the 'Recordings' section, there is a 'Select All' button. The recordings are listed in a table-like format with alternating green and purple background colors. Each entry includes a checkbox, the track name 'Just A Little Lovin'', the artist 'Shelby Lynne', recording details, and a thumbnail image.

- This 'File Save' window will allow you to save to a NAS if it is visible to this device.
- You can also save to any location accessible by your device (Windows, Mac, tablet, etc.)

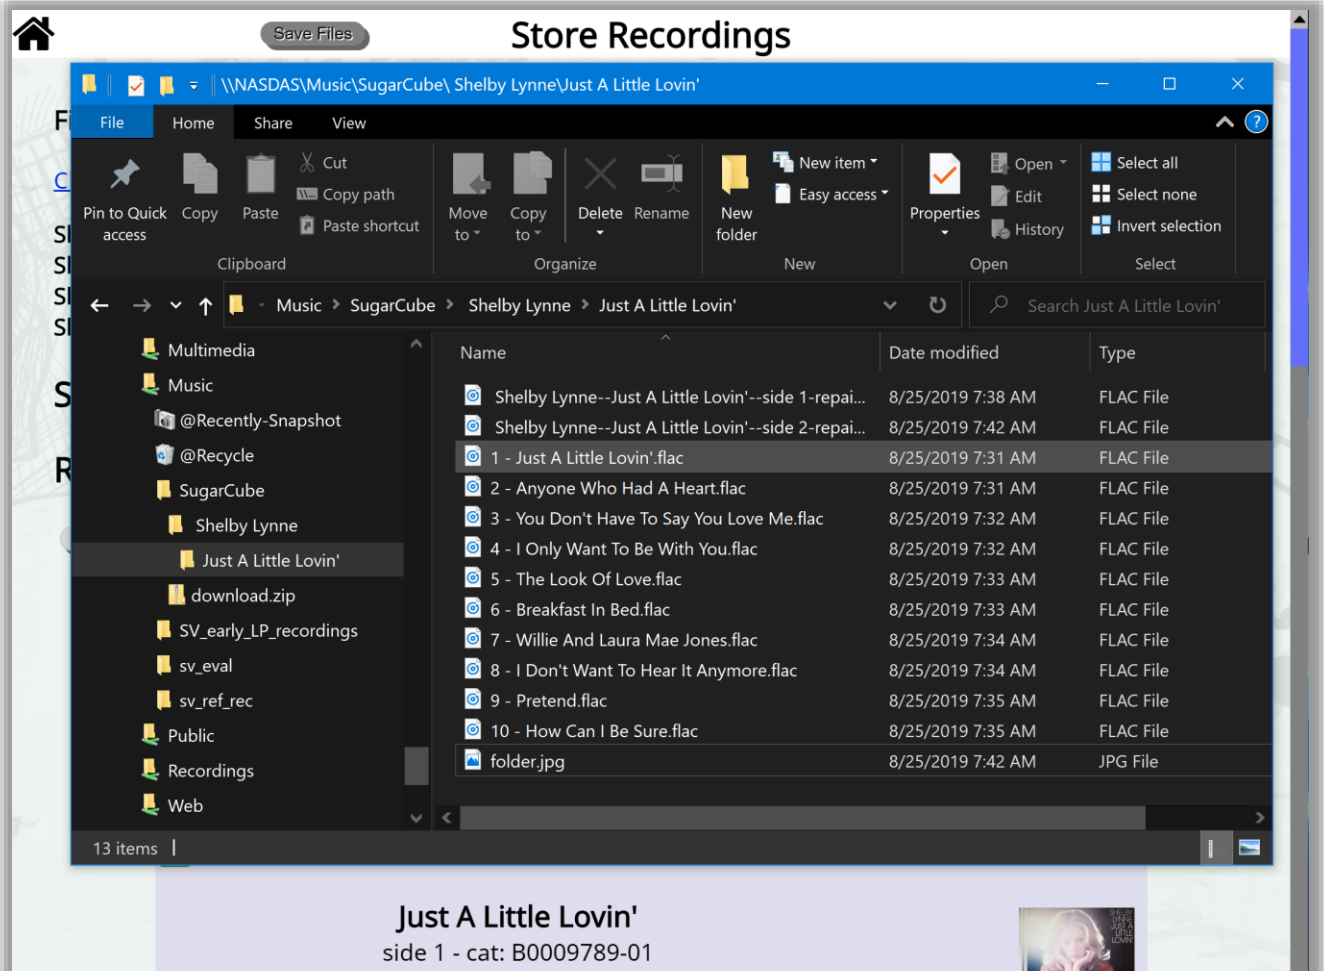

4.14 – Saving Tracks

4.15 – Saving Tracks

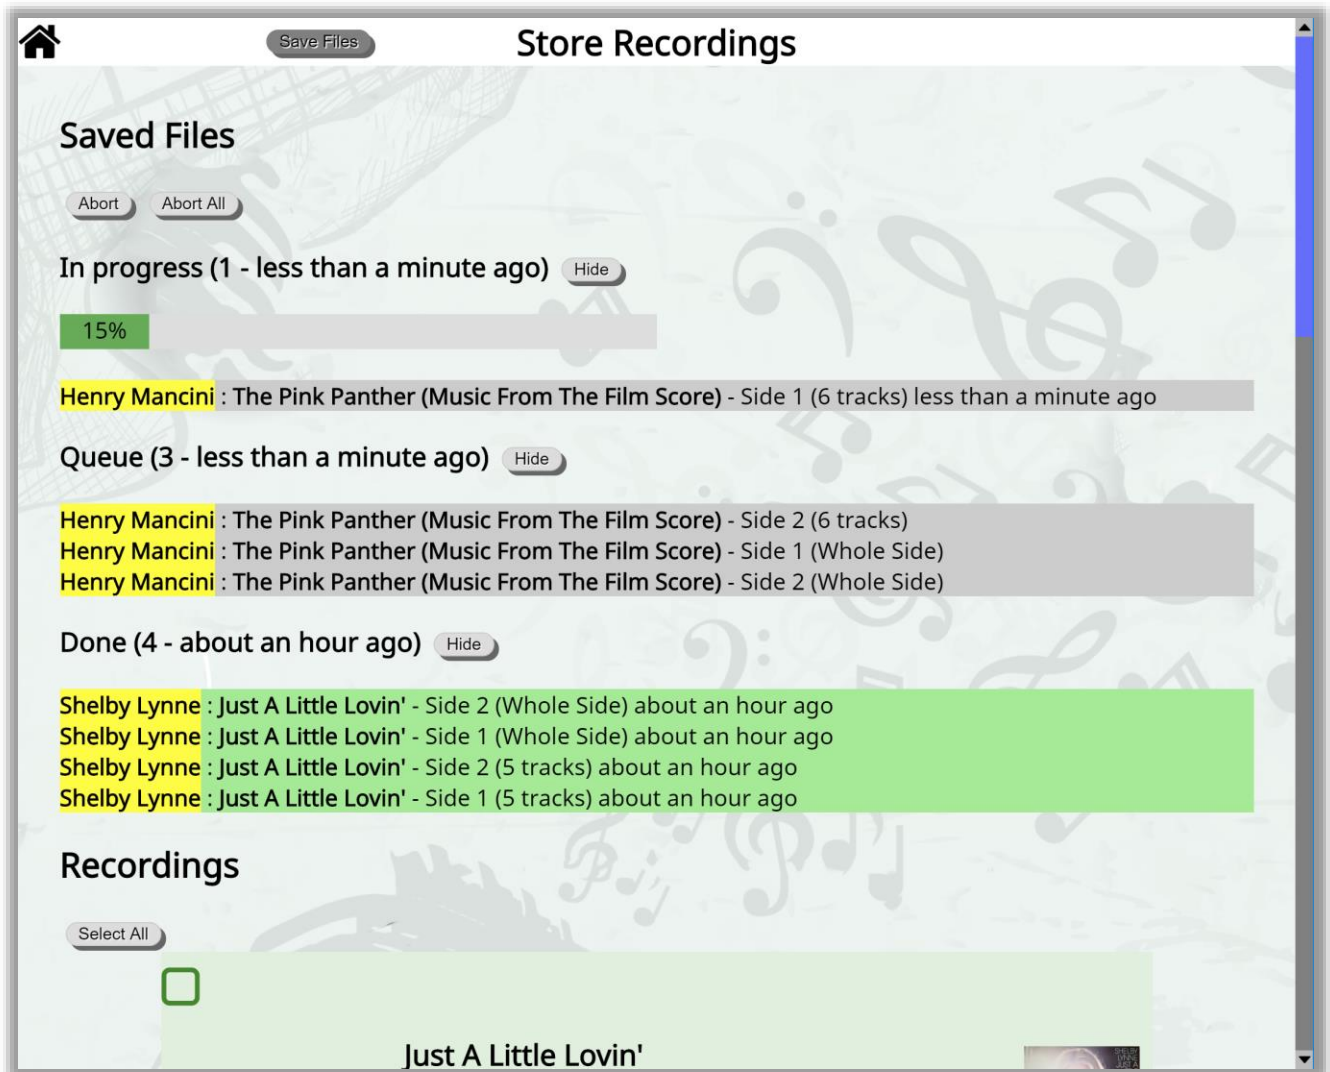

4.16 – Saving Tracks

- Inside the artist folder are the one or more album folders.
- Inside each album folder are, in the example above, the album sides and the individual tracks that were selected in the previous steps.
- Please note: if you wish to save many artists and/or many albums at once, the total size may be greater than 2 GB in which case the zip folder will come across as a .tar type compressed folder.
- If you routinely save very large numbers of recordings, please download and install either 'WinRAR' or '7z', both are reliable shareware utilities for decompressing any know file format from any operating system.

4.17 – Saving Tracks

- This example shows what it looks like when you start another file save via the download to this device method.
- This is similar to saving to a USB storage device plugged into the front panel.
