

SUGARCUBE™

SugarCube SC2-Plus

What's New as of version 2.3-600+

SugarCube SC2-Plus

New Features/Changes

Below is a short list of changes in recent releases:

1. While recording, routing modes are inactive. (Changing modes while recording was causing broken files on the SugarCube CPU board.)
2. When using the desktop app, saved files no longer have a '--done' tag.
3. Minor cleanup of buttons.
4. Minor adjustment to various defaults.
5. Note: changes/updates to recording features can be found separately in 'What's New in Recording' help guide.

SugarCube SC2-Plus

Features/Changes from Jan 2022

1. If background clicking is detected, please **press 'Bypass' twice** to clear the click removal buffers.
2. No more needed to **power-cycle** after an update. Your SugarCube will restart itself after an update and is ready to go.
3. Various bug fixes including internal USB pathway reworked and more stable.
4. Noise Reduction: obscure bug found and fixed, should now work as expected.
5. EQ settings should now work as expected whether with Noise Reduction or stand alone.
6. Software version number now displays on the main menu.
7. Note: changes/updates to recording features can be found separately in 'What's New in Recording' help guide.

SugarCube SC2-Plus

Features/Changes from Aug 2021

1. New '**System**' tab added to '**Settings**' to control some system functions including how long the front panel display remains on, among other controls.
2. "**VU Meter**" added to the '**Settings**' page on '**Input Level**' tab as well as to the **Routing** page.
3. New **Startup Screen** shows the SugarCube startup progress to know when it is ready to use after power on.
4. New requirement to **power cycle** the SugarCube when a new update is installed. You will see a message to announce a new download is ready and to please power off, count to 3, then back on to complete the update process.
5. When using **Noise Reduction**, the process now waits for the needle drop before sampling noise. So, no hurry, just **Start** the **Noise Reduction** process and it will wait for you to get to the turntable.

SugarCube SC2-Plus

Features/Changes from 2020

1. **Changes to the recording system**, please see '**What's new with Recording.**'
2. **Simplified pairing:** you can now enter "1111" (or the last four digits of your SugarCube model number if you own more than one SugarCube) as a pairing code. No more need to press the pairing button!
